

# The Digital Product Passport (DPP) as a tool to promote sustainability, circularity, and legal compliance

*Michele Galatola (DG GROW)*

*Ilias Iakovidis (DG CNECT)*

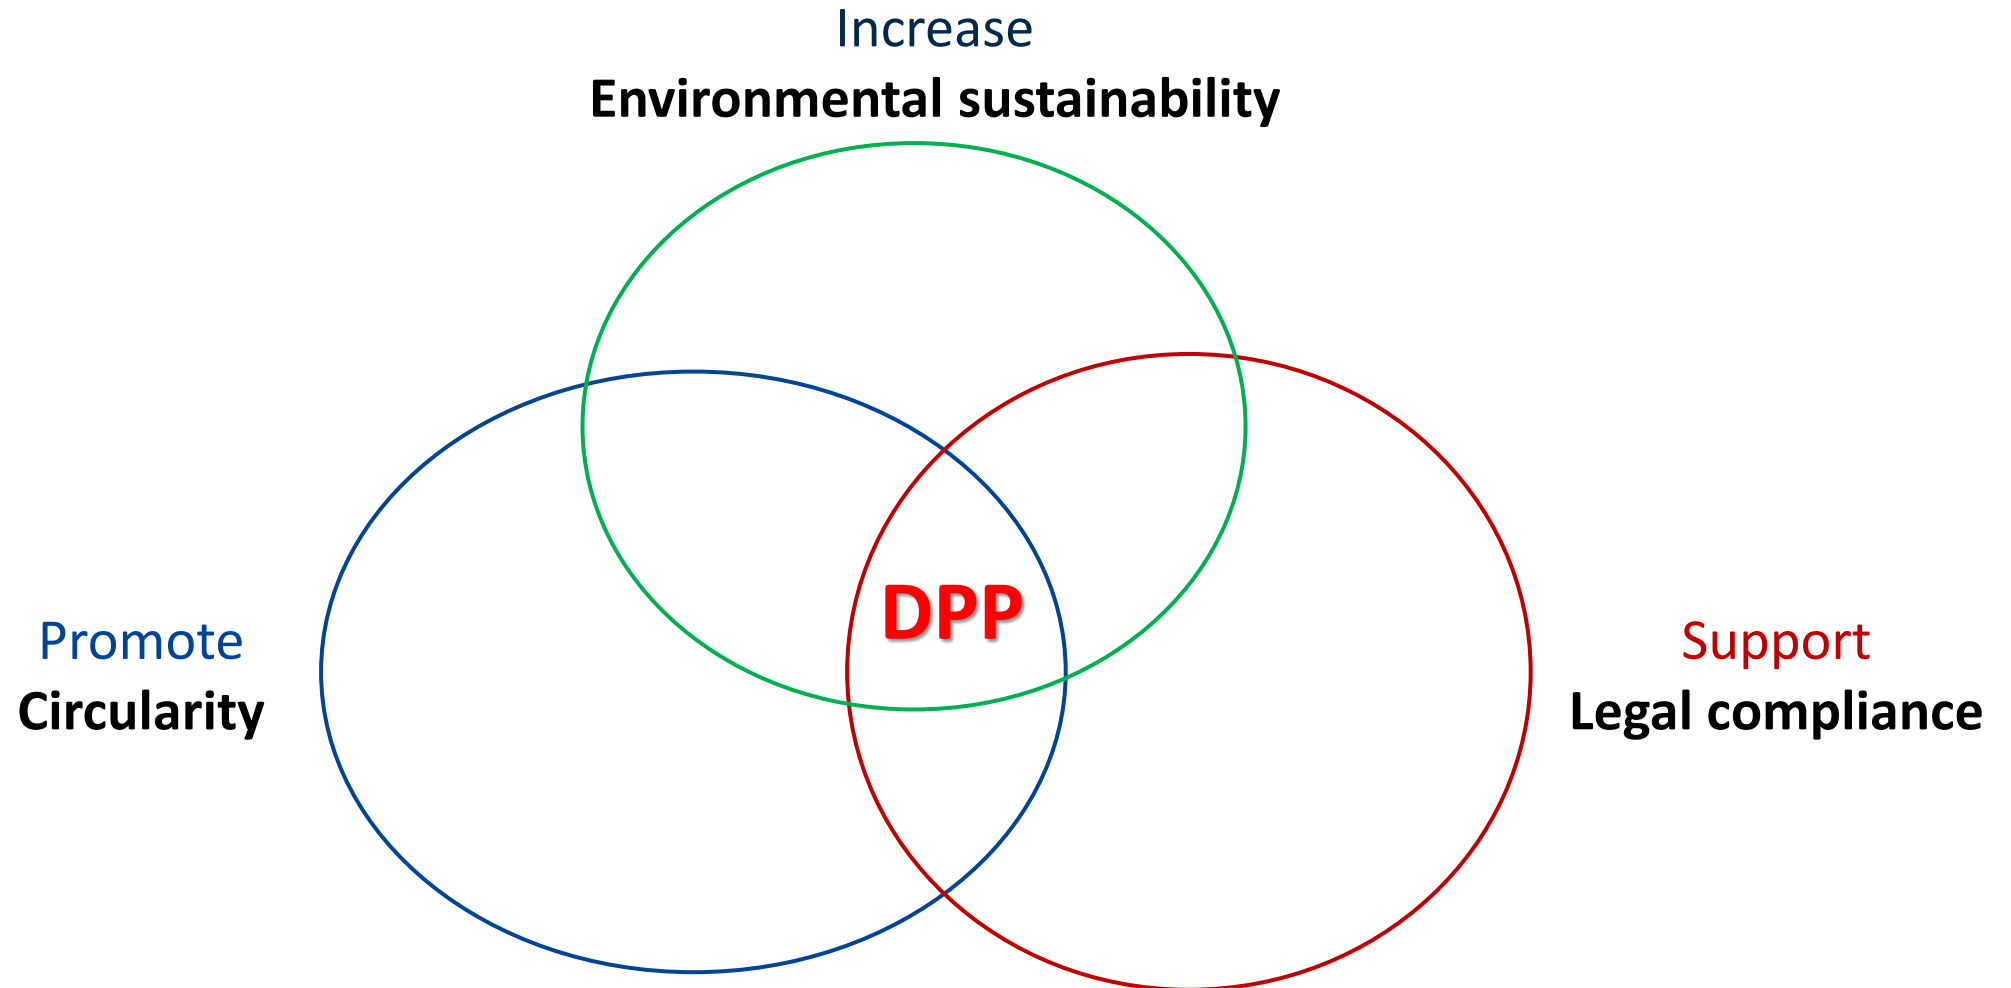

*William Neale (DG ENV)*

*Wojtek Sitarz (DG ENV)*

*Georgios Takoudis (DG ENER)*

# DPP – a tool to support three policy objectives

# ESPR

## Key Ecodesign product aspects

- **durability, reliability; reusability; upgradability;**
- **reparability;** possibility of **maintenance** and **refurbishment;**
- presence of **substances of concern;**
- **energy use** or **energy efficiency;**
- **resource use** or **resource efficiency;**
- **recycled content;**
- possibility of **remanufacturing** and **recycling;**
- possibility of **recovery** of materials;
- **environmental impacts,** including carbon and environmental footprint;
- expected generation of **waste** materials.

# Key Design Principles

## 01 Exploit modularity

## 02 Balance between Offline vs. Online data

Whereas online data is easier and cheaper to update, having data offline will make the DPP more usable and easier to consult.

**Feature:** Data Carrier includes Cross-sectorial Basic Data Elements.

## 03 Legacy friendly design

The DPP should take into account the diversity of identifiers used by economic operators and accommodate them as much as possible.

**Feature:** Use of contextual prefix in every data element of the data carrier.

## 04 Security of data carrier

Simple control data elements are foreseen:

**Feature:** Data Carrier includes a link to online information about how to distinguish an original product from a counterfeit. This link cannot be removed if the data carrier is copied from the original product and put on the counterfeit.

## 05 Balance between control and decentralisation

## 06 Decentralised access management for easier maintenance

Access management responsibility can be distributed where it is used. Decentralisation allows novel models like passing the right down the supply chain.

