Economic Commission for Europe

Inland Transport Committee

Working Party on the Transport of Dangerous Goods

Joint Meeting of Experts on the Regulations annexed to the European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN) (ADN Safety Committee)

Forty-first session

Geneva, 23–27 January 2023 Item 4 (d) of the provisional agenda Implementation of the European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN): Training of experts

ADN catalogue of questions 202123: Chemicals

Transmitted by the Central Commission for the Navigation of the Rhine (CCNR)*, **

^{*} Distributed in German by the Central Commission for the Navigation of the Rhine in document CCNR-ZKR/ADN/WP.15/AC.2/2023/11.

^{**} A/76/6 (Sect. 20), para. 20.76.

Examination objective 1: General

Number	Source		Correct answer
331 01.0-01	Basic	general knowledge	В
	The c	combustion of butane is:	
	A	A physical reaction	
	В	A chemical reaction	
	C	A biological reaction	
	D	A geological reaction	
331 01.0-02	Basic	general knowledge	В
	Whic	h of the following could happen to a substance in a physical reaction?	
	A	The substance's state changes and the substance itself also changes	
	В	The substance's state changes but the substance itself does not change	
	C	The substance's state does not change but the substance itself changes	
	D	The substance's state does not change, nor does the substance itself	
331 01.0-03	Basic	general knowledge	С
	Whic	h of the following reactions is a chemical reaction?	
	A	The melting of candle wax	
	В	The dissolving of sugar in water	
	C	The oxidation of iron	
	D	The evaporation of motor spirit or gasoline or petrol	
331 01.0-04	Basic	general knowledge	D
	Whic	h of the following reactions is a physical reaction?	
	A	The combustion of diesel fuel	
	В	The decomposition of water into hydrogen and oxygen	
	C	The oxidation of aluminium	
	D	The solidification of benzene	

Examination objective 1: General

Number	Source	e	Correct answer
331 01.0-05	Basic	c general knowledge	В
	Whic	ch of the following reactions is a physical reaction?	
	A	The decomposition of mercury oxide into mercury and oxygen	
	В	The expansion of gasoil	
	C	The polymerization of styrene	
	D	The combustion of home heating oils	
331 01.0-06	Basic	c general knowledge	A
	Wha	t is the evaporation of UN No. 1846, CARBON TETRACHLORIDE?	
	A	A physical reaction	
	В	A chemical reaction	
	C	A biological reaction	
	D	A geological reaction	
331 01.0-07	Basic	c general knowledge	В
	What is polymerization of UN No. 2055, STYRENE MONOMER STABILIZED?		
	A	A physical reaction	
	В	A chemical reaction	
	C	A biological reaction	
	D	A geological reaction	
331 01.0-08	Basic	c general knowledge	С
	Wha	t is the combustion of UN No. 2247, n-DECANE?	
	A	A biological reaction	
	В	A physical reaction	
	C	A chemical reaction	
	D	A geological reaction	

Examination objective 2: Temperature, pressure, volume

Number	Source		Correct answer	
331 02.0-01	Basic	knowledge of physics	C	
	Which	h value is equivalent to 0.5 bar?		
	A	0.5 kPa		
	В	5.0 kPa		
	C	50.0 kPa		
	D	500.0 kPa		
331 02.0-02	Basic	knowledge of physics	В	
		sed container has a pressure of 180 kPa at a temperature of 27 °C. The ne of the container does not change. What is the excess pressure at ?		
	A	154.3 kPa		
	В	210.0 kPa		
	C	230.0 kPa		
	D	513.3 kPa		
331 02.0-03	Basic	knowledge of physics	D	
		closed cargo tank is 95 % filled with UN No. 1547, ANILINE en will vaporization of the aniline cease?		
	A	Once the pressure of the aniline vapour is equal to the outside air pressure		
	В	Once the aniline has completely vaporized		
	C	Once the critical temperature has been reached		
	D	Once the pressure of the aniline vapour is equal to the saturated vapour pressure		
331 02.0-04	Basic	knowledge of physics	A	
	The pressure above a liquid increases. What happens to the liquid's boiling point?			
	A	The boiling point increases		
	В	The boiling point decreases		
	C	The boiling point remains the same		
	D	The boiling point increases then drops		

Examination objective 2: Temperature, pressure, volume

Number	Source	2	Correct answer
331 02.0-05	Basic	knowledge of physics	С
	What	t happens when Aa closed bottle of gas is heated in the sun. What ens?	
	A	Only the pressure rises	
	В	Only the temperature rises	
	C	Both the pressure and the temperature rise	
	D	The pressure falls, but the temperature rises	
331 02.0-06	Basic	c knowledge of physics	C
	of 10	sed empty cargo tank with a volume of 240 m ³ has an excess pressure kPa. The tank receives a liquid cargo of 80 m ³ . The temperature ins constant. What is then the excess pressure in the cargo tank?	
	A	5 kPa	
	В	7.5 kPa	
	C	15 kPa	
	D	30 kPa	
331 02.0-07	Basic	knowledge of physics	В
	A liq	uid at constant temperature has:	
	A	A specific shape and a specific volume	
	В	No specific shape, but a specific volume	
	C	A specific shape, but no specific volume	
	D	No specific shape or volume	
331 02.0-08	Basic	knowledge of physics	A
	What	t is the critical temperature?	
	A	The temperature above which a gas cannot be liquefied	
	В	The lowest temperature possible, namely 0 K	
	C	The temperature above which a gas can be liquefied	
	D	The temperature at which the lower explosive limit is reached	
331 02.0-09	Basic	c knowledge of physics	A
	Whic	ch temperature is equivalent to 353 K?	
	A	80 ℃	
	В	253 ℃	
	C	353 ℃	
	D	626 ℃	

Examination objective 2: Temperature, pressure, volume

Number	Source	2	Correct answer	
331 02.0-10	Basic	knowledge of physics	С	
		°C, the volume of an enclosed gas is 98 litres. The pressure remains ant. What is the volume at 30 °C?		
	A	95 litres		
	В	98 litres		
	C	101 litres		
	D	140 litres		
331 02.0-11	Basic	c knowledge of physics	В	
	What	t is the lowest temperature possible?		
	A	0 ℃		
	В	0 K		
	C	-273 K		
	D	273 K		
331 02.0-12	Basic	knowledge of physics	В	
	Which liquids are considered as liquids having a low boiling point?			
	A	Liquids with a boiling point below 0 °C		
	В	Liquids with a boiling point below 100 °C		
	C	Liquids with a boiling point between 100 °C and 150 °C		
	D	Liquids with a boiling point above 150 $^{\circ}$ C		
331 02.0-13	Basic	knowledge of physics	С	
	When	n a pure substance melts, what happens to the temperature?		
	A	It rises		
	В	It falls		
	C	It remains constant		
	D	It rises or falls depending on the substance		
331 02.0-14	Basic	knowledge of physics	В	
		poiling point of UN No. 1897, TETRACHLOROETHYLENE is C. What is tetrachloroethylene?		
	A	A liquid with a low boiling point		
	В	A liquid with a medium boiling point		
	C	A liquid with a high boiling point		
	D	A gas		

Examination objective 2: Temperature, pressure, volume

Number	Source	?	Correct answer	
331 02.0-15	Basic	knowledge of physics	С	
	What	ich temperature in kelvin is equivalent to a temperature of 30 °C?		
	A	30 K		
	В	243 K		
	C	303 K		
	D	-243 K		
331 02.0-16	Basic	knowledge of physics	D	
	Whic	h are liquids with a high boiling point?		
	A	Liquids with a boiling point below 50 °C		
	В	Liquids with a boiling point below 100 °C		
	C	Liquids with a boiling point between 100 °C and 150 °C		
	D	Liquids with a boiling point above 150 °C		
331 02.0-17	Basic	knowledge of physics	В	
	In Ga	ny-Lussac's law, what unit is always used to express temperature?		
	A	°C		
	В	K		
	C	Pa		
	D	°F		
331 02.0-18	Basic	knowledge of physics	A	
		poiling point of UN No. 1155, DIETHYL ETHER is 35 °C. What is yl ether?		
	A	A liquid with a low boiling point		
	В	A liquid with a medium boiling point		
	C	A liquid with a high boiling point		
	D	A liquid with a very high boiling point		
331 02.0-19	Basic	knowledge of physics	D	
	Which unit is used to express pressure?			
	A	The kelvin		
	В	The litre		
	C	The newton		
	D	The pascal		

