

UN
2023 WATER
CONFERENCE

NEW YORK
22-24
MARCH
2023

**New momentum to make safe water and sanitation a reality for all:
How to scale up globally practical tools and know-how gained under
the Protocol on Water and Health?**

22 March, 14.00-15.15, room 9, UN HQ

Co-organized by Hungary, Germany, Portugal, Women for Water Partnership, United Nations Economic Commission for Europe, World Health Organization Regional Office for Europe

Background and objectives

The world needs accelerated action and practical solutions and tools to achieve the ambitions of the 2030 Agenda and make universal access to clean water and safe sanitation a reality for all. We need to build on successes and scale up, building on workable tools to close the persisting gaps.

The event aims at presenting the practical tools developed under the Protocol on Water and Health available to governments, local authorities and communities that had proven effective in supporting progress towards reaching SDG 6 and building safe and climate-resilient water, sanitation and hygiene (WASH) services fit for the future.

Provisional programme

Moderators
