Mentimeter

We have to educate our clients better.

Improve quality of data

Creation of data according to national standards

Acceleration of terms and reduction of prices for public services

More collaborative governance structures
More interoperability and integration of systems
Interdisciplinary trainings

Legal framework to be digital enabled, land and property in the center of the system not rights, call for institutional straightening on national and interational level

Education of public servants

Clear distinction between Open data and data Protection

Fully digital/coordinate-based cadastre and land registration.