Examination objective 2: Temperature, pressure, volume

Number	Source		Correct answer
331 02.0-20	Basic	knowledge of physics	D
	What	ppm value is equivalent to a volume of 100 %?	
	A	1 ppm	
	В	100 ppm	
	C	1,000 ppm	
	D	1,000,000 ppm	
331 02.0-21	Basic	knowledge of physics	В
	7 °C.	sed container has an excess pressure of 200 kPa at a temperature of The excess pressure rises to 400 kPa. The volume does not change is the new temperature?	
	A	14 °C	
	В	287 °C	
	C	560 °C	
	D	-133 ℃	
331 02.0-22	Basic	knowledge of physics	С
	What happens to the pressure In an enclosed space, when the absolute temperature drops to half the initial temperature in the space. What happens to the pressure?		
	A	The pressure doubles	
	В	The pressure remains constant	
	C	The pressure drops by half	
	D	The pressure becomes four times lower	
331 02.0-23	Basic	knowledge of physics	С
	What	does the boiling point of a liquid signify?	
	A	The pressure of the liquid at a temperature of 100 °C	
	В	The quantity of liquid that reaches boiling point	
	C	The temperature at which the liquid is converted to a vapour at a pressure of 100 kPa	
	D	The volume of a liquid at a temperature of 100 $^{\circ}\text{C}$ and a pressure of 100 kPa	

Examination objective 3: Physical state

Number	Source	e	Correct answer		
331 03.0-01	Basic	c knowledge of physics	C		
	Wha	t is the transition from solid to gaseous state called?			
	A	Solidification			
	В	Condensation			
	C	Sublimation			
	D	Gasification			
331 03.0-02	Basic	c knowledge of physics	В		
	Wha	t is the transition from gaseous to liquid state called?			
	A	Solidification			
	В	Condensation			
	C	Maturation			
	D	Sublimation			
331 03.0-03	Basic	c knowledge of physics	В		
	What is condensation an example of?				
	A	The transition from gaseous to solid state			
	В	The transition from gaseous to liquid state			
	C	The transition from liquid to gaseous state			
	D	The evaporation of a substance			
331 03.0-04	Basic knowledge of physics		A		
	Whic	ch of the following is an example of sublimation?			
	A	The transition of carbonic snow to a gaseous state			
	В	The formation of condensation on a cold window			
	C	The solidification of molten iron			
	D	The evaporation of liquid hexane from soya cake			
331 03.0-05	Basic	c knowledge of physics	D		
	Wha	t is solidification?			
	A	The transition from solid to liquid state			
	В	The transition from liquid to gaseous state			
	C	The transition from gaseous to liquid state			
	D	The transition from liquid to solid state			

Examination objective 3: Physical state

Number	Source		Correct answer
331 03.0-06	Delete	ed (2012)	
331 03.0-07	Basic	knowledge of physics	С
	What	is the transition from solid to gaseous state called?	
	A	Melting	
	В	Solidification	
	C	Sublimation	
	D	Gasification	
331 03.0-08	Basic	knowledge of physics	A
		rmal pressure, the temperature of a substance is higher than its boiling What then is the physical state of the substance?	
	A	Gaseous	
	В	Liquid	
	C	Solid	
	D	Liquid or solid	
331 03.0-09	Basic	knowledge of physics	В
		physical state does UN No. 1605, ETHYLENE DIBROMIDE DIBROMETHANE) assume at a temperature of +5 °C?	
	A	A gaseous state	
	В	A solid state	
	C	A liquid state	
	D	An indeterminate state	
331 03.0-10	Basic	knowledge of physics	С
	What called	is the transition of a substance from a solid state to a gaseous state !?	
	A	Evaporation	
	В	Condensation	
	C	Sublimation	
	D	Recombination	
331 03.0-11	Basic	knowledge of chemistry	A
		new substance is formed as a result of a reaction \www.hat kind of on has taken place?	
	A	A chemical reaction	
	В	A physical reaction	
	C	A meteorological reaction	
	D	A logical reaction	

Examination objective 4: Fire, combustion

Number	Source		Correct answer
331 04.0-01	Basic	knowledge of substances	В
	volum	xplosivity range of UN No. 1547, ANILINE is 1.2 % to 11 % (by ne). What would the properties of a mixture of 0.1 % (by volume) of e and 99.9 % (by volume) of air be?	
	A	Flammable but not explosive	
	В	Neither flammable nor explosive	
	C	Flammable and explosive	
	D	Not flammable, but explosive	
331 04.0-02	Basic	knowledge of substances	В
	Which	uto-ignition temperature of UN No. 1779, FORMIC ACID is 480 °C. n of the following is true if the temperature of the formic acid-air re is below 480 °C?	
	A	The formic acid cannot ignite	
	В	The formic acid cannot ignite spontaneously (of its own accord)	
	C	The formic acid might ignite spontaneously (of its own accord)	
	D	The formic acid might ignite spontaneously (of its own accord), but not explode	
331 04.0-03	Basic	knowledge of substances	С
	What	is a catalyst?	
	A	A substance that prevents polymerization without contaminating the product	
	В	A substance that prevents static electricity without contaminating the product	
	C	A substance that accelerates a reaction but is not altered by the reaction	
	D	A substance that can be added as a colouring without contaminating the product	
331 04.0-04	Basic	knowledge of substances	В
	What	is a detonation?	
	A	A cleaning product	
	В	An explosion	
	C	A test tube	
	D	An inhibitor	

Examination objective 4: Fire, combustion

Number	Source	?	Correct answer
331 04.0-05	Basic	knowledge of substances	С
		Plash-point of UN No. 1282, PYRIDINE is 20 °C. What happens to ine at a temperature of 25 °C?	
	A	It is liable to ignite spontaneously	
	В	It does not produce enough vapour to be ignitable	
	C	It produces enough vapour to be ignitable	
	D	It produces too much vapour to be ignitable	
331 04.0-06	Basic	knowledge of substances	A
	Whic	h reaction requires the highest speed of combustion?	
	A	A detonation	
	В	A deflagration	
	C	An explosion	
	D	An implosion	
331 04.0-07	Basic	knowledge of substances	С
	How		
	A	By heating the substance	
	В	By increasing the pressure on the substance	
	C	By cooling the substance	
	D	By compressing the substance	
331 04.0-08	Basic	knowledge of substances	В
	volur	explosivity range of UN No. 1114, BENZENE is 1.2 to 8.6 % (by ne). What would the properties of a mixture of 5 % (by volume) of ene and 95 % (by volume) of air be?	
	A	Non-flammable but explosive	
	В	Flammable and explosive	
	C	Neither flammable nor explosive	
	D	Flammable but not explosive	

