

## Comments by the United States of America on the report of the Gothenburg Protocol Review

We have only editorial comments to raise, as the substantive U.S. comments were addressed in the current draft. These include:

- The PM<sub>2.5</sub> notation should be standardized throughout (there are some references to PM2.5)
- The NO<sub>x</sub> notation should be standardized throughout (there are some references to NOx)
- Paragraph 74 is missing an “and” between Canada and the United States of America at the end of the last sentence.
