TFTEI Guidance Documents in work plan 2022-2023

Premise

As in the Annex to the Report of the Executive Body on its forty-first session, in addendum, “2022–2023 workplan for the implementation of the Convention”, TFTEI had the task to develop the following two Guidance Documents, as official documents for WGSR 61st session:

- 1) *Draft Guidance document on technical measures for reduction of methane emissions from landfill, the natural gas grid and biogas facilities.*
- 2) *Draft guidance document on technical measures for reduction of emissions from shipping.*

TFTEI Guidance Documents in work plan 2022-2023

Genesis

The work started from the existing informal documents developed by TFTEI for WGSR 58th session, in 2020, updated with the most recent available information :

Main Authors (Members of the TFTEI Techno-scientific board):

Simon GLÖSER-CHAHOU (University of Freiberg, Germany), Document on methane

Grégoire BONGRAND (Citepa, France)
Document on Shipping

TFTEI Guidance Documents

Adopted criteria for development:

- include the most advanced and up-to-date information and data, available in literature, in the most possible objective manner.
- report technologies both for air pollutants and GHG, to duly consider synergies and counter effects.
- Synthesize, as much as possible, still in respect of the completeness of the information, to fulfil the editorial rules (i.e. 10,000 words limit).
- Make extensive use of relevant references.
- In the revised versions, made available to this WGSR session as informal documents, all the comments received have been taken in due consideration, modifying the text to the extent possible.