Examination objective 5: Density

Number	Source	2	Correct answer	
331 05.0-01	Basic	c knowledge of substances $-\rho = m/V$	В	
		rgo of UN No. 2874, FURFURYL ALCOHOL has a mass of 550 es. The relative density of furfuryl alcohol is 1.1. What is the volume of argo?		
	A	5 m^3		
	В	500 m^3		
	C	605 m^3		
	D	$2,000 \text{ m}^3$		
331 05.0-02	Basic	c knowledge of substances $-\rho = m/V$	С	
		rgo of UN No. 1991, CHLOROPRENE, STABILZED, has a volume of m ³ . The relative density of chloroprene is 0.96. What is the mass of the o?		
	A	0.48 t		
	В	192.0 t		
	C	480.0 t		
	D	521.0 t		
331 05.0-03	Basic	c knowledge of substances $-\rho = m/V$	A	
	A cargo of 600 m ³ UN No. 1218, ISOPRENE, STABILIZED, has a mass of 420 tonnes. What then is the relative density of the isoprene?			
	A	0.7		
	В	2.03		
	C	1.43		
	D	2.52		
331 05.0-04	Basic	c knowledge of substances $-\rho = m/V$	В	
	How is the density of a substance calculated?			
	A	By dividing the volume by the mass		
	В	By dividing the mass by the volume		
	C	By multiplying the volume by the mass		
	D	By adding the mass and the volume		

Examination objective 5: Density

Number	Source	2	Correct answer		
331 05.0-05	Basic	ϵ knowledge of substances $-\rho = m/V$	С		
	The t ANII anilin	emperature of a quantity What happens to the density of UN No. 1547, LINE if the temperature increases. What happens to the density of the ne?			
	A	The density increases			
	В	The density remains constant			
	C	The density decreases			
	D	The density sometimes increases and sometimes decreases			
331 05.0-06	Basic	c knowledge of substances $-\rho = m/V$	В		
		The mass density (density) of a substance is given as 2.15 kg/dm ³ . Which value corresponds to this density?			
	A	0.00215 t/m^3			
	В	2.15 t/m^3			
	C	21.5 t/m^3			
	D	215 t/m^3			
331 05.0-07	Basic	knowledge of substances $-\rho = m/V$	В		
	The relative density of a liquid is 0.95. What is the mass of 1,900 m ³ of this liquid?				
	A	1,805 kg			
	В	1,805 t			
	C	200 kg			
	D	200 t			
331 05.0-08	Basic	c knowledge of substances $-\rho = m/V$	A		
	The mass of 180 litres of UN No. 1092, ACROLEINE, STABILIZED is 144 kg. What is the relative density of the substance?				
	A	0.8			
	В	1.25			
	C	2.59			
	D	3.6			

Examination objective 5: Density

Number	Source		Correct answer		
331 05.0-09	Basic	knowledge of substances $-\rho = m/V$	С		
		elative density of a substance is 1.15. What is its volume if its mass is tonnes?			
	A	250 m^3			
	В	500 m^3			
	C	$2,000 \text{ m}^3$			
	D	$2,645 \text{ m}^3$			
331 05.0-10	Basic	knowledge of substances $-\rho = m/V$	A		
	If Tth densit	e volume of a quantity of gas decreases Wwhat happens to the its			
	A	The density increases			
	В	The density remains constant			
	C	The density decreases			
	D	The density sometimes increases and sometimes decreases			
331 05.0-11	Basic	knowledge of substances $-\rho = m/V$	A		
	How is the mass of a substance calculated?				
	A	By multiplying the mass density (density) by the volume			
	В	By dividing the mass density (density) by the volume			
	C	By dividing the volume by the mass density (density)			
	D	By dividing the volume by the pressure			
331 05.0-12	Basic	knowledge of substances $-\rho = m/V$	С		
	How	is the volume of a substance calculated?			
	A	By multiplying the mass density (density) by the mass			
	В	By dividing the mass density (density) by the mass			
	C	By dividing the mass by the mass density (density)			
	D	By dividing the mass by the pressure			
331 05.0-13	Basic	knowledge of substances $-\rho = m/V$	A		
	ACE	emperature What happens to the density of a quantity of UN No. 2789, FIC ACID SOLUTION if the temperature decreases. How does the try of the acetic acid change?			
	A	The density increases			
	В	The density decreases			
	C	The density remains constant			
	D	The density sometimes increases and sometimes decreases			

Examination objective 5: Density

Number	Source		Correct answer		
331 05.0-14	Basic	knowledge of substances $-\rho = m/V$	С		
		is the unit of mass density (density) used in the International System its (SI)?			
	A	m^3			
	В	kg			
	C	kg/m^3			
	D	1			
331 05.0-15	Basic	knowledge of substances $-\rho = m/V$	С		
-	What does the density of a gas depend on?				
	A	On temperature only			
	В	On pressure only			
	C	On pressure and temperature			
	D	On volume only			
331 05.0-16	Basic	knowledge of substances $-\rho = m/V$	В		
		est cases, how does the density of liquid vapours compare with the try of the outside air?			
	A	It is equivalent			
	В	It is higher			
	C	It is lower			
	D	None of the above			

Examination objective 6: Mixtures, chemical bonds

Number	Source		Correct answer
331 06.0-01	Basic	knowledge of chemistry	В
		tal reacts with oxygen. A black powdery substance results. What do ll this substance?	
	A	An element	
	В	A compound	
	C	An alloy	
	D	A mixture	
331 06.0-02	Basic	knowledge of chemistry	D
	Which	h of the following statements is true?	
	A	A mixture always consists of three substances in specific proportions	
	В	A mixture involves a chemical reaction	
	C	When a mixture is produced, heat is always released	
	D	A mixture is composed of at least two substances	
331 06.0-03	Basic	knowledge of chemistry	С
	What is pure water (H ₂ O) an example of?		
	A	An alloy	
	В	An element	
	C	A compound	
	D	A mixture	
331 06.0-04	Basic knowledge of chemistry C		
	What	does an organic compound always contain?	
	A	Hydrogen atoms	
	В	Oxygen atoms	
	C	Carbon atoms	
	D	Nitrogen atoms	

Examination objective 6: Mixtures, chemical bonds

Number	Source	e	Correct answer
331 06.0-05	Basic	c knowledge of chemistry	A
	What is formed when sugar is dissolved?		
	A	A mixture	
	В	A compound	
	C	An alloy	
	D	An element	
331 06.0-06	Basic	c knowledge of chemistry	В
	Wha	t happens when hydrogen is released from a compound?	
	A	Being heavier than air, it collects near the ground	
	В	Being lighter than air, it rises	
	C	It immediately combines with nitrogen in the air	
	D	Water is formed in a catalytic reaction	
331 06.0-07	Basic knowledge of chemistry		D
	Which elements are contained in the compound nitric acid (HNO ₃)?		
	A	Sulphur, nitrogen and oxygen	
	В	Carbon, hydrogen and nitrogen	
	C	Helium, sodium and oxygen	
	D	Hydrogen, nitrogen and oxygen	
331 06.0-08	Basic	c knowledge of chemistry	В
	Can liquids be mixed?		
	A	Yes, liquids are always miscible	
	В	Yes, but not all liquids are miscible with each other	
	C	No, liquids are never miscible	
	D	Yes, liquids are miscible in any proportions	

Examination objective 7: Molecules, atoms

Number	Source	e	Correct answer		
331 07.0-01	Basic	c knowledge of chemistry	A		
	Wha	t is NaNO ₃ ?			
	A	An inorganic compound			
	В	An organic compound			
	C	A mixture			
	D	An alloy			
331 07.0-02	Basic	c knowledge of chemistry	В		
	Wha	t is C ₃ H ₈ ?			
	A	A mixture			
	В	An organic compound			
	C	An inorganic compound			
	D	An alloy			
331 07.0-03	Basic	c knowledge of chemistry	D		
	What is the symbol for the element "oxygen"?				
	A	S			
	В	Н			
	C	N			
	D	O			
331 07.0-04	Basic knowledge of chemistry		В		
	Wha	t is the symbol for the element "nitrogen"?			
	A	S			
	В	N			
	C	O			
	D	Н			
331 07.0-05	Basic	c knowledge of chemistry	C		
	Which of the following statements is false?				
	A	Molecules are composed of atoms			
	В	A pure substance is composed of a single type of molecule			
	C	A compound is always composed of a single type of atom			
	D	An element is composed of a single type of atom			

