National program projects  
"Re-build clean and safe  
environment" -  
a total of 76 projects

## SURFACE WATER

8.1.1. Reduction of pollution by organic substances

8.1.2. Reduction of pollution by biogenic substances

8.1.3. Reduction of pollution by hazardous substances

8.1.4. Improvement / restoration of the hydrological regime and morphological indicators of rivers

8.1.5. Infrastructure projects and reducing their impact

## GROUNDWATER

8.2.1. Reducing pollution

8.2.2. Prevention of depletion

8.2.3. Infrastructure projects and reducing their impact

## OTHER

8.3.1. Climate change (low water, droughts, floods)

Technical audit and inventory of sources of land and water pollution. Land clearing. Reflection of water protection measures in RBMPs

Development of innovative methods and approaches for the restoration of polluted areas

Restoration of wildlife in Ukraine

Informing about the importance of observing the regimes of coastal protection strips and water protection zones

Restoration and adjustment of hydrotechnical objects and structures

Eco-modernization of industrial enterprises

Recovery, modernisation and optimisation of the survey network and receipt of information on hazardous geological processes and ground waters

Upgrade and creation of new survey stations, upgrade of laboratories of the state environmental monitoring system

Planning and rebuilding infrastructure adapted to the effects of the climate change