# DPP design

DPP-system

*(to be developed before DPP deployment)*

Digital Product Passport

DPP-data

*(to be identified when developing product-group specific secondary legislation)*

- All **standards** and **protocols** related to the IT architecture
- The DPP registry

A landscaping report on available standards for DPP is available at:

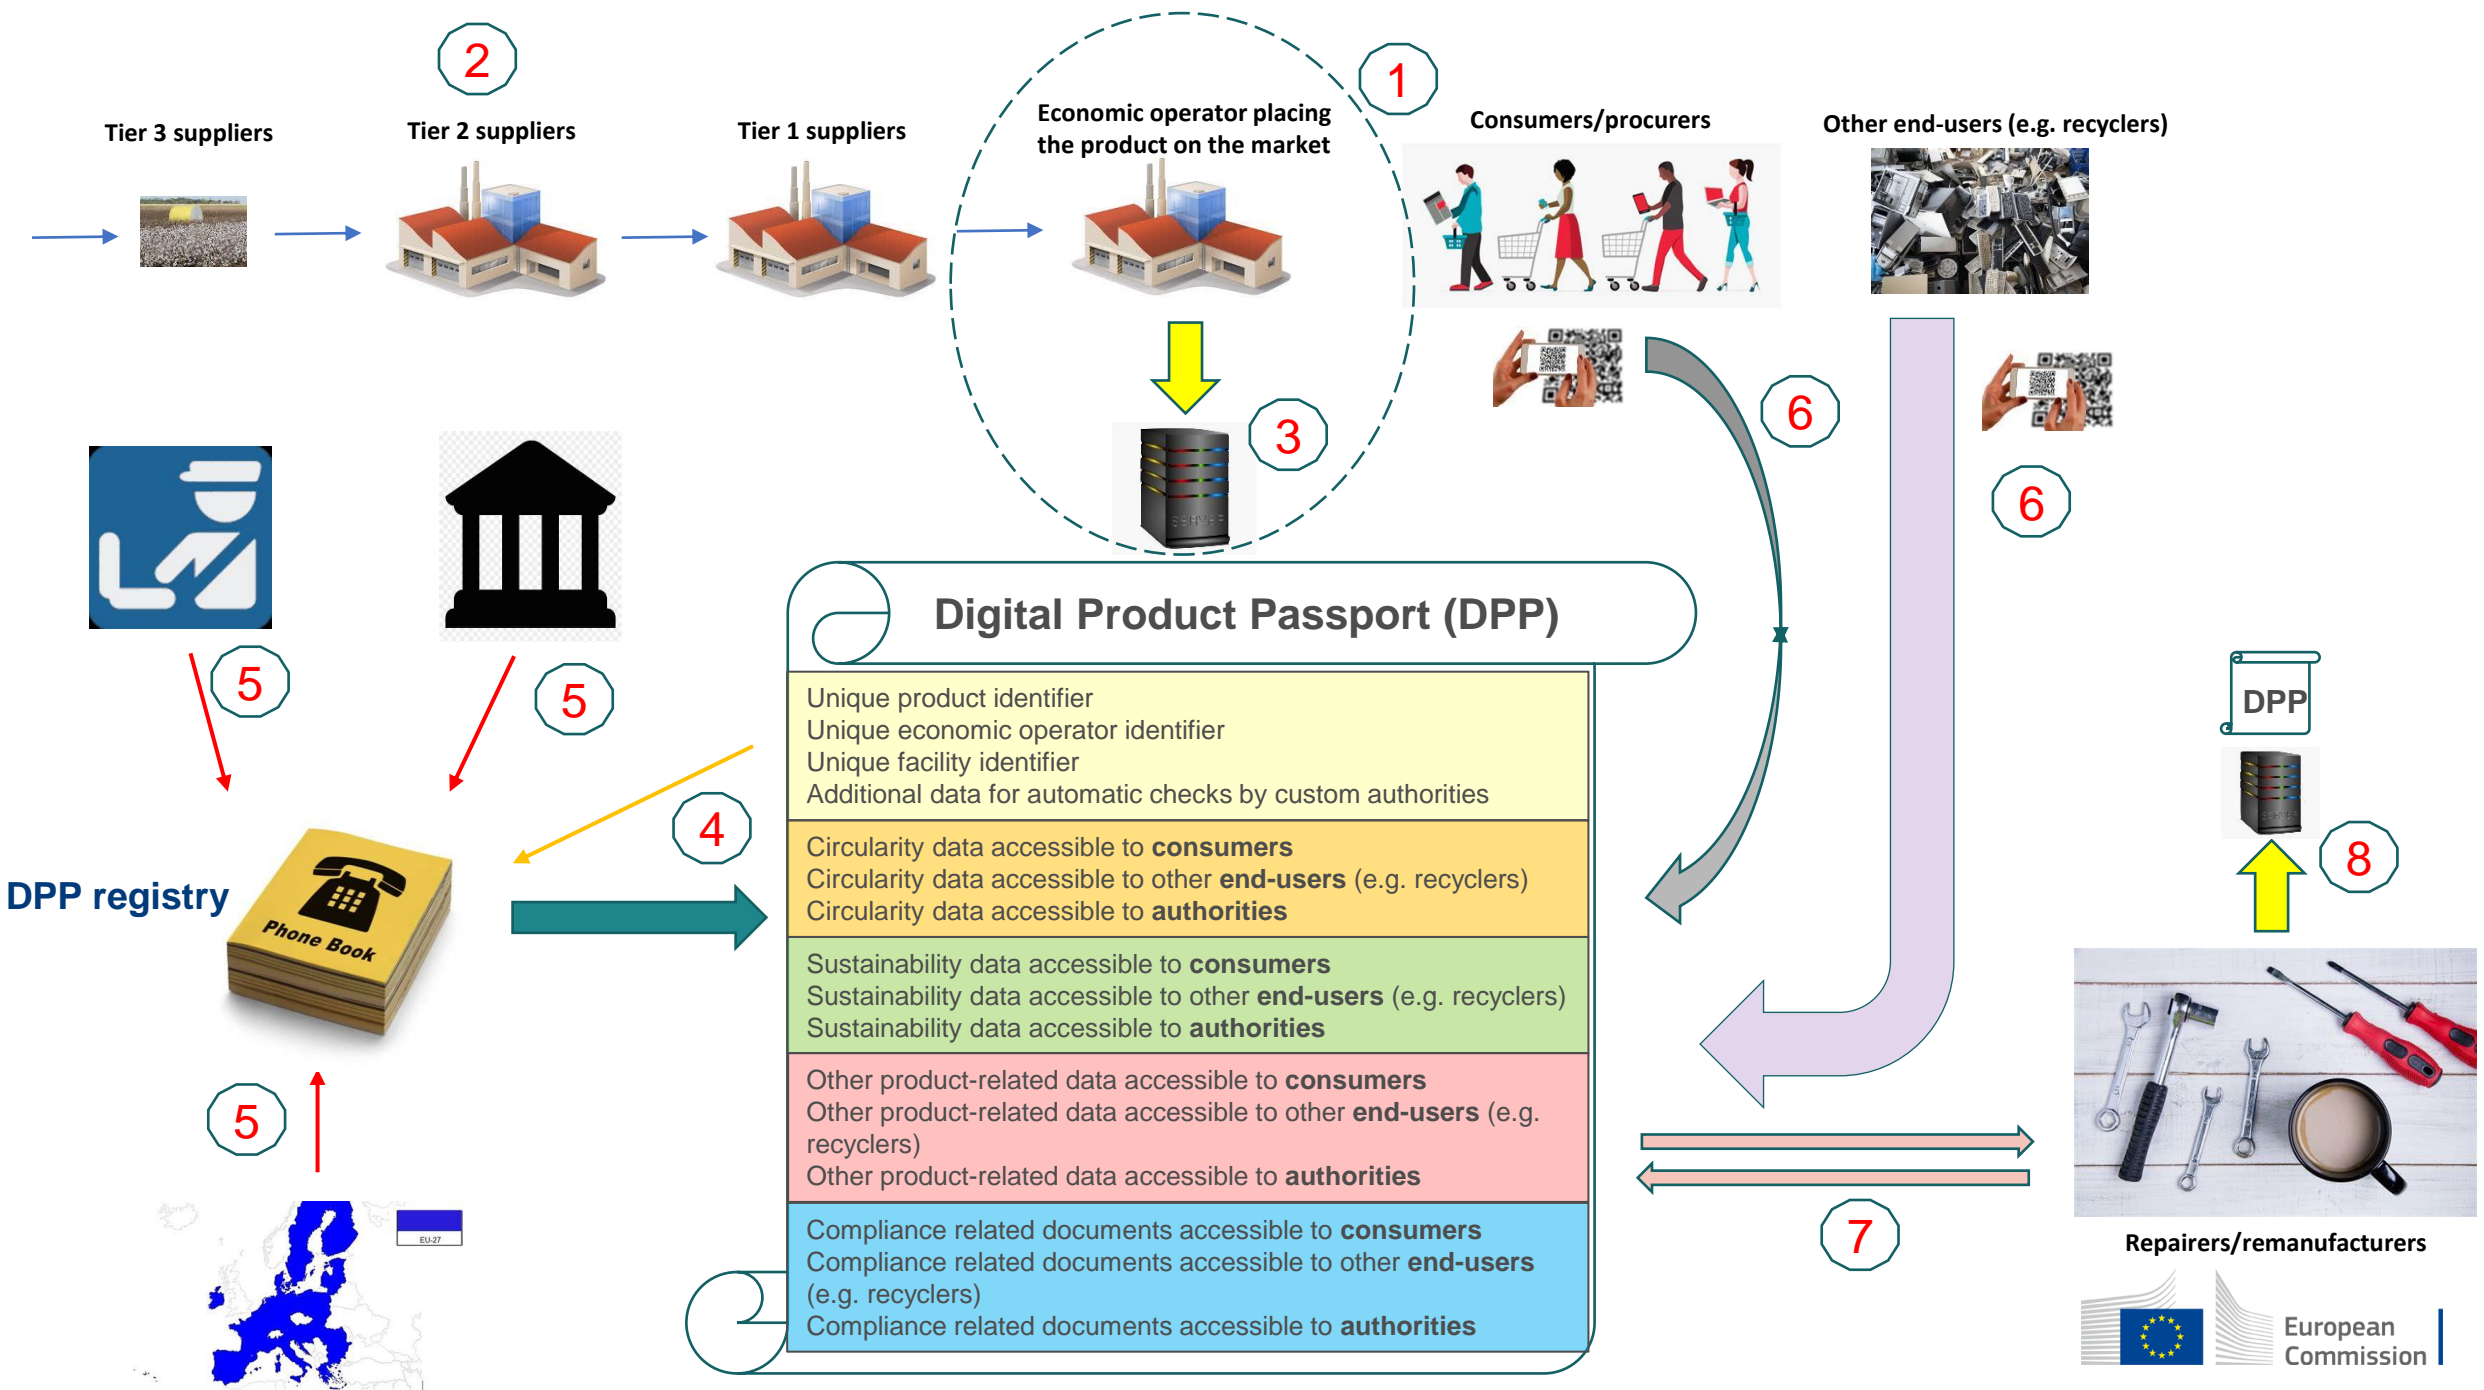

<https://www.standict.eu/landscape-analysis-report/landscape-digital-product-passport-standards>

## Possible Track & Trace identifiers

- Economic operator's name, registered trade name
- Global Trade Identification Number or equivalent
- TARIC code or equivalent
- Global location number or equivalent
- Authorised representative
- ...

