Belize

Brief Intro

Geography

Belize is located in Central America, and it is bordered to the north by Mexico, to the south and west by Guatemala and to the east by the Caribbean Sea. The size of the territory totals 8,867 square miles, including 266 square miles of island.

Belize is also known for its extreme biodiversity and distinctive ecosystems. On the coast, there is a swampy coastal plain with mangrove swamps. In the south and interior there are hills and low mountains. Most of our land is undeveloped and is forested with hardwoods. It is a part of the Mesoamerican biodiversity hotspot and it has many jungles, wildlife reserves, a large variety of different species of flora and fauna and the largest cave system in Central America. Some species of Belize's flora and fauna include the black orchid, the mahogany tree, the toucan and the tapir.

Belize

Brief Intro

History

The first people to develop Belize were the Maya around 1500 B.C.E. As shown in archeological records, they established a number of advanced settlements within the country. These include Caracol, Xunantunich, Lamanai, Lubaantun, and many others. The first European contact with Belize occurred in 1502 when Christopher Columbus reached the area's coast. In 1638, the first European settlement was established by England and for 150 years, many more English settlements were set up.

In 1840, Belize became a "Colony of British Honduras" and in 1862, it became a crown colony. For one hundred years after becoming a crown colony, Belize was a representative government of England, however in January 1964, full self-government with a ministerial system was granted. In 1973, the nation's name was changed from British Honduras to Belize and on September 21, 1981, full independence was achieved.

Belize Brief Intro

People

We are truly a melting pot of colorful personalities, making our more than 400,000 residents the country's greatest resource for tourism. The Belizean people are made up of Maya, Mestizo, Kriol, Garifuna, East Indian, Mennonite, Arab and Chinese.

A blending of cultures has resulted in one of the happiest and most peaceful countries in the region

Language English is the official language of Belize; we are blessed with a rich cultural diversity. Throughout the country you will meet and greet people that speak :

- Spanish
- Belizean Kriol
- Garifuna (African-based)
- Maya-Kekchi, Maya Mopan
- Mandarin,
- Low German
- Hindi
- Etc..

About the SIB

The Statistical Institute of Belize is an autonomous body created to collect, compile, extract, analyze and disseminate official statistics for the country of Belize, regarding the:

- Demography
- Social
- Environment
- Economy

The SIB is established under the Laws of Belize, under the SIB Act, No. 9 of 2006.

Mission Statement:

“To provide with the highest degree of integrity, quality and with strict adherence to professional and international standards, accurate, reliable and timely statistical information to facilitate effective policy and decision-making for local and international clients.”

Vision Statement:

“The Statistical Institute of Belize shall be recognized as the leading national statistical agency, operating with professionalism and transparency in providing accurate and timely information that contributes to the development of Belize.”

Mission Statement:

“To provide with the highest degree of integrity, quality and with strict adherence to professional and international standards, accurate, reliable and timely statistical information to facilitate effective policy and decision-making for local and international clients.”

Vision Statement:

“The Statistical Institute of Belize shall be recognized as the leading national statistical agency, operating with professionalism and transparency in providing accurate and timely information that contributes to the development of Belize.”

Consumer Price Index Belize

About the SIB CPI Belize

- Historically the SIB/CSO produced Quarterly CPI prior to 2011
 - Fixed basket approach, Regional (urban only)
- From 2011 onward the SIB produces monthly CPI.
 - Fixed basket approach
 - Expanded Regions (urban only)
 - Since October 2020, expanded coverage (some rural)
- Constraints & Limitations for the CPI
 - Manpower
 - Only 1 FT employee for the entire CPI
 - Limited exposure to theoretical training
 - Financial Allocation (Budget)
 - High turnover rate of temporary workers

CPISYS

Built By CSO 1999, VisualFoxPro

- Produced Forms for data collection (one letter size form per product)
- Program for data entry
- database management and processing in Mysql, Access and Excel

