Next Steps:
The project deliverables are: 1: Webinar to invite experts for brainstorming; 2: White Paper on digitization transit accompanying documents; 3: Webinar to present findings

Agriculture Fisheries & AgriFoods Domain

PROJECT: **Critical Minerals Traceability and Sustainability (CRM)**

Supporting VC's: (AGRI & ISC/BSP) @Ian Watt
Domain Coordinator: (AGRI) @Erik Bosker @ Gaelle Cheruy Pottiau
Project Lead: @Nancy Morris

Project Purpose:
In line with the UN sustainability goals and building on the success of the Textile & Leather traceability project, this project proposal seeks to develop a traceability and sustainability framework for critical raw materials (CRM[1]).
This project supports the UN focus on extractive industries and builds on the UN/CEFACT role & capabilities to deliver digital standards for sustainable supply chains.

Project status: (Launch: 2023-04-14; Completion 2024-04-14; Publication (Plenary) 2024-11-30
White Paper completed including 60 day public review period

Next Steps: Deliverable 1: Policy Recommendation | Deliverable 2: Business Requirement Specification | Deliverable 3: Guidelines | Deliverable 4: Executive Guide | Deliverable 5: JSON-LD vocabulary | Deliverable 6: Credential Schema | Deliverable 7: Other (specify) Test harness

Trade Procedures Facilitation

PROJECT: **Recommendation on Encouraging Private Sector Participation in National Trade Facilitation Bodies (NTFB)**

Supporting VC's: (TPF) @Estelle Igwe (AGRI & ISC/BSP) @Ian Watt

Domain Coordinator: (TPF) @Jake Schostag @Birgit Viohl

(AGRI) @Erik Bosker @ Gaelle Cheruy Pottiau

Project Lead: @Jake Schostag

Project Purpose:
A defining factor for successful trade facilitation initiatives is to bring in the private sector as stakeholder, and partner. The purpose of a NTFB is precisely to ensure public-private partnership in trade facilitation. Over the past years' governments worldwide have invested   into establishing NTFB.

Project status: (Launch: 2022-04-28; Completion 2023-07-14; Publication (Plenary) 2023-11-30 Recommendation completed including 60 day public review period

Next Steps
Complete the draft recommendation during the forum, public review, completion by Mid July 2023 and submission to Plenary for final approval 2023/11/30

Travel & Tourism Domain

UNECE
UN / CEFACT

PROJECT: **Business Standards for Sustainable Tourism**

Supporting VC's: (T&T) @Ian Watt

Domain Coordinator: (T&T) @Sachin Mehta

Project Lead: @Tunghua TAI

Project Purpose:
Several of the UN SDG's have their application in the tourism industry. Tourism, both globally and regionally can have severe negative impacts on local communities, natural resources, climate and economies. The same applies to accommodation services (Lodgings) etc. The aim of the project is to clearly define sustainable tourism, as well as to set parameters for what can and what should not be considered sustainable tourism

Project status: (Launch: 2019-04-01; Completion 2023-05-31; Publication (Plenary) 2023-06-15

Next Steps:
The project deliverables are: 1: White Paper containing definitions, standards, guidelines for sustainable tourism

Travel & Tourism Domain

PROJECT: **Travel Agency and DMC&DMO "Package Tour Project**

Supporting VC's: (T&T) @Ian Watt

Domain Coordinator: (T&T) @Sachin Mehta

Project Lead: @Tunghua TAI

Project Purpose:
The project enables replacing the current emails and spreadsheets used to exchange tour package data between Travel Agencies (mostly SME's) and Destination Managing Company (DMC) and Destination Managing Organization (DMO) with harmonized data and comments. (Ref red arrows in the diagram below). This will deliver additional semantic data definition into the CCL, RDM establishing the ability to write standardized APIs.

