

Methodological information on indicator 3b1 Night work:

	Information on breaks in time series	Information on definition
Germany	2021: break in time series due to new LFS-regulation	night work: 11pm to 6am
Israel	Start of time series: 2018	
Poland	2021: break in time series due to new LFS-regulation	night work: 9pm to 7am Employed persons usually working at night. Usually means that the respondent during the 4 weeks preceding the survey did work at night for at least half of the days worked during this period.
Austria	2021: break in time series due to new LFS-regulation	night work: 10pm to 5am
Switzerland	In 2021, the SLFS survey changed from being a survey conducted purely by telephone to a multi-mode survey (via internet and telephone) with priority given to the internet survey. In addition, the 2021 questionnaire was modified to comply with the new Eurostat regulations, also in force from January 2021. For certain results, these changes have led to a break in the series between 2020 and 2021. The part of employed persons regularly working nights is not comparable with the previous years.	Night work: midnight to 6am. Apprentices are excluded.
Italy	2021: break in time series due to regulation (EU) 2019/1700 of the European Parliament and of the Council. Comparable data for the new series starts from 2018.	
Finland	2021: Due to methodological changes, there is a break in time series and the figures of 2021 should not be compared with the previous ones.
