

# Report of the workshop on UN R155 implementation

# Meeting history

(After the 14th session of GRVA)

- 12th session (web), 8th November 2022
- 13th session (Hybrid), 12th-13th January 2023

# Outcome

- Finalizing "Question and Answer(Comment)" table
  - > Document number: GRVA-15-28e
- Modification of texts of the proposed amendment regarding "recognition of foreign CoC"

# Modification of texts of the proposed amendment (Doc. ECE/TRANS/GRVA/2023/5)

- The workshop has discussed multiple CSMSs for joint projects on a vehicle type.
- The cases include that type approval authority may recognize foreign CoC.
- The workshop came a consensus that the interpretation document could mention "recognition of foreign CoC" by agreement/arrangement between the relevant countries.
- This will help type approval authorities who may be facing such situations.

Reference: GRVA-13-16e

GRVA-14-46e("Acceptance of foreign certificates (for CSMS/SUMS) for the type approval")

# Modification of texts of the proposed amendment (Doc. ECE/TRANS/GRVA/2023/5)

- The concept of "recognition of foreign CoC" was proposed to amend the interpretation document of UN R155 by the expert of France.(Doc. ECE/TRANS/WP.29/GRVA/2023/5)
- The workshop reviewed to elaborate the proposal and proposed as follows including the texts in red. (Doc. GRVA-15-21e)

**"Prior to issuing a type approval, when assessing a manufacturer, the Approval Authority may make arrangements with the Approval Authority of another contracting party to accept their Certificate of Compliance for Cyber Security Management System (without suitable arrangements between the Authorities, the requirements of UN Regulation No. 155 may be considered not to be met). The Approval Authority issuing the resulting type approval remains responsible for the whole scope of the relevant CSMS."**

# Future work

The group has received requests including following subjects associated through experiences/practices of each country on R155/R156 type approval.

## Potential subjects:

- Conditions for arrangements on recognizing foreign CoC
- Reference to R155 in other Regulations: what is expected from manufacturers?
- Potential for integration of wider category vehicles in the scope of R155: what is expected from manufacturers?
- Software updates after registration

# Future work

- As the consensus, the group recognized the needs to continue the workshop for further discussions/information sharing on these potential subjects.
- Firstly, the workshop will discuss what specific points regarding these subjects should be discussed in the workshop.
- The group also understands that this continuation should be approved by the guidance of GRVA.