## Example of potential attributes

- Description of the material, component, or product
- Recycled content
- Substances of concern
- Environmental footprint profile
- Classes of performance
- Technical parameters
- ...

DPP registry

### Digital Product Passport (DPP)

<ul style="list-style-type: none"> <li>Unique product identifier</li> <li>Unique economic operator identifier</li> <li>Unique facility identifier</li> <li>Additional data for automatic checks by custom authorities</li> </ul>
<ul style="list-style-type: none"> <li>Circularity data accessible to <b>consumers</b></li> <li>Circularity data accessible to other <b>end-users</b> (e.g. recyclers)</li> <li>Circularity data accessible to <b>authorities</b></li> </ul>
<ul style="list-style-type: none"> <li>Sustainability data accessible to <b>consumers</b></li> <li>Sustainability data accessible to other <b>end-users</b> (e.g. recyclers)</li> <li>Sustainability data accessible to <b>authorities</b></li> </ul>
<ul style="list-style-type: none"> <li>Other product-related data accessible to <b>consumers</b></li> <li>Other product-related data accessible to other <b>end-users</b> (e.g. recyclers)</li> <li>Other product-related data accessible to <b>authorities</b></li> </ul>
<ul style="list-style-type: none"> <li>Compliance related documents accessible to <b>consumers</b></li> <li>Compliance related documents accessible to other <b>end-users</b> (e.g. recyclers)</li> <li>Compliance related documents accessible to <b>authorities</b></li> </ul>

