UNECE

GGP in a nutshell

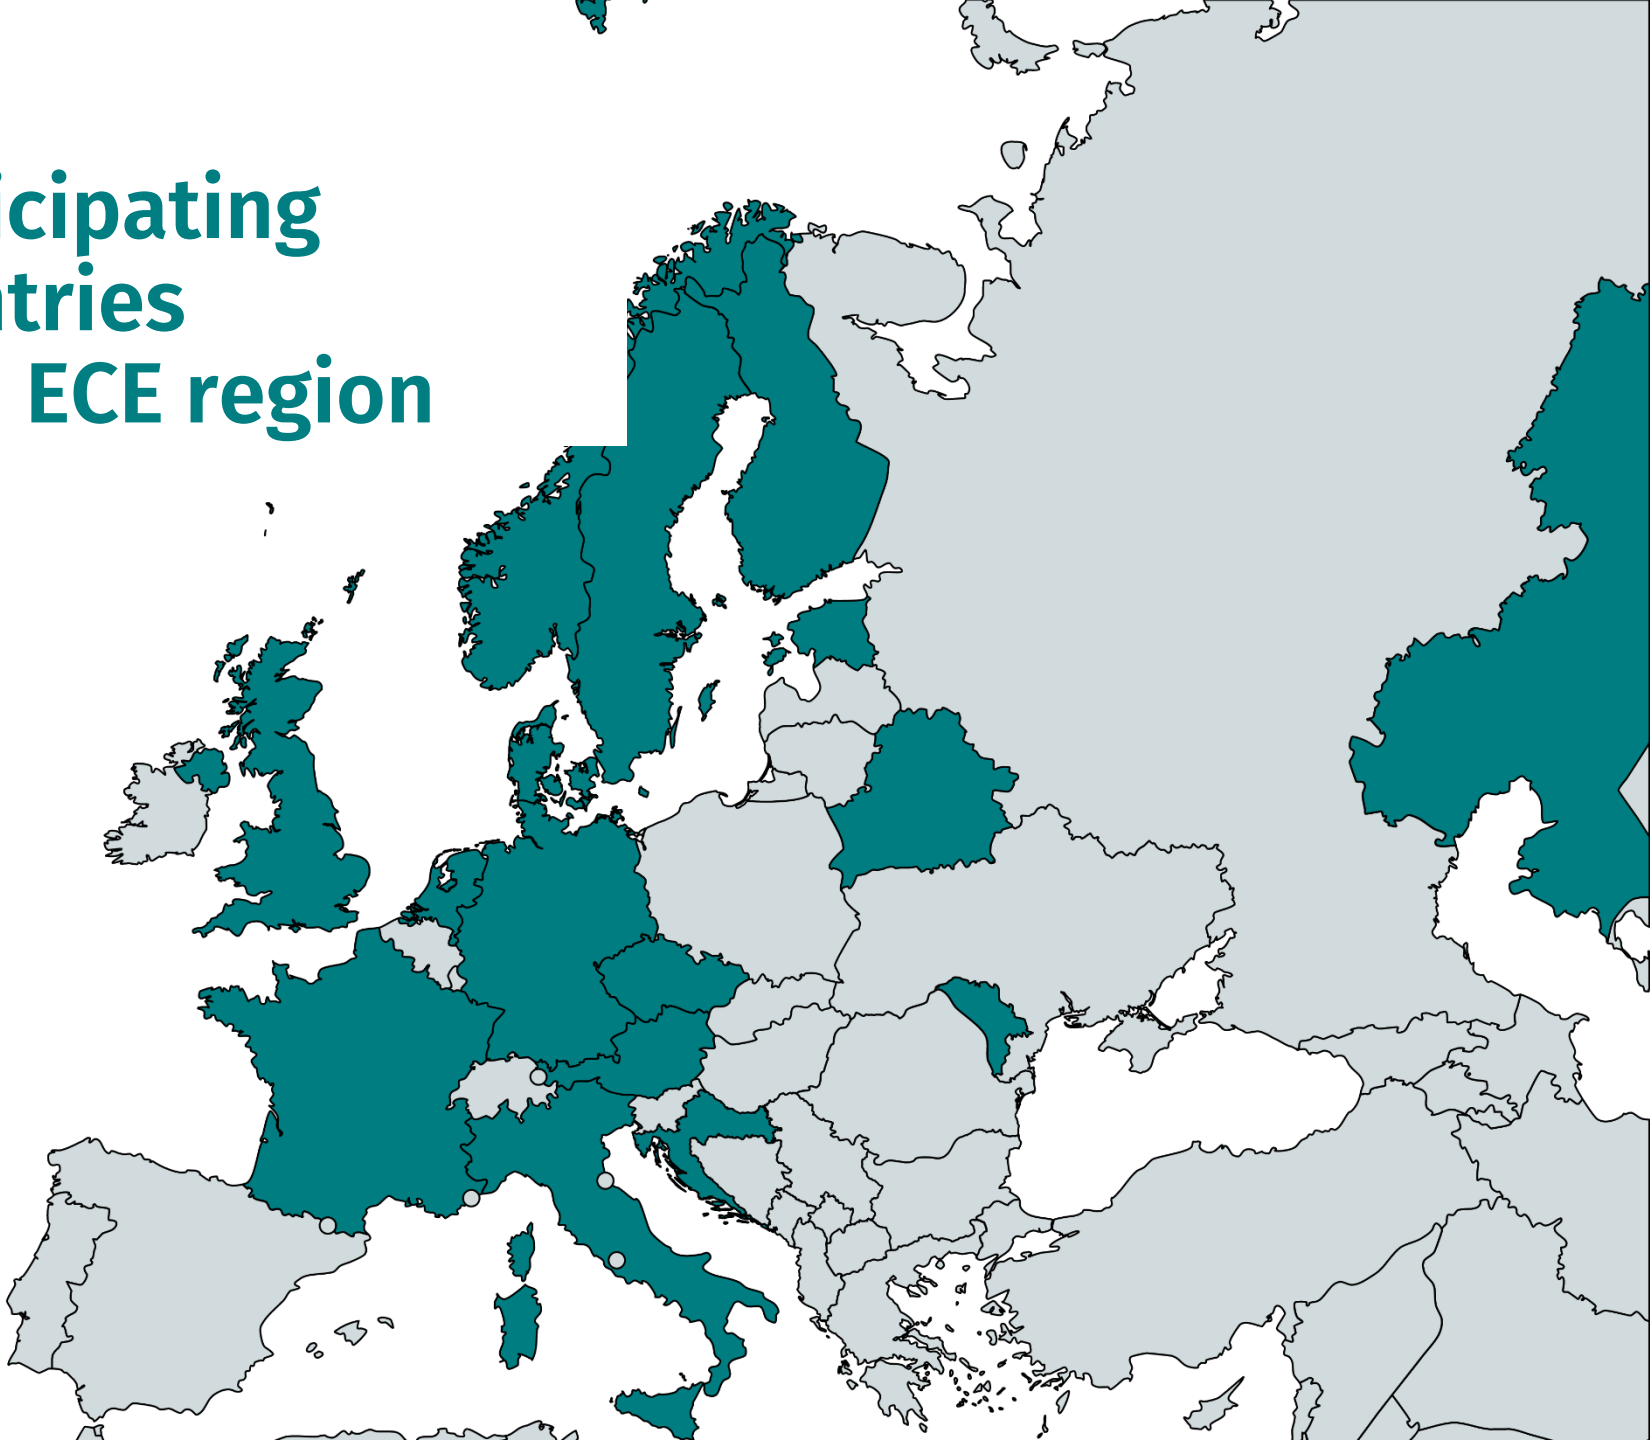

- **GGP is an international research infrastructure focusing on population and family dynamics.**
- **Founded in 2000 under the umbrella of UNECE. Since 2009, headquarters are in the Netherlands (NIDI) but collaboration with UNECE remains.**
- **Our mission is to provide high-quality and cross-national data on scientific and societal challenges related to demographic change.**

Generations and Gender Survey

Key features of GGS

- **Broad age range (18-79) allows collecting information about entire life course**
- **Large sample size makes it possible to study numerical minorities, uncommon events, and disaggregate data**
- **Multidisciplinary questionnaire captures a wide range of societal and scientific topics**
- **Wide geographical coverage allows to compare countries**
- **Longitudinal study design allows to follow people in time and see how their lives change**

Participating countries from ECE region

Panel design in GGS

Questions that can ONLY be answered with panel data

- **Realization of intentions**
- **Track changes in situations of (vulnerable) families**
- **Work and family dynamics**
- **Evolution of gender (in)equalities**
- **Causes and consequences of intergenerational exchange**

**Data from GGS can contribute
to a better match between
the realities of people's needs
and the public policies
designed to support them**