Project status: (Launch: 2023-05-08; Completion 2024-09-30; Publication (Plenary) 2024-11-30

Next Steps: The project deliverables are:
1: A Reference Data Models (RDM) of and APIs specifications to cover the travel agency, Destination Managing Company (DMC) and Destination Managing Organization (DMO).
2: The other related Reference Data Models (RDM) and API specifications developed and information involved

Travel & Tourism Domain

PROJECT: **API Transformation of EPs Technical Artefacts with Sustainability Claims**

Supporting VC's: (T&T) @Ian Watt

Domain Coordinator: (T&T) @Sachin Mehta

Project Lead: @Sachin Mehta

Project Purpose:
Experience Programs Technical Artefacts Project (P1082) was completed in October in 2022, and some members in the tourism industry expect to have the artefacts transformed into API formats based on the newly constructed technical specifications of UNCEFACT to trade Experience Programs (EPs) much lighter and easier for the use of smart phones. Therefore, this project is proposed to make API applicable to the use of the trade of EPs, which will support the facilitation of their trade.

Project status: (Launch: 2023-05-08; Completion 2024-04-30; Publication (Plenary) 2024-05-31

Next Steps: The project deliverables are:
1: API Version of EPs Technical Artefacts
2: Technical Artefacts for Sustainability Claim and related classes to be developed
3: The other related BIEs and codes developed and updated

PROJECT: **Cross Industry Invoice Light Version (CII Light)**

Supporting VC's: (BP&P) @Ian Watt

Domain Coordinator: (BP&P) @Edmund Gray

Project Lead: @Sue Probert

Project Purpose:
This project aims to develop a subset of the CII that will be functional for the majority of operations and compatibility with regulatory requirements in a majority of countries.

Project status: Project variation required (Launch: 2021-11-09; Completion 2023-05-31; Publication (Plenary) 2023-06-16

Next Steps: The project deliverables are:
1: Technical artifacts of a CII Light
2: Training material on the implementation of the CII

PROJECT: **Transfer of MLETR-compliant titles**

Supporting VC's: (BP&P) @Ian Watt (eDATA) @Tahseen Ahmad Khan

Domain Coordinator: (BP&P) @Edmund Gray

Project Lead: @Ren Yuh Kay

Project Purpose:
This project aims to develop a subset of the CII that will be functional for the majority of operations and compatibility with regulatory requirements in a majority of countries.

Project status: (Launch: 2019-11-01; Completion 2023-05-31; Publication (Plenary) 2023-07-31

Next Steps: The project deliverables are:
1: White Paper on the dematerialization of Transfer of Negotiable Titles (Based on UBCITRAL's MLETR)
2: Reference implementation that demonstrates transfers of MLETR-compliant title records
3: Annex on accreditation framework (if determined required by the above deliverables)

Recent projects:

White paper on Open finance to support trade facilitation

Publication date: June 2022

Download available at: Guidance material / UNECE

This white paper investigates the economic paradigms of open banking and open finance in order to understand how they can back trade worldwide.

It provides an overview of open banking in the European Union and in seven countries. In addition to defining fintech and open finance, the paper describes open finance use cases for trade facilitation and suggests ways forward for policy and decision-makers.

Upcoming projects:

Programme of work 2023 – 2025

Develop an ebusiness specification based on a use case of the open finance scenario

Join the Finance & Payment Domain meeting
Thursday 11 May – starting 11.00 AM

Accounting & Audit domain

UNECE UN / CEFACT

Ongoing projects:

- **Accounting & Audit Reference Data Model**

The project will develop a high-level semantic Reference Data Model in the area of Accounting and Audit under the UN/CEFACT principle of semantic hub of its Prospective Directions document of 2016. Work in this area has been developed within UN/CEFACT since the 1990s with a number of UN/EDIFACT messages and more recently UN/CEFACT BRS each with its XML schema. Work has also been undertaken in the XBRL Global Ledger Taxonomy Framework (XBRL GL) and the OECD (SAF-T and SAF-P). The project will look at the completed work in all of these areas and map it into an initial Reference Data Model with common specifications considered by tax administrations, financial and tax auditors and enterprises for audit data representation purposes.

This UN/CEFACT approved project will deliver a high-level Business Requirements Specification, a Reference Data Model and eventually a mapping to XBRL GL and OECD SAF-T & SAF-P. Currently the domain is reviewing a sample mapping between Core Components Library (CCL), XBRL-GL and SAF-T using value added tax as test data. A proof of concept of this sample mapping will be used to develop the project deliverables, including a Business Requirements Specification (BRS) document.

Accounting & Audit domain

UNECE