Examination objective 7: Molecules, atoms

Number	Source		Correct answer		
331 07.0-06	Basic	knowledge of chemistry	A		
	What is the symbol for the element "hydrogen"?				
	A	Н			
	В	0			
	C	W			
	D	N			
331 07.0-07	Basic	knowledge of chemistry	A		
	What	are molecules?			
	A	Molecules are electrically neutral particles composed of two or more atoms			
	В	Molecules are the smallest units of a substance that have half of all the properties of the substance			
	C	Molecules are atoms that form at 20 $^{\circ}\text{C}$			
	D	Molecules are components of atoms			
331 07.0-08	Basic	knowledge of chemistry	A		
	What is an element always made up of?				
	A	Atoms			
	В	Mixtures			
	C	Compounds			
	D	Molecules			
331 07.0-09	Basic	knowledge of chemistry	В		
	What is the term for an electrically neutral particle composed of two or more atoms?				
	A	A neutron			
	В	A molecule			
	C	An ion			
	D	A proton			

Examination objective 7: Molecules, atoms

Number	Source	?	Correct answer		
331 07.0-10	Basic	knowledge of chemistry	В		
	What is the correct formula for three molecules of water?				
	A	$(H_2O)_3$			
	В	$3 H_2O$			
	C	H_6O_3			
	D	H_2O			
331 07.0-11	Basic	knowledge of chemistry	D		
	What	is the Latin name for oxygen?			
	A	Ferrum			
	В	Hydrogenium			
	C	Nitrogenium			
	D	Oxygenium			
331 07.0-12	Basic	knowledge of chemistry	В		
	In chemical formulae, what is the significance of the letter "N"?				
	A	Carbon			
	В	Nitrogen			
	C	Hydrogen			
	D	Oxygen			
331 07.0-13	Basic	knowledge of chemistry	A		
	What	is the symbol for carbon?			
	A	C			
	В	Н			
	C	K			
	D	0			
331 07.0-14	Basic knowledge of chemistry B				
		is the molecular mass of UN No. 1294, TOLUENE ($C_6H_5CH_3$)? 12, $H=1$)			
	A	78			
	В	92			
	C	104			
	D	106			

Examination objective 7: Molecules, atoms

Number	Source	Source			
331 07.0-15	Basic knowledge		A		
	At w				
	A	-273 °C			
	В	212 K			
	C	273 K			
	D	-100 °C			

Examination objective 8: Polymerization

Number	Source		Correct answer
331 08.0-01	Basic	knowledge of chemistry	В
	What	is an inhibitor?	
	A	A substance that accelerates a reaction	
	В	A substance that prevents polymerization	
	C	A substance that attacks the nervous system	
	D	A substance that prevents electrostatic charge	
331 08.0-02	Basic	knowledge of chemistry	A
	What	substance prevents polymerization?	
	A	An inhibitor	
	В	A capacitor	
	C	A catalyst	
	D	An indicator	
331 08.0-03	Basic	knowledge of chemistry	A
	Which	h of the following statements is correct?	
	A	An inhibitor should be properly mixed with the product	
	В	An inhibitor may react with the product	
	C	An inhibitor may easily evaporate from the product	
	D	An inhibitor should have a low flash-point	
331 08.0-04	Basic	knowledge of chemistry	A
	What	is polymerization?	
	A	The process by which one or more reactions result in a very large molecule	
	В	A process of combustion during which much heat is liberated	
	C	The process by which a compound is destroyed under the effect of heat	
	D	The process by which a compound is destroyed under the effect of an electric current	

Examination objective 8: Polymerization

Number	Source		Correct answer
331 08.0-05	Basic	knowledge of chemistry	С
	prever	go tank contains a product that is liable to polymerize easily. To not polymerization, an inhibitor has been added. During carriage, a quantity of the product evaporates and condenses some time later on rface of the cargo tanks. What might happen to the condensate?	
	A	The condensate will not polymerize since it contains an inhibitor	
	В	The condensate will not polymerize since it will evaporate first	
	C	The condensate might polymerize since it does not contain an inhibitor	
	D	The condensate might polymerize even though it still contains some inhibitor	
331 08.0-06	Basic	knowledge of chemistry	В
	STAB ensure	g transport of a cargo of <u>UN No. 2055</u> , <u>STYRENE MONOMER</u> <u>SILIZED</u> styrene, precautionary measures should have to be taken to e that the cargo is sufficiently stabilized. What particulars do not need included in the transport document?	
	A	The name and quantity of the stabilizer added	
	В	The pressure above the stabilized liquid	
	C	The date at which the stabilizer was added and its duration of effectiveness under normal conditions	
	D	The temperature limits affecting the stabilizer	
331 08.0-07	Basic	knowledge	D
	What	does the syllable "poly" in the word "polymerization" signify?	
	A	Large	
	В	Long	
	C	Atom	
	D	Many	
331 08.0-08	Basic	knowledge of chemistry	A
	What		
	A	A rise in temperature	
	В	A drop in temperature	
	C	A change in colour	
	D	A change in mass	

Examination objective 8: Polymerization

Number	Source		Correct answer
331 08.0-09	Basic knowledge of chemistry		C
	What	is an inhibitor?	
	A	A type of adhesive	
	В	A cleaning product	
	C	A stabilizer	
	D	A product that lowers the freezing-point	
331 08.0-10	Basic	knowledge of chemistry	D
		estance is liquid at 20 °C and decomposes readily at temperatures a 35 °C. What might this substance be?	
	A	A stable gas	
	В	An unstable gas	
	C	A stable liquid	
	D	An unstable liquid	
331 08.0-11	Basic	knowledge of chemistry	С
	What	is a positive catalyst?	
	A	A substance that prevents polymerization	
	В	A substance that prevents electrostatic charge	
	C	A substance that accelerates a reaction	
	D	A substance that prevents the formation of heat	
331 08.0-12	Basic	knowledge of chemistry	В
	What	is a negative catalyst?	
	A	A substance that promotes polymerization	
	В	A substance that slows a chemical reaction	
	C	A substance that prevents electrostatic charge	
	D	A substance that inhibits evaporation of a liquid	
331 08.0-13	Basic	knowledge of chemistry	В
		is the difference between a chemically stable substance and a ically unstable substance?	
	A	A chemically stable substance decomposes more readily than a chemically unstable substance	
	В	A chemically unstable substance decomposes readily, while a chemically stable substance does not readily decompose	
	C	A chemically unstable substance evaporates more readily than a chemically stable substance	
	D	A chemically unstable substance has a higher melting-point than a chemically stable substance	

Examination objective 8: Polymerization

Number	Source		Correct answer
331 08.0-14	Basic	knowledge of chemistry	В
	What	do we call the process whereby monomers band together during a ical reaction?	
	A	Evaporation	
	В	Polymerization	
	C	Decomposition	
	D	Condensation	
331 08.0-15	Basic	knowledge of chemistry	В
-	Which	h product should be transported in a stabilized state?	
	A	UN No. 1114, BENZENE	
	В	UN No. 1301, VINYL ACETATE, STABILIZED	
	C	UN No. 1863, FUEL, AVIATION, TURBINE ENGINE WITH MORE THAN 10 % BENZENE	
	D	UN No. 2312, PHENOL, MOLTEN	
331 08.0-16	Basic knowledge of chemistry		С
-	Why is a stabilizer (inhibitor) added to certain products?		
	A	To prevent them from exploding	
	В	To prevent them from evaporating	
	C	To prevent them from polymerizing	
	D	To prevent them from freezing	
331 08.0-17	Basic knowledge of chemistry C		
-	What	often triggers polymerization?	
	A	An inhibitor	
	В	An excess of nitrogen	
	C	A rise in temperature	
	D	A drop in temperature	

