Problems in practice:

Inconsistency between net lending/borrowing of non-financial and financial transactions.

Net lending/borrowing in national accounts in 2021 (millions of tenge)

		Non-financial corporations	Financial corporations	General government	Households	NPISHS	Total economy
	0 0 1 0	S11	S12	S13	S14	S15	S1
В9	Net lending (+), net borrowing(-) in the capital account	7,499,078.3	-37,275.5	-2,128,325.8	0 1 1 1 1 0 1-6,127,290.5	1 0 1 1-901 110.5	-3,319,235.0
В9	Net lending (+), net borrowing (-) in the financial account	1,032,573.7	399,599.1	-2,485,533.1	1,280,553.5	-174,296.4	-2,012,250.6

Note: the balance of lending/borrowing according to GFS in 2021 amounted to KZT (-)3,020,630.7 million.

The difference in net lending/borrowing for non-financial and financial transactions in the economy as a whole is due to errors and omissions in the Balance of Payments. Errors and omissions and imbalances in the Balance of Payments are due to discrepancies in trade statistics, including a time lag between actual delivery and accounting.

Discussion Question: Do you face the problem of the discrepancy between net lending/borrowing for non-financial and financial transactions by economic sectors? What solutions do you use?

Thank you for your attention!
