Subject: Detailed analysis

Dear Compliance Committee to the Aarhus Convention,

Dear Secretary,

Please find attached Hungary's detailed explanation of why Hungary considers itself as *in full compliance* with the Convention on the alleged point, as failing to comply with *article 7, final sentence, in conjunction with article 5 (7) (a) of the Convention*. This explanation may not reached the distinguished Committee during this summer due to a possible administrative gap in our side.

We are providing the detailed analysis of Decision *VII/8h* to maintain a clear picture of the nature of the Parliamentary Resolution 40/2008 on Hungary's energy policy for 2008-2020 as well as of the procedural steps taken prior to the adoption of it. We are kindly asking the distinguished Committee to accept this detailed explanation, which serves the basis of the fact, and reasoning that why Hungary did not prepare an Action Plan by the deadline set for the summer 2022. As we previously indicated, Hungary's environmental portfolio was strengthened during these days and we are ready to continue the work with the Compliance Committee in a more effective way.

Thank you for your kind understanding.

Yours sincerely,

Cintia Nagy
