Economic Commission for Europe

Committee on Environmental Policy

Twenty-eighth session

Geneva, 1–3 November 2023

Item 11 of the provisional agenda

Annual programme of work of the Environment subprogramme for 2024 and outline of key components of the programme of work of the Environment subprogramme for 2025

Draft programme of work of the Environment subprogramme for 2024

Note by the secretariat*

Introduction

1. The present document sets out the draft programme of work of the Environment subprogramme (“the subprogramme”) for 2024. The Committee on Environmental Policy (“the Committee”) is invited to adopt it and recommend it to the Executive Committee for approval. Any subsequent additional, carried over or terminated deliverables will be reflected in the United Nations Umoja system used by the secretariat for planning, monitoring and reporting on the implementation of the programme.
2. The draft programme of work applies a broad results-based management approach, which establishes a logical relationship between the hierarchical results (deliverables – results – objectives – impact) known as the “results chain”, the resources (human and financial) known as “inputs” and the external factors (strategic, governance, operational, financial) that can prevent achievement of the objective.
3. The objective, the strategy, the planned results and the deliverables in the draft programme of work correspond to those contained in the Economic Commission for Europe (ECE) proposed programme budget for 2024 (A/78/6 (Sect. 20)). The work of the subprogramme is aligned with the Sustainable Development Goals. In attaining its objective, the subprogramme builds on cross-sectoral collaboration with other subprogrammes in relevant ECE areas where multiple Sustainable Development Goals converge.¹ This type of collaboration enables the subprogramme to maximize existing synergies, increase the

*Late submission

¹ The United Nations Economic Commission for Europe (ECE) cross-sectoral collaboration areas are as follows: (a) circular economy and the sustainable use of natural resources; (b) sustainable and smart cities for all ages; (c) sustainable mobility and smart connectivity; (d) measuring and monitoring progress towards achieving the Sustainable Development Goals; and (e) digital and green transformations for sustainable development in the ECE region.

efficiency of its work and have a multiplying effect on the impact of its actions to support countries in implementing the Sustainable Development Goals. The deliverables of the subprogramme fall into the following main categories: (a) facilitation of the intergovernmental process and expert bodies; (b) generation and transfer of knowledge, including technical cooperation projects, training events, seminars, workshops and publications; (c) other substantive deliverables; and (d) communication deliverables.

4. The details of the proposed publications are provided in annex I to the present document. The overall ECE legislative mandates and those specific to the subprogramme are listed in annex II to the present document.

I. Objective

5. The objective, to which the subprogramme contributes, is to improve environmental governance and performance for safeguarding the environment and health.

II. Strategy

6. Responsibility for the subprogramme is vested in the ECE Environment Division.

7. To contribute to the objective, the subprogramme will:

(a) Support the implementation of outcomes of global and regional summits and conferences, and support and promote the implementation by countries of the ECE multilateral environmental agreements, contributing to achieving mainly Sustainable Development Goals 3, 6, 9, 11–13 and 15–17, through the core interlinked functions of international policy dialogue, normative work, capacity-building and the dissemination of good practices and lessons learned in the areas of air quality, water, industrial safety, public participation, impact assessment, environmental monitoring and assessment, environmental performance, education for sustainable development and the mainstreaming of environmental concerns into other dimensions of sustainable development;

(b) Support and promote the implementation of the ECE policy tools, including the ECE Environmental Performance Review Programme, contributing to achieving mainly Sustainable Development Goals 6, 11–13 and 15; the ECE Environmental Monitoring and Assessment Programme, contributing to achieving mainly Goal 17; the UNECE Strategy for Education for Sustainable Development, contributing to achieving Goals 4 and 12–13; and the Transport, Health and Environment Pan-European Programme, contributing to achieving mainly Goals 3, 11, 13 and 17;

(c) Support and promote the sharing of information (e.g., through the Shared Environmental Information System), experiences and good practices in the ECE region;

(d) Promote synergies among ECE multilateral environmental agreements;

(e) Conduct environmental performance reviews, assisting countries in the implementation of the recommendations from those reviews, and monitor the impact of the recommendations on national policies;

(f) Using a country needs-based approach, support countries, with a focus on countries of Eastern and South-Eastern Europe, the Caucasus and Central Asia, in environmental policymaking, monitoring, assessment and management, including by providing an intergovernmental decision-making platform, organizing capacity-building activities and providing advisory services;

(g) Work with interested non-ECE countries, including those wishing to join the multilateral environmental agreements that are open to global accession;

(h) Support member States in addressing emerging issues related to the work of the subprogramme, including those resulting from international and regional processes by, among other things, providing advisory support and developing policy packages and/or

recommendations, and supporting countries in the development of regionwide approaches to such emerging issues (e.g., on sustainable infrastructure).