Repairers/remanufacturers

# Online data: storage and management

Discarded

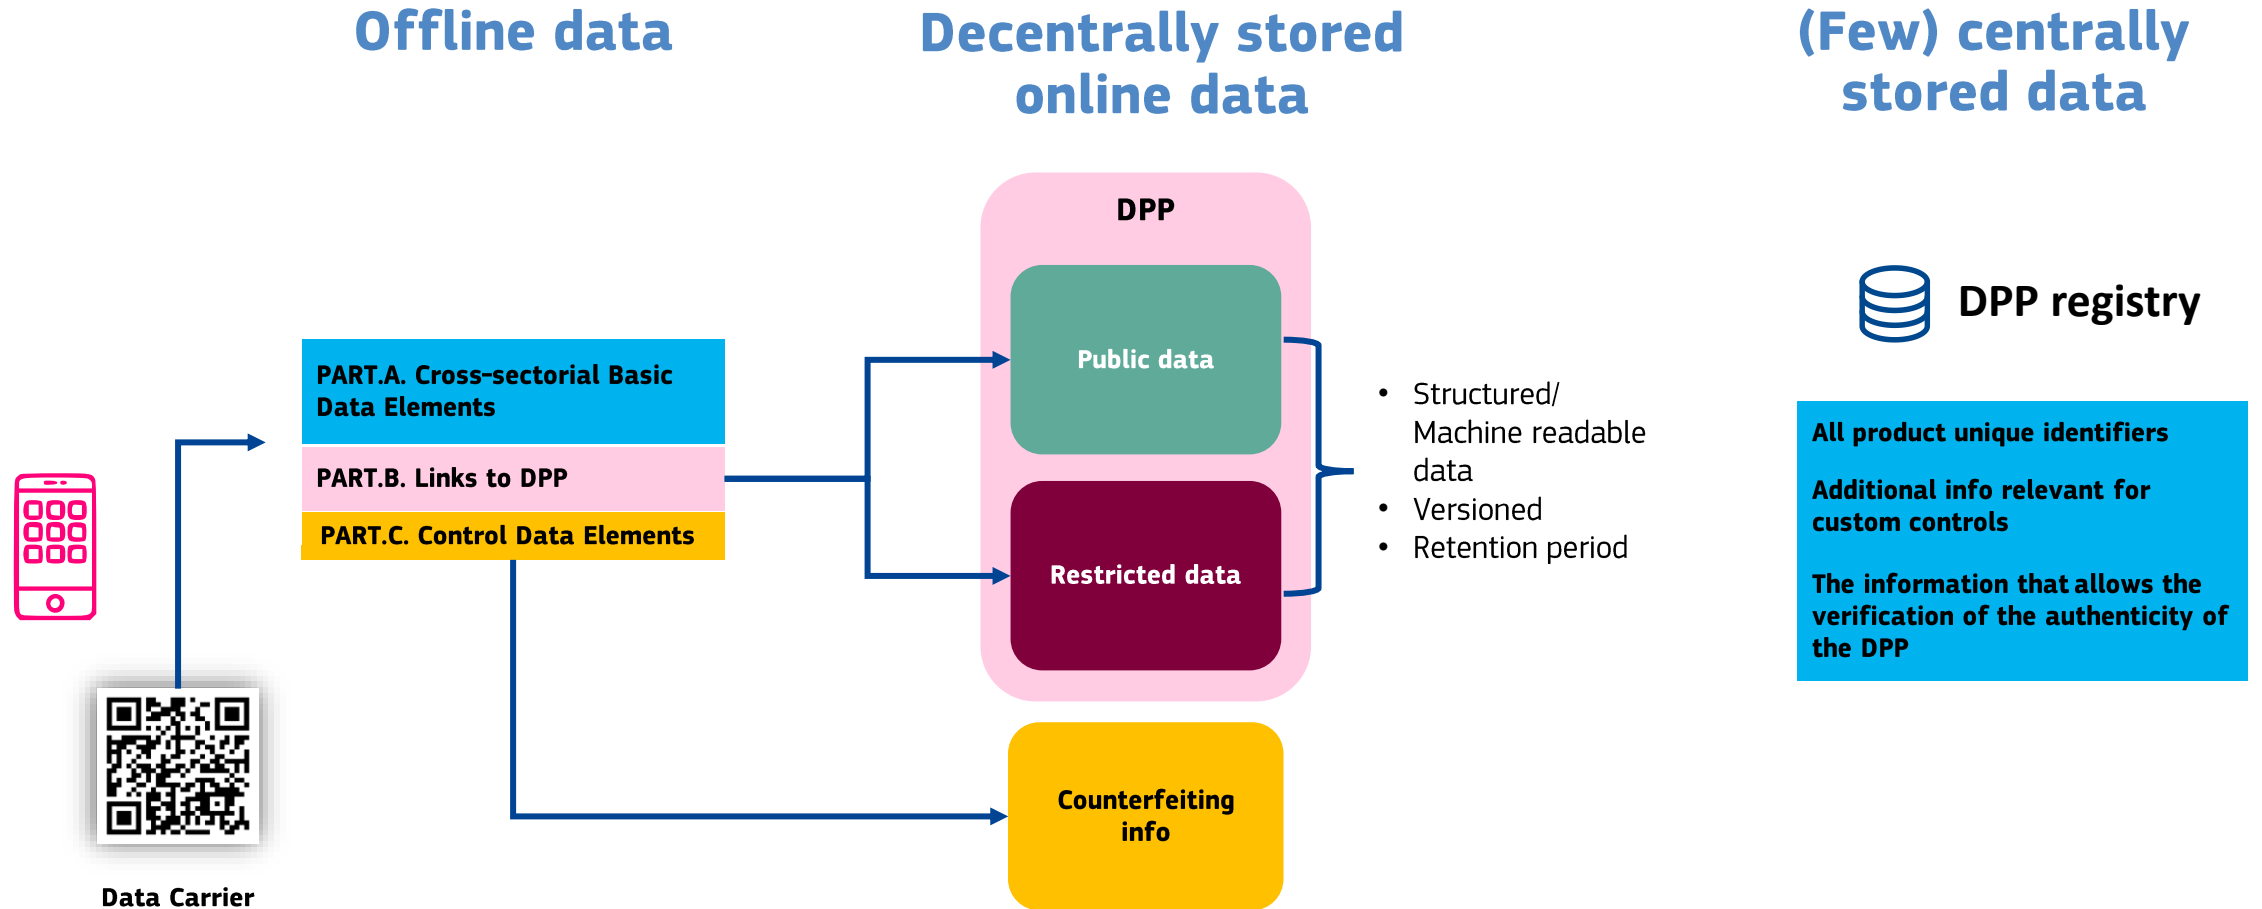

Under consideration

<i>Data Storage</i>	Centralised hosting	Federated hosting	Decentralised hosting
<b>Management of DPP data is done via</b>			
Centralised service	<p><b>Option A</b></p> <p>All DPP data in the Central Register</p>		
Federated services/ Based on Service Providers		<p><b>Option B</b></p> <p>National Authorities provide DPP service</p>	<p><b>Option D</b></p> <p>Accredited Private Platforms provide DPP service. similar to eFTI</p> <p><b>Option E (hybrid)</b></p> <p>Like <b>Option C&amp;D</b>. Self-hosted DPPs must be registered into Federated DPPaaS* providers for validation and redundancy. DPP Resolution through DPPaaS link for versioning.</p>
Decentralised services/ Self-Sovereign			<p><b>Option C</b></p> <p>Economic Operators self-manage and self-host their DPPs</p>

(\*) DPPaaS: DPP as a service / DPP service via a Service Provider

# DPP basic Data Architecture

# Standardisation request in support of DPP

## The scope and legal requirements

- Basis for future **harmonised standards**
- **8 new areas of harmonised standards to be drafted** to support the implementation of the proposed **DPP-system**. In particular:
  - a) Unique identifiers
  - b) Data carriers
  - c) Links between physical product and digital representation, including look-up mechanism
  - d) Access rights management
  - e) interoperability (technical, semantic, organisation), including data exchange protocols and formats and data processing (introduction, modification, update)
  - f) Data authentication, reliability, integrity
  - g) Data security and privacy

# Next steps

**23<sup>rd</sup> May** – Presentation of the draft standardisation request to the Standardisation Committee

**24<sup>th</sup> May** – Draft standardisation request to be sent to **CEN/CENELC/ETSI** and European stakeholder organisations representing consumers, environmental interests, trade unions and SMEs in standardisation - respectively SBS, ETUC, ANEC and ECOS, collectively known as “the **Annex III organisations**”

**9<sup>th</sup> June** – Presentation of the draft standardisation request to the Ecodesign Consultation Forum (either in person or as written contribution)

**12<sup>th</sup> June pm (tbc)** – Webex webinar to present the draft standardisation request to interested stakeholders
