# Digital system for conformity checks in Germany QUAKON

# Conformity checks in Germany via QUAKON

*For imports from Non-EU countries.*

*The importer will:*

- register online at BLE,
- notify the lot(s) destined for import online to BLE,
- see the status of the notified lot at on his/her specific QUAKON-platform,
- receive the waiver online (as well as the customs authority via an interface),
- receive the conformity certificate online (as well as the customs authority via an interface),
- proceed with customs clearance.

# Risk analysis, programmed in QUAKON

## ***High risk***

- first notifications for the beginning of the season
- previous non-conformity of the produce
- determined control quota of produce has not been reached

## ***Medium risk***

- produce without defined control quota

## ***Low risk***

- weight of the lot < 300 kg

## ***To notify, but no conformity checks***

- e. g. not for fresh market consumption

## ***Risk analysis update***

- takes a few minutes

# Comparison of features in QUAKON and proposal by CEFACT

Feature	QUAKON	CEFACT
