

CRITICAL RAW MATERIALS IN VULNERABLE GEOGRAPHIES: IMPACT ON WOMEN

Online, 23 March 2023 14:00 – 15:00, English Only Organized by the EGRM Women in Resource Management Working Group, co-chaired by Cristina Marras and Maria A. Capello

KOMBADA MHOPJENI

ALEJANDRA W. WOODS

DR. JESSICA SMITH

ALFREDO ALVAREZ LAPARTE

National Program Officer, UNESCO Namibia Director, COLDELCO Corporación Nacional del Cobre de Chile, Chile Professor, Engineering, Design, Colorado School of Mines, USA Energy and Digital Solutions Leader, EY Mexico (Moderator)

The transition to lower carbon energy sources will push the demand for critical raw materials at an unprecedented pace. The shift to a cleaner energy system is set to drive a huge increase in the requirements for Lithium, Nickel, Cobalt, Rare earth elements as well as Copper and Aluminum.

The International Energy Agency sustains that "a scenario that meets the goals of the Paris Agreement, would mean a quadrupling of mineral requirements for clean energy technologies by 2040". As countries increase their efforts in reducing emissions, others will proportionally maintain the effects of the increased requirements for critical raw materials. Within these accelerated energy dynamics, it is important to care for the communities and society segments that are impacted the most.

This webinar will be centred on the challenges, frameworks, and opportunities for women in countries and regions that are vulnerable. The speakers will share their insights about women's participation in the access, development, and management of critical raw materials. We need all hands on deck, for a just transition that provides opportunities for all.