Examination objective 9: Acids, bases

Number	Source

	Wha	t are solutions with a pH value above 7 calledalso known as?	
	A	Acids	
	В	Bases	
	C	Soaps	
	D	Suspensions	
331 09.0-02	Basic	c knowledge of chemistry	С
		No. 1824, SODIUM HYDROXIDE SOLUTION is an example of h of the following?	
	A	A strong acid	
	В	A weak acid	
	C	A strong base	
	D	A weak base	
331 09.0-03	Basic	c knowledge of chemistry	A
		No. 1830, SULPHURIC ACID containing more than 51 % of acid is an apple of which of the following?	
	A	A strong acid	
	В	A weak acid	
	C	A strong base	
	D	A weak base	
331 09.0-04	Basic	c knowledge of chemistry	D
	Wha	t is the pH value of a base?	
	A	Always greater than 14	
	В	Always lower than 7	
	C	Always equal to 7	
	D	Always greater than 7	
331 09.0-05	Basic	c knowledge of chemistry	С
	How	can a base solution be neutralized?	
	A	By carefully adding soap	
	В	By carefully adding water	
	C	By carefully adding an acid solution	
	D	By carefully adding caustic soda	

Examination objective 9: Acids, bases

Number	Source		Correct answer
331 09.0-06	Basic knowledge of chemistry		В
	What	are the three properties that characterize an acid?	
	A	Corrosive, attacks certain metals, pH greater than 7	
	В	Corrosive, attacks certain metals, pH less than 7	
	C	Corrosive, attacks certain metals, soapy odour	
	D	Corrosive, turns litmus paper red, soapy odour	
331 09.0-07	Basic	knowledge of chemistry	D
		is the difference between an acid solution with a pH of 1 and an acid on with a pH of 3?	
	A	The solution with a pH of 1 is more base	
	В	The solution with a pH of 1 is more neutral	
	C	The solution with a pH of 1 is more diluted	
	D	The solution with a pH of 1 is more acidic	
331 09.0-08	Basic knowledge of chemistry		В
		is the difference between a solution with a pH of 11 and a solution a pH of 8?	
	A	The solution with a pH of 11 is more acidic	
	В	The solution with a pH of 11 is more base	
	C	The solution with a pH of 11 is weaker	
	D	There is no difference	
331 09.0-09	Basic	knowledge of chemistry	С
	What	is the pH value of a neutral solution?	
	A	0	
	В	1	
	C	7	
	D	14	

Examination objective 9: Acids, bases

331 09.0-10	Basic knowledge of chemistry		D	
		ch is the greatest hazard posed by acids and bases when carried in ad navigation?		
	A	Toxicity		
	В	Flammability		
	C	Explosibility		
	D	Corrosivity		
331 09.0-11	Basic	c knowledge of chemistry	A	
	Wha	t do hydroxides always contain?		
	A	OH-		
	В	H^+		
	C	$\mathrm{H}_{3}\mathrm{O}^{+}$		
	D	CO-		
331 09.0-12	Basic	c knowledge of chemistry	В	
		No. 2790, ACETIC ACID SOLUTION, PG III is an example of which e following?		
	A	A strong acid		
	В	A weak acid		
	C	A strong base		
	D	A weak base		
331 09.0-13	Basic knowledge of chemistry B			
	What substance is produced when an acid reacts with a metal?			
	A	Oxygen		
	В	Hydrogen		
	C	Nitrogen		
	D	Water		

Examination objective 9: Acids, bases

Number	Source		Correct answer
331 09.0-14	Basic	knowledge of chemistry	D
	What	are bases also called?	
	A	Organic substances	
	В	Inorganic substances	
	C	Alkanoic acids	
	D	Alkaline substances	
331 09.0-15	Basic	knowledge of chemistry	В
	Which	h of the following products is a base?	
	A	UN No. 1685, SODIUM ARSENATE	
	В	UN No. 1814, POTASSIUM HYDROXIDE SOLUTION	
	C	UN No. 1230, METHANOL	
	D	UN No. 1573, CALCIUM ARSENATE	
331 09.0-16	Basic	knowledge of chemistry	A
	What	is the pH value of a strong acid?	
	A	0-3	
	В	7	
	C	8-10	
	D	10-12	

Examination objective 10: Oxidation

Number	Source		Correct answer
331 10.0-01	Basic k	knowledge of chemistry	A
	Which	is an example of slow oxidation?	
	A	The formation of iron rust	
	В	An explosion of liquefied gas	
	C	The combustion of natural gas	
	D	The evaporation of motor spirit or gasoline or petrol	
331 10.0-02	Basic l	knowledge of chemistry	В
	What a	are reducing agents?	
	A	Substances that readily donate oxygen to other substances	
	В	Substances that readily take up oxygen from other substances	
	C	Substances that are highly flammable	
	D	Substances that never react with other substances	
331 10.0-03	Basic knowledge of chemistry		С
	What i	s oxidation?	
	A	The bonding of a substance with carbon	
	В	The bonding of a substance with hydrogen	
	C	The bonding of a substance with oxygen	
	D	The bonding of a substance with nitrogen	
331 10.0-04	Basic knowledge of chemistry		A
	What a	are oxidants?	
	A	Substances that readily donate oxygen to other substances	
	В	Substances that readily take up oxygen from other substances	
	C	Substances that are highly flammable	
	D	Substances that never react with other substances	
331 10.0-05	Basic knowledge of chemistry B		
	What r	reaction is characteristic of flammable substances?	
	A	They release oxygen	
	В	They react with oxygen	
	C	They do not react with oxygen	
	D	They produce oxygen	

Examination objective 10: Oxidation

Number	Source		Correct answer
331 10.0-06	Basic knowledge of chemistry		В
	Whic	h of the following is characteristic of readily flammable substances?	
	A	They do not readily react with oxygen	
	В	They react readily with oxygen	
	C	They never react with oxygen	
	D	They release oxygen	
331 10.0-07	Basic	knowledge of chemistry	A
-	What	is oxidation?	
	A	The reaction of a substance with oxygen	
	В	The reaction of a substance with nitrogen	
	C	The addition of oxygen	
	D	The addition of nitrogen	

Examination objective 11: Knowledge of chemicals

Number	Source		Correct answer
331 11.0-01	Basic	knowledge of chemistry	A
	C ₄ H ₁₀	is an example of:	
	A	An alkane	
	В	An alkene	
	C	An aromate	
	D	A cycloalkane	
331 11.0-02	Basic	knowledge of chemistry	С
	Which	h of the following constitute two important groups of hydrocarbons?	
	A	Oxidants and reducing agents	
	В	Acids and bases	
	C	Alkanes and alkenes	
	D	Bases and hydroxides	
331 11.0-03	Basic knowledge of chemistry		A
	What	is a polymer?	
	A	A chain of very large molecules comprising repeated molecular units	
	В	A chemical that should prevent a particular substance from polymerizing	
	C	A chemical that accelerates a reaction but is not altered by the reaction	
	D	A readily flammable product that could trigger a chemical reaction	
331 11.0-04	Basic	knowledge of chemistry	В
	What	are organic nitrogen compounds?	
	A	Aromates	
	В	Nitriles	
	C	Ethers	
	D	Esters	