PIPS

Built by IMF, VisualBasic

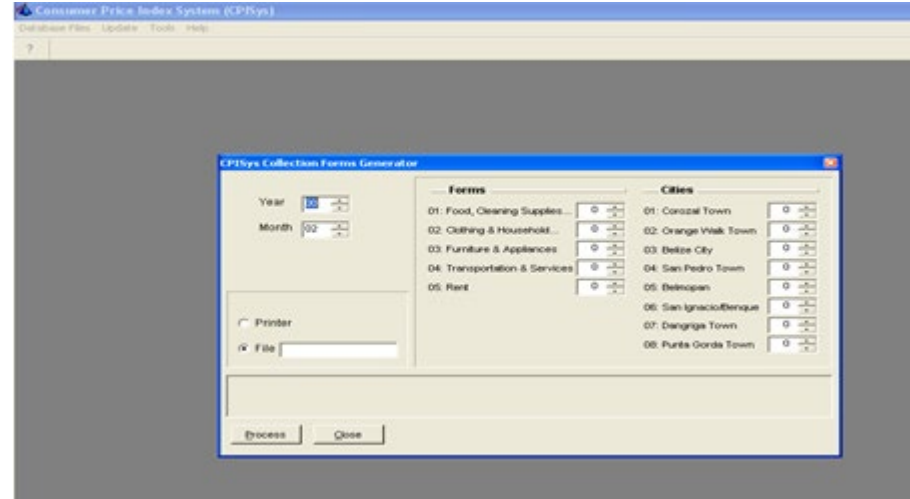

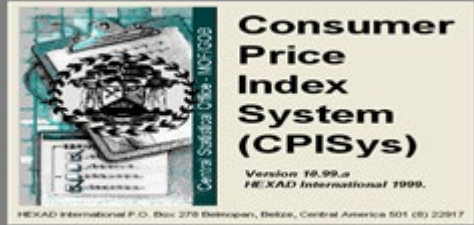

- Generates excel sheets for data collection
 - Sheets printed for collection
 - Data entry through macro excel sheet
 - Database management in Access

Improvements

SIB, automation for data collection using PIPS

- Google Sheets – distribution via google drive, data collection using google sheets, Tablets
- CPI App v1.0- Android application for data collection, retrieve and export excel sheet using email account

About the Project:

