Correction organic peroxide list, 2.5.3.2.4

Submitted by the European Chemical Industry Council (Cefic)

1. Introduction

1. During the December 2021 fifty-ninth session, document ST/SG/AC.10/C.3/2021/33, which proposed a couple of new organic peroxides to be included in the organic peroxide table, was adopted.

Cefic received a comment from United States of America that for one of the adopted organic peroxides the wrong packing method was mentioned.

2. Correction

The adopted new entry as given below was assigned to packing method OP8. However for organic peroxides classified as organic peroxide Type D, UN 3105, by default, OP7 has to be assigned according to 4.1.7.1.4.

Therefore the following correction is proposed (correction gray shaded):

2.1 Proposed amendments to 2.5.3.2.4 List of currently assigned organic peroxides:

<table>
<thead>
<tr>
<th>ORGANIC PEROXIDE</th>
<th>Concentration (%)</th>
<th>Diluent type A (%)</th>
<th>Diluent type B 1 (%)</th>
<th>Inert solid (%)</th>
<th>Water (%)</th>
<th>Packing Method</th>
<th>Control temperature (°C)</th>
<th>Emergency temperature (°C)</th>
<th>Number (Generic entry)</th>
<th>Subsidary risks and remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>METHYL ETHYL KETONE PEROXIDE(S)</td>
<td>Remark 33)</td>
<td>≥ 41</td>
<td></td>
<td>≥ 9</td>
<td>OP8</td>
<td>OP7</td>
<td></td>
<td></td>
<td>3105</td>
<td>33) 34) 35)</td>
</tr>
</tbody>
</table>
