SDGs | What are the child-related SDG indicators?

- Indicators with important implications for children but not directly targeting children
- Composite indicators that contain child-specific measures but are not limited to children
- Population-based indicators that require either a sub-indicator or age disaggregation, including for children
- Indicators that specifically focus on children or even a narrower age group

SDGs | Focus on 16 UNICEF (co)custodianship indicators

- 1.b.1 Pro-poor public social spending

Discussion and recommendations

Prioritising children in the selection of SDG indicators

Child-focused/sensitive data collection

Disaggregation

Prioritizing children | CES Guidance on Statistics on Children

- Proposed by UNICEF, UNFPA, UNECE and Eurostat
- Task Force established in February 2020
- Guidance adopted by CES in Jun 2022

Focus on children

- with disabilities
- experiencing violence
- in alternative care

Focus on children | CES Guidance on Statistics on Children

At the international level

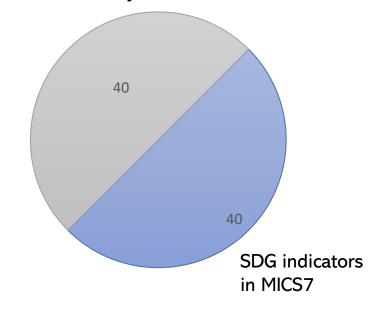

- support for the development of child-focused statistical infrastructure
- develop clear and harmonized statistical definitions
- promote a structured collaboration between international organizations (UNICEF, OECD and Eurostat) producing statistics on children

At the national level

- countries elaborate national indicators plans and invest in the production and dissemination of internationally comparable data on children
- NSOs consider designating a national focal point for child and youth statistics
- countries include children related data in regular data collection processes, including through child-focused survey
