

# Sexual and reproductive health services are essential throughout life

# SRH advances health, social and economic benefits for all

## Generating evidence

Gaps in services are widespread:

**270M** unmet  
contraception need.

**73M** abortions  
every year, half of  
these are unsafe.

**1 in 3** women  
experienced physical  
or sexual violence.

**800**  
pregnancy-related  
deaths every day.

**500M** women and girls without  
access to services and products to manage  
menstruation.

**1M+** sexually  
transmitted infections  
acquired every day.

**1 in 6** people  
experience infertility  
in their lifetime.

## Strengthening systems

Create enabling  
environments through:

- Supporting **evidence-based policies**.
- Building comprehensive health benefit packages.
- Removing legal barriers.
- Ensuring the presence of skilled healthcare providers.

## Impacting lives

Invest in people: US\$ 10.60 per person annually would provide multiple health, social and economic benefits including:

68% decrease in unintended pregnancies

72% decrease in unsafe abortions

62% decrease in maternal deaths

More women and girls able  
to exercise their **sexual** and  
**reproductive rights**.

More girls in **schools**,  
and women in the **labour**  
**market**.

This requires both international donors and domestic governments to significantly **step up** their **investments** in **sexual and reproductive health and rights**.
