<b>Title of contribution</b>	<i>Pilot calculation of the national multidimensional poverty index in Kazakhstan</i>
<b>Author Name</b>	<i>Natalya Belonossova</i>
<b>Author Organization</b>	<i>Bureau of National Statistics of the Republic of Kazakhstan</i>
<b>Topic</b>	<i>Poverty as a multidimensional, multi-layered concept</i>
<b>Summary:</b>	
<p><i>The multidimensional poverty approach to measuring deprivations at the household level can be adapted using country-specific data and indicators to provide a more complete picture of poverty, including child poverty. Kazakhstan will share its experience in the development and results of the pilot calculation of the national multidimensional poverty index using the Alkire Foster method in cooperation with the Oxford Group. We present the results of the technical mission to the BNS together with the UNECE experts. In addition, we will present the results of cooperation with UNICEF on the calculation of child multidimensional poverty.</i></p>
