Compilation of statistics on violence against women and girls: key indicators, sources of official data

National Statistical Committee of the Kyrgyz Republic

Domestic Violence Statistics

According to the Law, **Domestic violence** – it is a deliberate act of a physical, psychological, economic nature or its threat, as well as a neglectful attitude committed by one family member against another family member. The law defines the following forms of domestic violence :

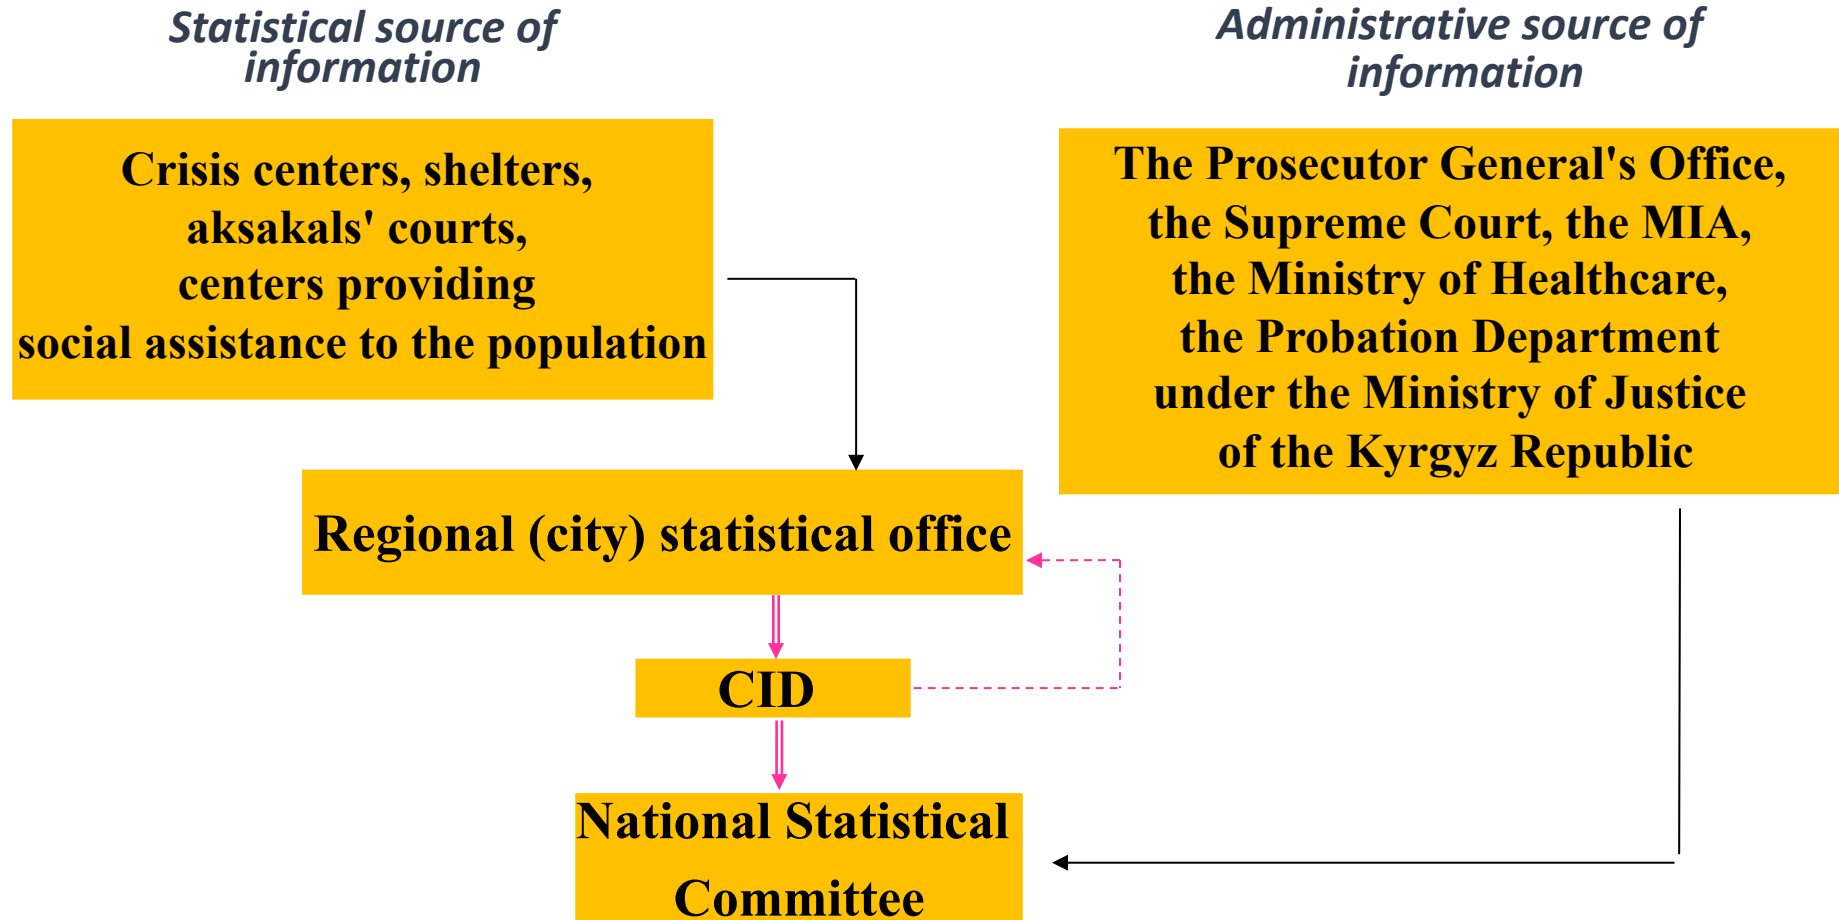

- Physical violence;
- Economic violence;
- Psychological violence;
- Disparagement attitude.

Statistical reporting on domestic violence includes:

- gender-disaggregated indicators reflecting the number of registered cases of domestic violence by type and taken measures,
- socio-demographic data on family members who have committed or suffered from domestic violence
