Similar for Machine Learning Models

Except that we :

Similar for Machine Learning Models

Except that we :

- Run a range of “inference” attacks”

Similar for Machine Learning Models

Except that we :

- Run a range of “inference” attacks”
- Aim to support more ‘user journeys’

Similar for Machine Learning Models

Except that we :

- Run a range of “inference” attacks”
- Aim to support more ‘user journeys’
- Don’t have a set of ‘tried and trusted’ guidelines to work with

ACRO: analytic commands

ACRO: analytic commands

Using the same api as pandas, adding checks for cell count and dominance

- **acro.crosstab()**
- **acro.pivot_table()**

Using the same api as statsmodels, adding checks for DoF:

ACRO: analytic commands

Using the same api as pandas, adding checks for cell count and dominance

- **acro.crosstab()**
- **acro.pivot_table()**

Using the same api as statsmodels, adding checks for DoF:

- **acro.logit()** , **acro.logitr()**

ACRO: analytic commands

Using the same api as pandas, adding checks for cell count and dominance

- **acro.crosstab()**
- **acro.pivot_table()**

Using the same api as statsmodels, adding checks for DoF:

- **acro.logit()** , **acro.logitr()**
- **acro.ols()** , **acro.olsr()**

ACRO: analytic commands

Using the same api as pandas, adding checks for cell count and dominance

- **acro.crosstab()**
- **acro.pivot_table()**

Using the same api as statsmodels, adding checks for DoF:

- **acro.logit()** , **acro.logitr()**
- **acro.ols()** , **acro.olsr()**
- **acro.probit()** , **acro.probitr()**

ACRO: analytic commands

Using the same api as pandas, adding checks for cell count and dominance

- **acro.crosstab()**
- **acro.pivot_table()**

Using the same api as statsmodels, adding checks for DoF:

- **acro.logit()** , **acro.logitr()**
- **acro.ols()** , **acro.olsr()**
- **acro.probit()** , **acro.probitr()**

R versions are prefixed by “acro_”

ACRO: analytic commands

Using the same api as pandas, adding checks for cell count and dominance

- **acro.crosstab()**
- **acro.pivot_table()**

Using the same api as statsmodels, adding checks for DoF:

- **acro.logit()** , **acro.logitr()**
- **acro.ols()** , **acro.olsr()**
- **acro.probit()** , **acro.probitr()**

R versions are prefixed by “acro_”

- Also support R's built in '**table**' command

ACRO: analytic commands

Using the same api as pandas, adding checks for cell count and dominance

- **acro.crosstab()**
- **acro.pivot_table()**

Using the same api as statsmodels, adding checks for DoF:

- **acro.logit()** , **acro.logitr()**
- **acro.ols()** , **acro.olsr()**
- **acro.probit()** , **acro.probitr()**

R versions are prefixed by “acro_”

- Also support R’s built in ‘**table**’ command
- Stata versions prefixed by “acro ”
 - Code currently captures and translates commands: **table**, **regress**, **probit**, **logit**
