EU Affairs, Ørsted

JODI-ANN WANG
Senior Climate Policy
Analyst,
UN Principles for
Responsible Investment

YUHAN ZHENG
Youth Delegate,
International
Renewable Energy
Association

The session will focus on the importance of intergenerational equity in resource management to ensure a just, green and digital transition. The Youth are critical stakeholders for effective sustainable resource management and meeting the needs of future generations in terms of economic growth, social development, and environmental protection.

As a dynamic and innovative sub-group of the Expert Group on Resource Management, the Resource Management Young Member Group (RMYMG) strives to harness the diverse perspectives and skills of the youth to drive the urgent green and digital transition in a just and equitable manner.

The session will discuss how RMYMG can cooperate to channel its engagement in resource management, provide youth policy advocacy, support the work on capacity-building and competency, serve as an educational platform, and bring innovation into resource management discussions, with a focus on climate change effects, raw material security, and environmental, social, and governance. The session will showcase concrete actions that RMYMG can and should take to reduce sustainability threats and enhance resilience with sustainable resource management, while giving a youth perspective on the United Nations Framework Classification for Resources (UNFC).

Registration is free and
includes access to UNECE