8. The above-mentioned work is expected to result in:

- (a) Improved environmental governance and performance by member States;
- (b) Strengthened integration of environmental concerns into member States' sectoral policies, including the post-coronavirus disease (COVID-19) pandemic economic recovery phase;
- (c) More effective development and implementation of environmental legislation and policy by member States;
- (d) Improved response to environmental challenges by member States;
- (e) Enhanced cross-border cooperation between countries and effective international and national cooperation;
- (f) Strengthened implementation of ECE multilateral environmental commitments and increased geographical coverage.

III. Planned results for 2024

9. The planned results for 2024 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2022 and the proposed programme plan for 2024. Result 3 is a new planned result.

Result 1: improved information for strengthening transboundary water cooperation

Programme performance in 2022 and target for 2024

10. The subprogramme's work contributed to 117 countries for which data on the transboundary river and lake component of indicator 6.5.2 of the Sustainable Development Goals were submitted to the Statistical Commission in 2022, which exceeded the planned target of 97 countries.

11. Progress towards the objective and the target for 2024 is presented in the performance measure contained in figure 1 below.

Figure 1

Performance measure: number of countries for which data on transboundary river and lake component of indicator 6.5.2 are submitted to the Statistical Commission (Cumulative)

Result 2: strengthened industrial safety governance in Eastern and South-Eastern Europe, the Caucasus and Central Asia

Programme performance in 2022 and target for 2024

12. The subprogramme's work contributed to one meeting of the Serbian national policy dialogue and supported the review by Serbia of its policies and legislation to align with the Convention on the Transboundary Effects of Industrial Accidents (Industrial Accidents Convention), which met the planned target. Owing to the suspension of a project to launch the national policy dialogues on industrial safety by the donor, the target of launching a national policy dialogue on industrial safety in Central Asia was not met.

13. Progress towards the objective and the target for 2024 are presented in the performance measure contained in table 1 below.

Table 1
Performance measure

| 2020 (actual) | 2021 (actual) | 2022 (actual) | 2023 (planned) | 2024 (planned) |
|--|--|---|---|---|
| Serbia initiated development of terms of reference for steering committee on national policy dialogues | Serbia established national policy dialogue steering committee | Serbian national policy dialogue meeting addresses issues of national concern, involving relevant authorities | National policy dialogues sustained and implemented by Serbia and 5 Central Asian countries | National policy dialogues sustained and implemented by Serbia |
| Central Asian countries began activities to launch national policy dialogues | Central Asian countries reviewed industrial safety legislation to align with Industrial Accident Convention's requirements | Finalization of review of industrial safety legislation to align with Industrial Accident Convention's requirements | | Serbia finalizes national programme on industrial safety |

Result 3: increased number of States Members of the United Nations becoming parties to multilateral environmental agreements serviced by the United Nations Economic Commission for Europe

Proposed programme plan for 2024

14. The subprogramme carries out activities to strengthen the capacity of States Members of the United Nations for accession to and effective implementation of multilateral environmental agreements serviced by ECE, dissemination of best practices and lessons learned. In 2022, those efforts led to the accession by Ukraine to the Industrial Accidents Convention. Since 2018, countries outside the ECE region have begun to accede to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes (Water Convention), and a similar trend is expected for the Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters (Aarhus Convention) by 2023, thereby expanding the benefits of these instruments beyond the ECE region.

Lessons learned and planned change

15. The lesson for the subprogramme was that it needed to apply more effort and resources to strengthen the accession and implementation capacity of countries, including beyond the ECE region, especially regarding benefits, costs and mechanisms for multisectoral involvement, to ensure commitment from all sectors concerned by implementation. In applying the lesson, the subprogramme will adapt and enhance outreach efforts to all sectors

concerned by the implementation of the instruments, fostering an integrated and multisectoral approach, to encourage accession and ensure effective implementation.

16. Expected progress towards the objective is presented in the performance measure contained in figure 2 below.

Figure 2

Performance measure: number of parties to multilateral environmental agreements serviced by the United Nations Economic Commission for Europe
(Cumulative)

IV. External factors

17. The subprogramme is expected to achieve its objective on the assumption that:

(a) Member States continue to guide ECE intergovernmental processes, support the work of ECE, and give high priority to regional and subregional cooperation and integration, with a view to achieving sustainable development;

(b) All relevant stakeholders at the national level have the political will and sufficient capacity to integrate the environmental dimension into policy formulation and to implement national legislation in accordance with the ECE multilateral environmental agreements;

(c) All relevant stakeholders at the national level have sufficient awareness of environmental issues and the active support of the public in the implementation of national and regional policies;

(d) Voluntary resources continue to be available;

(e) At the country level, there is no critical impact on resource availability owing to global, regional or national economic developments.

V. Deliverables to be implemented in 2024

18. Table 2 below lists all deliverables, by category and subcategory, that are expected to contribute to the attainment of the objective stated above.
