FOREST EUROPE ▾

pan-European - Data Export

Show all

- 1 **Forest resources and carbon**
- 2 **Maintenance of forest ecosystem health and vitality**
- 3 **Productive functions of forests (wood and non-wood)**
- 4 **Biological diversity in forest ecosystems**
- 5 **Protective functions in forest management**
- 6 **Socio-economic functions and conditions**

This dataset consists of information provided by the National Correspondents in response to the joint FOREST EUROPE, UNECE, FAO questionnaire on the quantitative pan-European indicators for sustainable forest management.

The pan-European reporting 2020 was carried out in parallel to FRA 2020. Although separate processes, some variables appear in both. Please note, however, that this platform presents pan-European dataset as collected until June 2019 and may not reflect updates made in consultation with the national correspondents at the later stages, e.g. for the elaboration of the [State of Europe's Forests 2020](#) report.

This platform was developed jointly by [FAO](#) and [UNECE](#) with the technical support from [FOREST EUROPE](#)