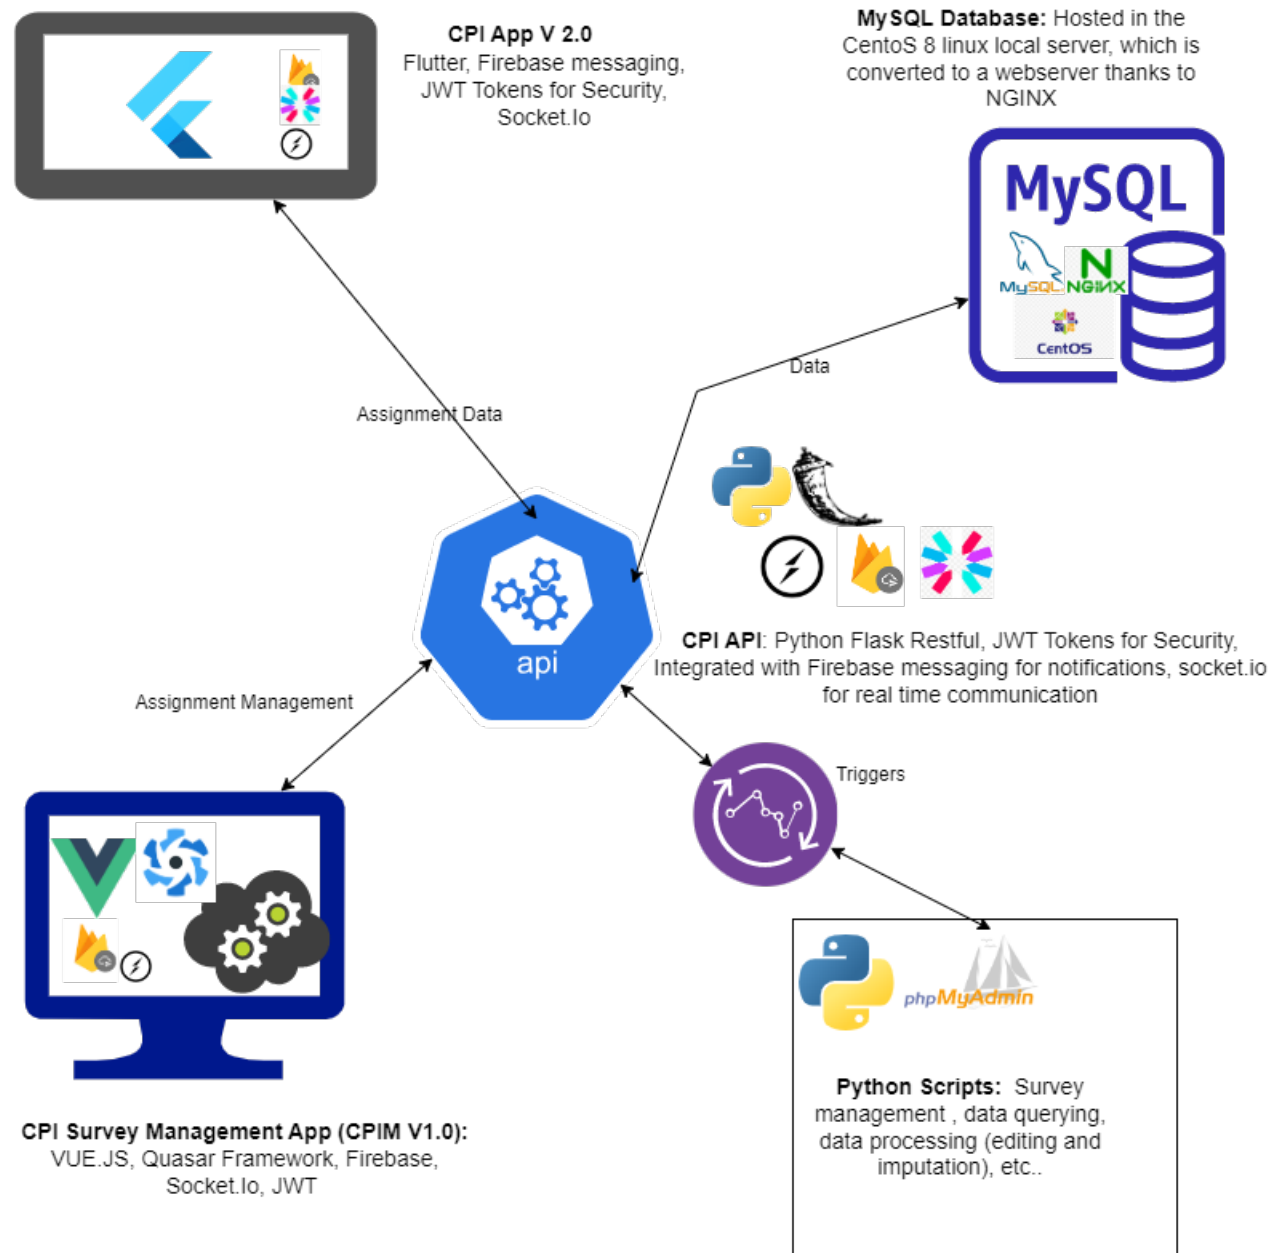

- Specialized tools for CPI production are expensive and hard to find, especially for developing countries like Belize.
- ICT is essential for optimizing production
 - reducing personnel
 - time requirements
 - improving data quality
- Donor software lack ongoing maintenance and development.
- The new system integrates all processes involved
 - data collection
 - survey administration
 - data processing
 - index construction
- Open-source technologies key for tool's sustainability and shareability

- About the Project:
- Project duration: (8 – 12 months)
 - Phase 1 (July 2022 – January 2023)
 - Phase 2 (ongoing)
- Core Developer Team:
 - Jefte Ochaeta- Project Lead, Statistician I, National Accounts Unit, Economic Statistics Department, Statistical Institute of Belize
 - Steven Palma- Software Developer, IT Department, Statistical Institute of Belize
 - Melvin Perez- Statistician II, Price Statistics Unit, Economic Statistics Department, Statistical Institute of Belize

New CPI System Introduction

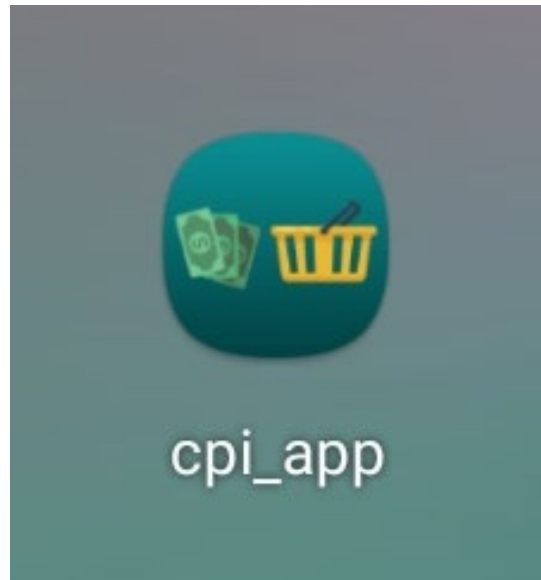

Integrated Survey Management System:

- Data Collector App (CPI App v 2.0)
- CPI Survey Management App (CPIM V1.0)

Data collector App (CPI App v2.0)