Examination objective 11: Knowledge of chemicals

Source		Correct answer	
Basic	knowledge of chemistry	С	
A	Esters

Examination objective 12: Chemical reactions

Number	Source		Correct answer
331 12.0-01	Basic	knowledge of chemistry	В
		is it important to ensure that water does not come into contact with PHURIC ACID concentrate containing more than 51 % acid (UN No. ?	
	A	Because when water is added, flammable hydrogen gas is formed	
	В	Because this results in the release of much heat, causing water to evaporate and bubble	
	C	Because this results in polymerization of the sulphuric acid	
	D	Because sulphuric acid reacts with water, releasing highly toxic vapours	
331 12.0-02	Basic	knowledge of chemistry	A
	Which	n of the following is a classic example of a self-accelerating reaction?	
	A	The polymerization of styrene	
	В	The decomposition of water into hydrogen and oxygen	
	C	The reaction of nitrogen with water	
	D	The oxidation of iron	
331 12.0-03	Basic	knowledge of chemistry	В
	tank c	mical that is liable to polymerization is loaded. The adjoining cargo contains another chemical. What must be ensured with regard to the ical in the adjoining cargo tank?	
	A	The chemical must not contain water	
	В	The chemical must not be too hot	
	C	The chemical must not be readily flammable	
	D	The chemical must not contain any inhibitor	
331 12.0-04	Basic	knowledge of chemistry	A
	How might the self-reaction of a substance be initiated?		
	A	By heating	
	В	By adding a stabilizer	
	C	By avoiding contamination from another cargo	
	D	By adding an inert gas	

Examination objective 12: Chemical reactions

Number	Source	?	Correct answer
331 12.0-05	Basic	knowledge of chemistry	С
	How	can reaction of the cargo with air be prevented?	
	A	By heating the cargo	
	В	By cooling the cargo	
	C	By wafting the cargo with an inert gas	
	D	By continuously moving the cargo around	
331 12.0-06	Basic	knowledge of chemistry	D
	Whic	h two types of substance have corrosive properties?	
	A	Alcohols and acids	
	В	Alcohols and bases	
	C	Precious metals and bases	
	D	Acids and bases	
331 12.0-07	Basic	knowledge of chemistry	В
	Whice	h gas is released <u>Ww</u> hen a metal reacts with an acid, it releases a gas. h one?	
	A	Oxygen	
	В	Hydrogen	
	C	Methane	
	D	Chlorine	
331 12.0-08	Basic	knowledge of chemistry	С
	What	results from the complete combustion of propane?	
	A	Oxygen and hydrogen	
	В	Carbon monoxide and water	
	C	Carbon dioxide and water	
	D	Carbon and hydrogen	
331 12.0-09	Basic	knowledge of chemistry	В
	What	results from the incomplete combustion of propane?	
	A	Oxygen and hydrogen	
	В	Carbon monoxide and water	
	C	Carbon dioxide and water	
	D	Carbon and hydrogen	

Examination objective 12: Chemical reactions

Number	Source	e	Correct answer		
331 12.0-10	Basic	c knowledge of chemistry	A		
	How	can a self-reaction of the cargo caused by oxygen be prevented?			
	A	By wafting it with an inert gas			
	В	By ensuring it is contaminated further			
	C	By heating it			
	D	By continuously decanting it			
331 12.0-11	Basic	c knowledge of chemistry	A		
	Wha	t does adding an inhibitor prevent?			
	A	Polymerization			
	В	Boiling			
	C	A fall in pressure			
	D	Condensation			
331 12.0-12	Basic	c knowledge of chemistry	В		
	What results from the complete combustion of pentane?				
	A	Oxygen and hydrogen			
	В	Carbon dioxide and water			
	C	Carbon and water			
	D	Pentane oxide and water			
331 12.0-13	Basic	c knowledge of chemistry	D		
	Wha	t results from the incomplete combustion of hexane?			
	A	Hexanol and water			
	В	Carbon dioxide and water			
	C	Oxygen and water			
	D	Carbon monoxide and water			
331 12.0-14	Basic	c knowledge of chemistry	В		
	A ch	emical reaction releases heat. What is this reaction called?			
	A	An endothermic reaction			
	В	An exothermic reaction			
	C	A heterogenic reaction			
	D	A homogenic reaction			

Examination objective 12: Chemical reactions

Number	Source	Source			
331 12.0-15	Basic knowledge of chemistry		A		
	A-What is the term for a reaction that gives rise to a new substance. What is the term for such a reaction?				
	A	A chemical reaction			
	В	A physical reaction			
	C	A meteorological reaction			
	D	A logical reaction			
331 12.0-16	Basic	knowledge of chemistry	D		
	Auto-oxidation is a chemical reaction in which the substance itself supplies the component required for the reaction. What is the component?				
	A	Carbon dioxide			
	В	Carbonic acid gas			
	C	Nitrogen			
	D	Oxygen			

Examination objective 1: Measurements

Number	Source		Correct answer	
332 01.0-01	Maxii	mum permissible concentration at the workplace	A	
	What	is the maximum permissible concentration at the workplace?		
	A	A legally prescribed concentration		
	В	A recommendation from the manufacturer of the dangerous substance		
	C	A recommendation of UNECE		
	D	A recommendation from a "gas" expert		
332 01.0-02	Maxii	mum permissible concentration at the workplace	В	
	maxir	is the meaning of the letter "S" when it appears in the value for Tthe num permissible concentration at the workplace is accompanied by ". What is the meaning of this "S"?		
	A	The abbreviation of the country where the limit value at the workplace is applicable		
	В	The toxic substance can be absorbed by the skin		
	C	The value is permitted		
	D	The substance can cause skin disease		
332 01.0-03	Meas	uring the concentration of gas	С	
	What marke	is the meaning of "n=10" on Aa gas measurement test tube is ed "n=10". What does this mean?		
	A	The margin for error of measurement with this test tube is 10 $\%$		
	В	To obtain an exact value, 10 measurements should be taken		
	C	To carry out a measurement, 10 pumps should be done with the toximeter		
	D	The measured value should be multiplied by 10		
332 01.0-04	Basic general knowledge C			
	Under normal conditions, what is the oxygen content of air?			
	A	17 %		
	В	19 %		
	C	21 %		
	D	22 %		

Examination objective 1: Measurements

Number	Source	Source			
332 01.0-05	Measu	uring the concentration of gas	A		
	are mi	alytic oxidation explosimeter is to be used to measure whether there ixtures of explosive gases and air in a cargo tank. In this case, is the nt of oxygen important as well?			
	A	Yes, the measurement is based on a combustion process. The content of oxygen influences the result			
	В	No, when the oxygen content is under 21 % in the cargo tank to be measured, no explosive mixture of gas (vapour) and air can form			
	C	No, catalytic oxidation explosimeters work independently of oxygen content			
	D	No, the measurement must be taken outside the cargo tank to be measured. Therefore, the oxygen content is of no importance			
332 01.0-06	Measu	uring the concentration of gas	В		
	We want to measure if a gas mixture in a cargo tank is explosive. The limit value for deciding is 20 % less than the lower explosive limit. Why?				
	A	Because the explosive limit is highly dependent on the temperature and humidity in the cargo tank			
	В	To ensure that the gas concentration is indeed under the lower explosive limit throughout the entire tank			
	C	So that even when the voltage is too weak (nearly empty battery) a reliable measurement can still be taken			
	D	Because when the oxygen content changes the gas mixture is not immediately able to explode			
332 01.0-07	Measu	uring the concentration of gas	A		
		e will would it be expected to find the highest toxic gas ntrations be measured in a cargo tank?			
	A	Depending on the density of the gas, either at the top or at the bottom of the cargo tank			
	В	The concentration is the same throughout the cargo tank			
	C	At the top of the cargo tank, as toxic gas is always lighter than air			
	D	At the bottom of the cargo tank, as toxic gas is always heavier than air			
332 01.0-08	Delete	ed (10.12.2020)

Number	Source		Correct answer
332 04.0-09	7.2.3.	7.1.5, 7.2.3.7.2.5	D
		naster decides that the blue cone can be removed. Should the residual tank too-also be free from gases for the blue cone or blue light to be ved?	
	A	Yes, as the residual cargo tank is one of the cargo tanks, and the cargo tanks must be free from gases (less than 10 % of the lower explosive limit)	
	В	Yes, as a residual cargo tank that is not free from gases is a hazard	
	C	No, as no gas can be expelled from a residual cargo tank	
	D	No, as according to ADN it is only in the cargo tanks that gases must be under 20 % of the lower explosive limit	
332 04.0-10	9.3.2	2.26.1	В
		re should the receptacle for residual products be located on the deck ank vessel of type C?	
	A	Always below deck in the cargo area at a minimum distance from the hull equal to one quarter of the vessel's breadth	
	В	In the cargo area at a minimum distance from the hull equal to one quarter of the vessel's breadth	
	C	Always below On deck anywhere in the cargo area	
	D	According to ADN, there is no requirement	

