## Economic Commission for Europe

### Committee on Sustainable Energy

#### Thirty-first session

Geneva, 21-23 September 2022

Item 11(a) of the provisional agenda

**Looking ahead: Future work of the Committee on Sustainable Energy:**

**Review of subprogramme performance and planning**

## **Outline of key components of the programme of work of Sustainable energy subprogramme for 2024 – Approved 23 September 2022**

### **Note by the Secretariat**

#### **Introduction**

1. This document presents an outline of key components (objective, strategy and deliverables) of the programme of work of the Sustainable energy subprogramme subprogramme (“the subprogramme”) for 2024. These components are based on the subprogramme-related section of the ECE proposed programme budget for 2023, with modified or new elements highlighted in track changes. The Committee on Sustainable Energy (“the Committee”) is invited to consider this information and provide recommendations on these components, as necessary. Those modifications and/or member States’ recommendations agreed by the Committee and included in its decisions will be reflected in the proposed programme plan of the subprogramme for 2024. It will be prepared by the secretariat at the end of 2022 and included in the ECE proposed programme budget for 2024.

## **Outline of key components of the programme of work**

### **I. Objective**

2. The objective, to which the subprogramme contributes, is to ensure secure access to affordable, reliable, sustainable, and modern energy for all and to reduce greenhouse gas emissions and the carbon footprint of the energy sector in the region.

### **II. Strategy**

3. The responsibility for the subprogramme is vested in the Sustainable Energy Division.
4. The strategy of the subprogramme is to support international policy dialogue and cooperation among governments, energy industries and other stakeholders to foster

sustainable energy development; develop and deploy ECE policy recommendations, norms, standards, guidelines and tools on energy-related issues; and provide capacity-building and assistance to member States, at their request, through training programmes, advisory services and technical cooperation projects. Through its work, the subprogramme will contribute to ECE work on cross-sectoral collaboration areas<sup>1</sup> and to priorities related to the circular economy. To contribute to the objective, the subprogramme will:

(a) Further develop normative instruments (such as best practices and principles), awareness-raising campaigns and the deployment of ECE tools through workshops, seminars and technical projects to help member States meet their commitments to the 2030 Agenda for Sustainable Development and the Paris Agreement with regard to reducing their environmental footprint related to energy, accelerating the deep transformation of the energy sector to meet future needs, ensuring the sustainable management of resources and assessing options to ensure energy for sustainable development;

(b) Promote policy dialogue and cooperation among member States, regional entities and other partners on sustainable energy issues;

(c) Provide technical assistance and guidance on energy transitions in the context of sustainable development, disseminate best practices and improve information-sharing;

(d) Promote collaboration among private and public stakeholders that are key to implementing national and regional policies, including with regard to normative instruments and their deployment and dissemination;

(e) Support member States on issues related to recovery from the COVID-19 pandemic through its regular work on sustainable energy;

(f) Coordinate and promote efforts related to energy resilience across the ECE region and to provide an ECE Platform on Resilient Energy Systems for inclusive dialogue; and

(g) Explore and increase understanding on energy-related climate financing in the ECE region, including policies and mechanisms for increasing financing for low- and zero-carbon technologies, the critical raw materials needed for low carbon transformations, and green infrastructure projects.

5. The above-mentioned work is expected to result in:

(a) More effective integration of sustainable energy across national policies and normative frameworks in support of the 2030 Agenda and the Paris Agreement;

(b) Enhanced dialogue and cooperation among energy actors to boost transformational investment in the energy sector and, consequently, accelerate the modernization of the energy system to meet countries' sustainable development and climate commitments;

(c) Improved access of Member States to frameworks and tools required for integrated and sustainable resource management that aid the progress towards a more circular economy and contribute to the food-water-energy nexus (see [ECE/ENERGY/30/2021/INF.1/Rev.1](#));

(d) The implementation of requests from ECE to the Committee on Sustainable Energy;

(e) Improvement in the performance of buildings from a health perspective (e.g. temperatures, comfort, effective air intake and recycling filters), which will improve the protection and resilience of populations;

---

<sup>1</sup> ECE cross-sectoral collaboration areas: (a) Digital and green transformations for sustainable development in the ECE region (agreed by the 119th meeting of the ECE Executive Committee as a cross-cutting theme of the seventieth session of ECE in 2023); (b) Circular economy and the sustainable use of natural resources; (c) Sustainable and smart cities for all ages; (d) Sustainable mobility and smart connectivity; and (e) Measuring and monitoring progress towards achieving the Goals.

(f) Inclusive dialogue, coordination and collaboration on efforts related to energy resilience across the ECE region; and

(g) Increased understanding and implementation of climate-friendly policies and mechanisms that can help increase financing for low- and zero-carbon technologies, the critical raw materials needed for low carbon transformations, and green infrastructure projects in the ECE region.

### III. Deliverables to be implemented in 2024.

6. The Table lists all deliverables, by category and subcategory, for 2024 that are expected to contribute to the attainment of the objective stated above.

<i>Deliverables</i>	<i>2023 planned</i>	<i>2024 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies:</b>		
<b>Parliamentary documentation (number of documents)</b>	<b>45</b>	<b>40</b>
1. Documentation for the Committee on Sustainable Energy and related subsidiary bodies	45	40
<b>Substantive services for meetings (number of three-hour meetings)</b>	<b>38</b>	<b>38</b>
2. Meetings of the Committee on Sustainable Energy, its Bureau and related subsidiary bodies	38	38
<b>B. Generation and transfer of knowledge:</b>		
<b>Technical cooperation and field projects (number of projects)</b>	<b>9</b>	<b>6</b>
3. On sustainable resource management	3	2
4. On reducing the environmental footprint of energy	1	1
5. On accelerating transformations of the energy sector	3	2
6. On supporting member States in securing sustainable energy	2	1
<b>Seminars, workshops and training events (number of days)</b>	<b>10</b>	<b>13</b>
7. Workshops for experts and government officials on the application of the United Nations Framework Classification for Resources and the United Nations Resource Management System	2	2
8. Seminars on energy-efficiency measures, accelerators and standards	2	2
9. Seminars on renewable energy development and policy reforms for climate change mitigation	2	2
10. International Forum on Energy for Sustainable Development	4	3
11. Trainings and workshops on methane management	-	2
12. Workshops and seminars on energy resiliency	-	2
<b>C. Publications (number of publications)</b>	<b>2</b>	<b>3</b>
13. on hydrogen, United Nations Framework Classification for Resources and United Nations Resource Management System	2	1
14. on Digitalization, best practices in methane management	-	2
<b>D. Communication deliverables:</b>		
<b>Outreach programmes, special events and information materials:</b> booklets on sustainable energy and related topics, for regional access.		
<b>External and media relations:</b> press releases, keynote speeches and articles on the activities of the energy subprogramme.		
<b>Digital platforms and multimedia content:</b> update and maintenance of subprogramme's website providing access to information and documents for regional and global audiences.
