Statement of Intent

The community is a semi-formal alliance, open to any organisation working in the field of official statistics. Partners in the community are expected to actively support the goals of the community. The resources available to the community will be used to support standards-based modernisation through international collaboration.

Community activities will be limited to a maximum duration of one year, after which they will be reviewed. All community activities are voluntary.

The community is the “owner” of products developed or produced as a result of community activities and projects.

The UNECE Secretariat will support and facilitate the work of the community and the HLG-MOS.