Examination objective 5: Degassing

Number	Source		Correct answer	
332 05.0-01	7.2.3.	7.1.1, 7.2.3.7.1.2	A	
	Where is it always permitted to degas into the atmosphere Uunloaded tanks that have contained substances of Class 6.1-must be degassed into the atmosphere. Where is this always permitted?			
	A	At the locations where it is permitted by the competent authority		
	В	Always during navigation, but the tank lids should remain closed		
	C	Always during navigation, except within the area of locks and their lay-bys		
	D	Always during navigation, but degassing should be carried out using a ventilation device		
332 05.0-02	7.2.3.	7.1.2	В	
	while	o tanks have contained UN No. 2054, MORPHOLINE. For degassing under way, what is the maximum allowable concentration of nable gases and vapours in the vented mixture at the outlet?		
	A	Less than 1 % of the lower explosive limit		
	В	Less than 10 % of the lower explosive limit		
	C	Not more than 20 % of the lower explosive limit		
	D	Less than 50 % of the lower explosive limit		
332 05.0-03	7.2.3.7.1.4			
	When the concentration of flammable gases and vapours in front of the accommodation reaches what level should degassing operations of empty cargo tanks into the atmosphere be interrupted?			
	A	At a concentration of more than 1 % of the lower explosive limit		
	В	At a concentration of more than 10 % of the lower explosive limit		
	C	At a concentration of more than 20 % of the lower explosive limit		
	D	At a concentration of more than 50 % of the lower explosive limit		
332 05.0-04	7.2.3.	D		
	May	degassing into the atmosphere be carried out in the lay-by of a lock?		
	A	Yes, but all stipulations in respect of degassing should be respected		
	В	Yes, but only if the lay-by is not within a densely populated area		
	C	Yes, but only if there is no risk involved for the crew		
	D	No, degassing in this area is prohibited in all circumstances		

Examination objective 5: Degassing

	somet	g the transport of dangerous goods, Why is a layer of nitrogen is imes placed added above the cargo during the transport of dangerous Why is this?	
	A	To prevent movement of the cargo	
	В	To cool the cargo	
	C	To isolate the cargo from the external air	
	D	To maintain the temperature of the cargo at a constant level	

Examination objective 7: Heating

Number	Source	e	Correct answer
332 07.0-01	3.2.3	2.2, Table C	A
		Is it advisable to heat a cargo of UN No. 2348, n-BUTYL ACRYLATE, STABILIZED during transport?	
	A	No, since this could cause polymerization	
	В	Yes, as long as no gases form in the cargo	
	C	Yes, since the substance is stabilized	
	D	Yes, since this facilitates pumping of the substance	
332 07.0-02	Tem	perature action	В
	Whe	n is it advisable to heat certain substances?	
	A	If they polymerize readily	
	В	If they have a very high viscosity	
	C	If they are self-reactive	
	D	If they decompose readily	
332 07.0-03	Tem	perature action	С
	Whe	n is it advisable to heat certain substances?	
	A	If they are thermally unstable	
	В	If they emit a lot of gas	
	C	If they could solidify during loading	
	D	If they decompose readily	
332 07.0-04	3.2.3	.2, Table C	D
	Is it a	advisable to heat UN No. 1999, TARS, LIQUID?	
	A	No, since it is highly explosive	
	В	No, since it has a very low solidification point	
	C	No, since this could result in polymerization	
	D	Yes, since it should not be allowed to solidify. The temperature during carriage should be kept above the melting point	
332 07.0-05	3.2.3	.2, Table C	D
		a cargo tank is-loaded with UN No. 1831, SULPHURIC ACID, ING _x - Ccan the heating coils in thise cargo-tank contain water?	
	A	Yes, since fuming sulphuric acid does not react with water	
	В	Yes, the heating coils can always contain water	
	C	No, during transport of a substance that does not require heating, the heating coils should never contain water	
	D	No, this is prohibited during the transport of fuming sulphuric acid	

Examination objective 7: Heating

Number	Source		Correct answer
332 07.0-06	3.2.3.2,	Table C	С
	maximu	l is carrying UN No. 2448, SULPHUR, MOLTEN. What is the mallowable temperature of the cargo during transportcarriage of 2448, SULPHUR, MOLTEN?	
	A	100 ℃	
	В	120 ℃	
	C	150 ℃	
	D	250 °C	
332 07.0-07	3.2.3.2,	Table C	С
	Where is	n ADN can information on a substance's relative density be found?	
	A	In section 3.2.1, Table A	
	В	In section 3.2.2, Table B	
	C	In section 3.2.3.2, Table C	
	D	ADN does not contain any information on the relative density of substances	
332 07.0-08	Temper	ature action	A
	The tem calculat obtained	nperature correction factor allows the loaded tonnage to be ed from the volume in m ³ . From where can the correction factor d?	
	A	The loading installation	
	В	The instructions in writing	
	C	The traffic control authority	
	D	The certificate of approval	
332 07.0-09	7.2.4.21	.2	A
	kept at t	at elevated temperature, e.g. 75 °C, is loaded. The cargo should be this temperature during transport. May the maximum degree of be exceeded in this case?	
	A	No, since space is required in the cargo tank in case the temperature should rise further	
	В	Yes, since the maximum degree of filling is prescribed for 15 $^{\circ}\text{C}$	
	C	Yes, since the temperature will fall rather than rise	
	D	No, unless the relative density of the substance is lower than the density specified in the certificate of approval	

Examination objective 7: Heating

Number	Source		Correct answer
332 07.0-10	3.2.3.2,	Table C	В
	it transp an exter	vessel is equipped with only one possibility of heating cargo. May bort UN No. 1764, DICHLOROACETIC ACID be transported at cornal temperature of 12 °C if the tank vessel is equipped with only sibility for heating cargo?	
	A	No, the vessel should be equipped with a heating installation on board	
	В	Yes, this is permitted	
	C	No, below this external temperature, the substance may not be transported in any circumstances	
	D	No, this is not permitted since the temperature of the substance should be kept at exactly 14 °C and this is not possible without a heating installation on board	
332 07.0-11	3.2.3.2,	Table C	С
		argo tank is loaded with UN No. 2796, BATTERY FLUID, ACID ₂ - e heating coils be filled with water?	
	A	Yes, if the heating coils are properly closed	
	В	Yes, the heating coils should always be filled with water	
	C	No, this is prohibited during transport of this substance	
	D	No, during unheated transport, the coils should never contain water	
332 07.0-12	3.2.3.2,	Table C	A
		argo tank is loaded with UN No. 2683, AMMONIUM SULPHIDE TON Can the heating coils be filled with water?	
	A	Yes, if the heating coils are properly closed	
	В	Yes, since the cargo should be able to be heated	
	C	No, this is prohibited during transport of this substance	
	D	No, during unheated transport the coils should never contain water	