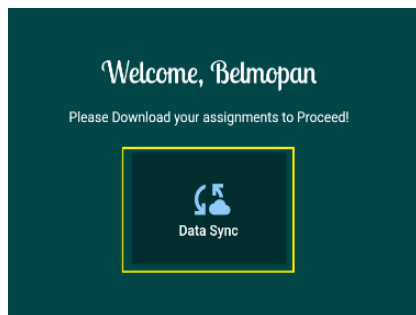

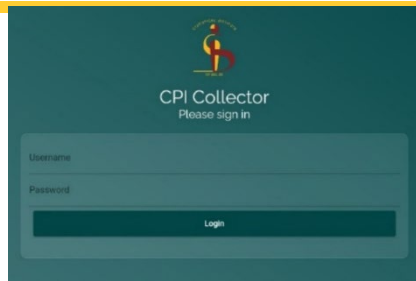

Overview

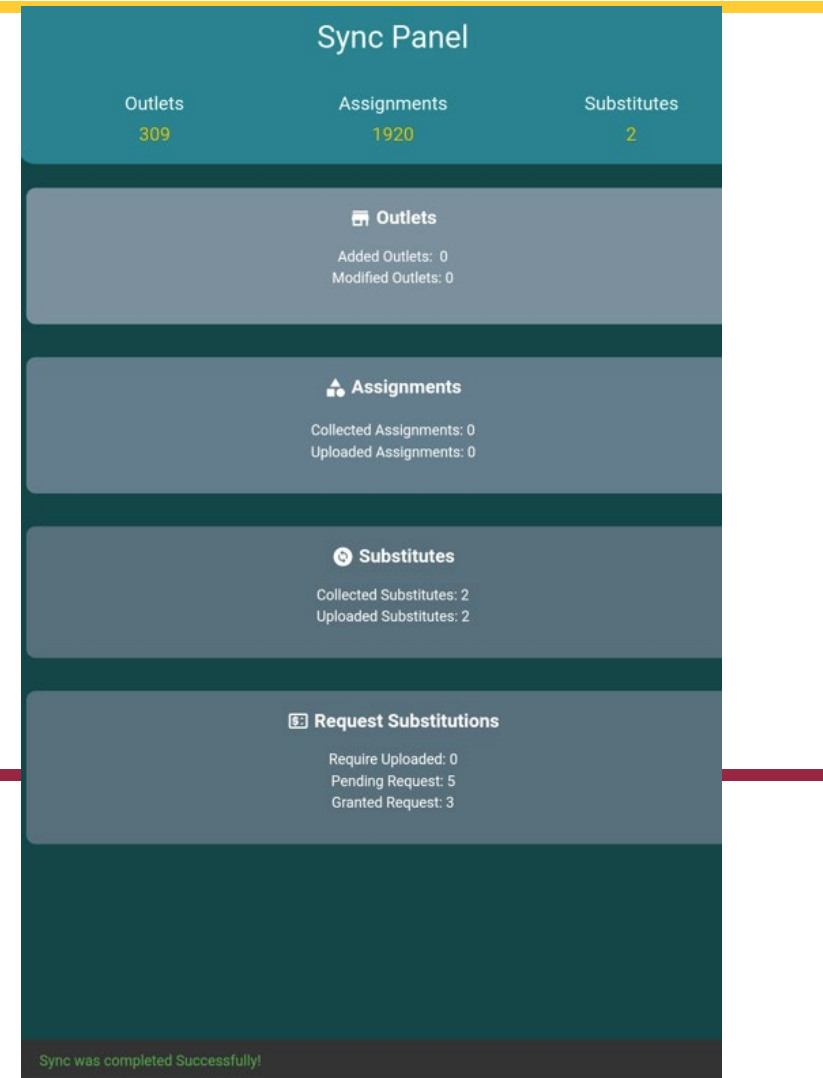

- **Self-contained:** No need to download any extra files or apps.
- **User-friendly:** The simplicity in the design makes it easy to use.
- **Quality Assurance:** validation on prices, location of price collection. Validation for product replacements. Realtime data communication two-way survey management process.
- **Data Encryption:** local stored on device db

The CPI Survey management system

Data Processing

- Initializing Working Prices
 - Copy of approved prices

The screenshot displays the 'CPI Management' dashboard for user 'MELVIN PEREZ'. The left sidebar contains navigation options: Home (Dashboard), Users, Collection (All Field Collection), Automated Collection (Sync and get automated assignments), Quality Assurance (Quality assurance assignment management), Outlets (Manage Outlets), Varieties (Manage Varieties), Assignments (Manage Assignments), Price Process (Working Price Generation), and Export Data (csv data export). The main content area is titled 'Data Processing' and lists four processes, each with a play button icon:

- Initialize Working Prices** *Last Processing: 2023-02-23 09:21:38 by Melvin*
At the end of each time period this process creates a copy of the current time period prices. Every time this process is executed the time period records are recreated.
- Outlier Detection** *Last Processing: 2023-02-23 09:22:35 by Melvin*
Once we have generated the working prices we can now start with looking for prices that do not look correct by performing outlier detections on the working prices. This will allow the correction and approval of the prices for final processing
- Substitution Back history** *Last Processing: 2023-02-23 09:26:32 by Melvin*
After the prices have been initialized for the current time period, substitutions require historical prices to be created for the previous time periods. This process requires the first process (Initialize Working prices) to be executed.
- Generate Imputations** *Last Processing: 2023-02-27 13:28:14 by Melvin*
This step requires outlier detection to be done before generating imputations. Please make sure that all outliers have been resolved before executing this step.

At the bottom of the main content area, there is a dark blue bar with a play button icon and the text 'Current Working Prices'.
