New Data Sources for the HBS

Four grocery chains in Norway have 98 per cent market share

- We asked them for receipt data

4.4 million transactions per year with debitcard

- We also asked for payment transactions from NETS Branch Norway

These sources would provide us with detailed household statistics, collecting data efficiently for us without needing individuals to fill out a survey.

Everything Seamed Aligned for Datacollection

In Norway, the Statistics Act is allowing access to public and private data for official statistics.

We established dialogue with the grocery chains and Nets and got permission to collect test data

The final formal step was the cost-benefit assessment, that led to legal obligations on grocery chains and NETS Norway to provide data

Datenschutzbehörde stoppt Speicherung von Supermarkt-Bons in Norwegen

Um soziale Daten zu erheben, wollte die norwegische Statistikbehörde die Lebensmitteleinkäufe aller Einwohner:innen speichern. Diese Datenverarbeitung haben die Datenschutzkontrolleure des Landes nun verboten.

The Case from a Media Perspective: From a trusted source to a privacy-invading entity

How detailed maps of our lives does the government really need to make informed decisions?

Ph.D. Candidate

The Case from a Media Perspective: From a trusted source to a privacy-invading entity

The state, represented by Statistics Norway, simply should not demand a complete overview of citizens' purchasing and eating habits. The Progress Party does not want a total surveillance society. From a practical standpoint, we do not see the point in this.

MP

Main Takeaways for the Communication Department

- **Need for stakeholder mapping**
 - Develop a consistent, clear, and simple message
 - Invest in media training and interview preparation
- **Avoid unnecessary escalation**
 - Focus on long-term reputation and trust-building

Building Trust: A Vital Element for Enhancing Data Collection and Utilization

- To deliver daily statistics and information to the public we are dependent on trust within society to streamline, develop and carry out our data collection, and in the end improve data and data usage.