Examination objective 1: Personal injury

Number	Source		Correct answer
333 01.0-01	First	aid	A
	What eye?		
	A	Rinse with water at length then see a doctor	
	В	See a doctor immediately	
	C	Rinse briefly	
	D	Rub with hands and then see a doctor	
333 01.0-02	First	aid	В
	What	t do you need in order to be able to provide the best first aid?	
	A	ADN certificate	
	В	Valid first-aid certificate	
	C	ADN "chemicals" certificate	
	D	Certificate of attendance at a fire-fighting course	
333 01.0-03	First	aid	D
		omeone has lost consciousness after swallowing a toxic substance ₂ , the victim be given a drink?	
	A	Yes, as this will clean out the mouth and may dilute the substance in the stomach	
	В	Yes, but it must be done very slowly	
	C	Yes, but you must get the victim to sit up	
	D	No, you must never give a drink to a victim who has lost consciousness	
333 01.0-04	First	aid	D
		following a burn, the victim's clothes are stuck to the skin ₁ - <u>Sshould</u> lothes be pulled off?	
	A	Yes, as you will then be better able to cool the skin down	
	В	Yes, as the clothes may be dirty	
	C	Yes, but you must cool the victim at the same time	
	D	No, opening up burn blisters increases the risk of infection	
333 01.0-05	First	aid	A
		is it often recommended that someone who has swallowed a toxic ance should drink water?	
	A	To dilute the contents of the stomach	
	В	To stay conscious	
	C	To induce vomiting	
	D	To rinse the mouth out	

Examination objective 1: Personal injury

Number	Source	Correct answer	
333 01.0-06	First aid Why must vomiting not be induced when the patient has swallowed certain toxic substances?		A
	A	Because the substance then returns to the oesophagus, which will cause further injury	
	В	Because the substance is not causing any damage to the stomach	
	C	Because the substance is rapidly diluted by the gastric acid and, consequently, vomiting is unnecessary	
	D	Because during vomiting the contents of the stomach may reach the bronchial tubes	
333 01.0-07	First	aid	В
	What must you never do if a A crew member has lost consciousness because of a substance. What must you never do?		
	A	Move the patient	
	В	Attempt to get the patient to swallow water	
	C	Lie on top of the patient	
	D	Try to bring the patient round with cold water	

Examination objective 2: Material damage

Number	Sourc	e	Correct answer
333 02.0-01	Measures in case of damage		A
	Where can the provisions on the "do not approach" signal be found?		
	A	In CEVNI	
	В	In ADN, part 1	
	C	In ADN, part 2	
	D	In the technical construction requirements	
333 02.0-02	Measures in case of damage		С
	conc	c gas has been released as a result of damage. How can the entration of this gas be determined so as to ascertain whether the imum permissible values in ppm have been exceeded?	
	A	With an oxygen meter	
	В	With a flammable gas detector	
	C	With a toximeter	
	D	With a Geiger counter	
333 02.0-03	Measures in case of damage		D
	During loading If a leak was is noticed in one of the loading hoses during loading. What should be done is the first thing to do?		
	A	Move all unauthorized persons to a safe distance	
	В	Inform the competent authority	
	C	Measure the concentration of gas and toxicity	
	D	Stop loading immediately	
333 02.0-04	Measures in case of damage, 1.4.1.2		A
	Who should be informed first if Aa vessel sustains serious damage. Who should be informed first?		
	A	The competent authority	
	В	The client for whom the cargo is destined	
	C	The consignor	
	D	The producer of the substance loaded	

Examination objective 2: Material damage

Number	Source	ę	Correct answer
333 02.0-05	Meas	sures in case of damage	С
	An accident occurs with the hazardous substance being transported. Who can provide further information on the substance?		
	A	The competent authority	
	В	The fire services	
	C	The consignor of the substance	
	D	The shipper	
333 02.0-06	First	aid, 7.2.3.1.6	D
	A person equipped with the statutory protective clothing and equipment has entereds a cargo tank with an oxygen content of less than 20 % by volume. The be-the supervisor done ?		
	A	Someone should e \underline{E} nter the tank as quickly as possible to rescue the person	
	В	Someone wWearing the relevant protective clothing and equipment, should go in enter the tank as quickly as possible to rescue the individual	
	C	Someone should pPrepare the rescue winch and then, wearing the relevant protective clothing, should go inenter the tank as quickly as possible to rescue the individual	
	D	Someone should f <u>F</u> irst summon the two other persons aboard and then, wearing the relevant protective clothing and equipment, should go inenter the tank to rescue the individual	

Examination objective 3: Environmental damage

Number	Source		Correct answer
333 03.0-01	Emer	gency measures in case of a leak	A
		scapes through a leak. What in particular will determine the behaviour cloud of gas?	
	A	The relative density of the gas	
	В	The conductivity of the gas	
	C	The boiling point of the gas	
	D	The maximum workplace concentration of the gas	
333 03.0-02	Emer	gency measures in case of a leak	D
	What	will not determine the speed of evaporation of a liquid that escapes?	
	A	The size of the surface of the liquid	
	В	The temperature of the liquid	
	C	The speed at which the vapour is carried off by the wind	
	D	The maximum workplace concentration of the gas	
333 03.0-03	Emergency measures in case of a leak		С
		e the loading hose is being connected, a corrosive liquid runs out of the onto the deck. What should be done first?	
	A	The liquid should be removed by copiously flushing with water	
	В	The liquid should be removed by copiously flushing with water and the competent authority informed so that further measures can be taken	
	C	It should be attempted to confine the liquid and absorb it with the equipment designed for that purpose	
	D	The liquid should be removed by flushing and the deck cleaned with soap	
333 03.0-04	Basic	general knowledge	D
	Where should drums containing residue (slops) be emptied?		
	A	At a lock, in a tank provided for the purpose	
	В	At a refuelling firm	
	C	At an appropriate loading berth	
	D	At a firm certified by the competent authority	
333 03.0-05	Basic general knowledge		A
	Where should used measurement test tubes be put?		
	A	In a container for chemical waste	
	В	In the dustbin	
	C	Back to the supplier of the test tubes only	
	D	They should be kept in order to prove that the measurements have been taken if the authorities carry out an inspection	

Examination objective 4: Damage-control plans

Number	Source		Correct answer
333 04.0-01	Damage-control and alert plans		D
	When must a damage-control and alert plan be drawn up?		
	A	It is advisable to do this immediately after a disaster	
	В	At the moment the disaster occurs, so as to know what to do in that situation	
	C	Immediately before a disaster is expected, so as to be well prepared for the situation	
	D	It is advisable to have a damage-control and alert plan available so as to be always prepared for disasters	
333 04.0-02	Dama	ge-control and alert plans	A
	What	is not normally included in a damage-control and alert plan?	
	A	The substance being transported	
	В	The need to inform the competent authority	
	C	The possibility that it may be necessary to activate the "do not approach" signal	
	D	The need to keep unauthorized persons away	
333 04.0-03	Damage-control and alert plans		С
	What is not normally included in a damage-control and alert plan?		
	A	The need to keep personal protective equipment on hand ready for use	
	В	The need to have fire-fighting equipment available	
	C	The name of the product to be transported	
	D	The need to inform the competent authority	
333 04.0-04	Damage-control and alert plans		D
	What is it no longer obligatory to do if a vessel is involved in a serious collision?		
	A	Inform the competent authority	
	В	If necessary activate the "do not approach" signal	
	C	If necessary close all openings	
	D	Draw up a damage-control and alert plan	

Examination objective 4: Damage-control plans

Number	Source	e	Correct answer
333 04.0-05	Basic general knowledge, Damage-control and alert plans		С
	What should be done first after a collision that has caused leakage of hazardous substances?		
	A	Inform the competent authority	
	В	Alert other vessels in the area by radio	
	C	Activate the "do not approach" signal	
	D	Anchor the vessel in order to assess the damage	
333 04.0-06	Dama	age-control and alert plans, 7.2.3.1.3, 7.2.3.1.6	В
	What should be done first when a leak is suspected in a wing tank and needs to be inspected?		
	A	The vessel should be immobilized and the tank entered for inspection	
	В	The vessel should be immobilized, measurements taken, the appropriate steps taken in the light of those measurements and the tank entered for inspection	
	C	The vessel should be immobilized, the competent authorities informed and waited for	
	D	The vessel should be immobilized, the competent authority informed, measurements taken, the appropriate steps taken in the light of those measurements and the tank entered for inspection
