Electronic database DETA

- DETA:
- certificates
 - information documents
 - test reports and others
 - **summary documents**

NEW

With the UI, presently required information on the product may no longer be present, but is available in DETA to users with access rights only.

Persons without DETA access will get this information via a new “summary document” made available by a public web portal. (The approval number and some attributes are also available by the public web portal without a summary document).

To which UN Regulations does the UI marking apply? - Guidance by GRs requested!

1958 Agreement Revision 3 Schedule 5 “... *the approval markings required by UN Regulations may be replaced by a Unique Identifier (UI) preceded by the symbol UI, unless specified otherwise in the UN Regulations.*”

The UI feature is being developed. The GRs are requested to provide clarity on UI markings to support a uniform implementation across the UN Regulations and the Contracting Parties.

Therefore, as agreed at the 188th session of WP.29, the GRs are invited to review the list of regulations under their purview. This list, once finalized and approved, could provide an overview to all stakeholders, when UI markings can be used.

See **informal document GRVA-15-11**.

Assessment of UN Regulations under the purview of GRxx with regards to UI

<i>UN Regulations under the purview of <u>GRxx</u></i>	<i>Use of UI prohibited</i>	<i>Use of UI possible</i>			<i>Remarks</i>
		<i>Is there additional information required in the approval mark¹ (Yes/No)</i>	<i>Summary document necessary (Yes/No)</i>	<i>Physical marking must remain on the product (Yes/No)</i>
