National Recovery and Resilience Plan (PNRR)M2C4 Investment 3.1 - Protection and enhancement of urban and suburban green areas

Dr. Giorgio Centurelli General of the Directorate-General
Director for Financial Management, Monitoring, Reporting and
Control of the Department of the Mission Unit for the PNRR -
MASE

San Marino 21 October 2023

PNRR - Mission 2 - Component 4 - Investment 3.1 "Protection and enhancement of urban and extra-urban green areas"

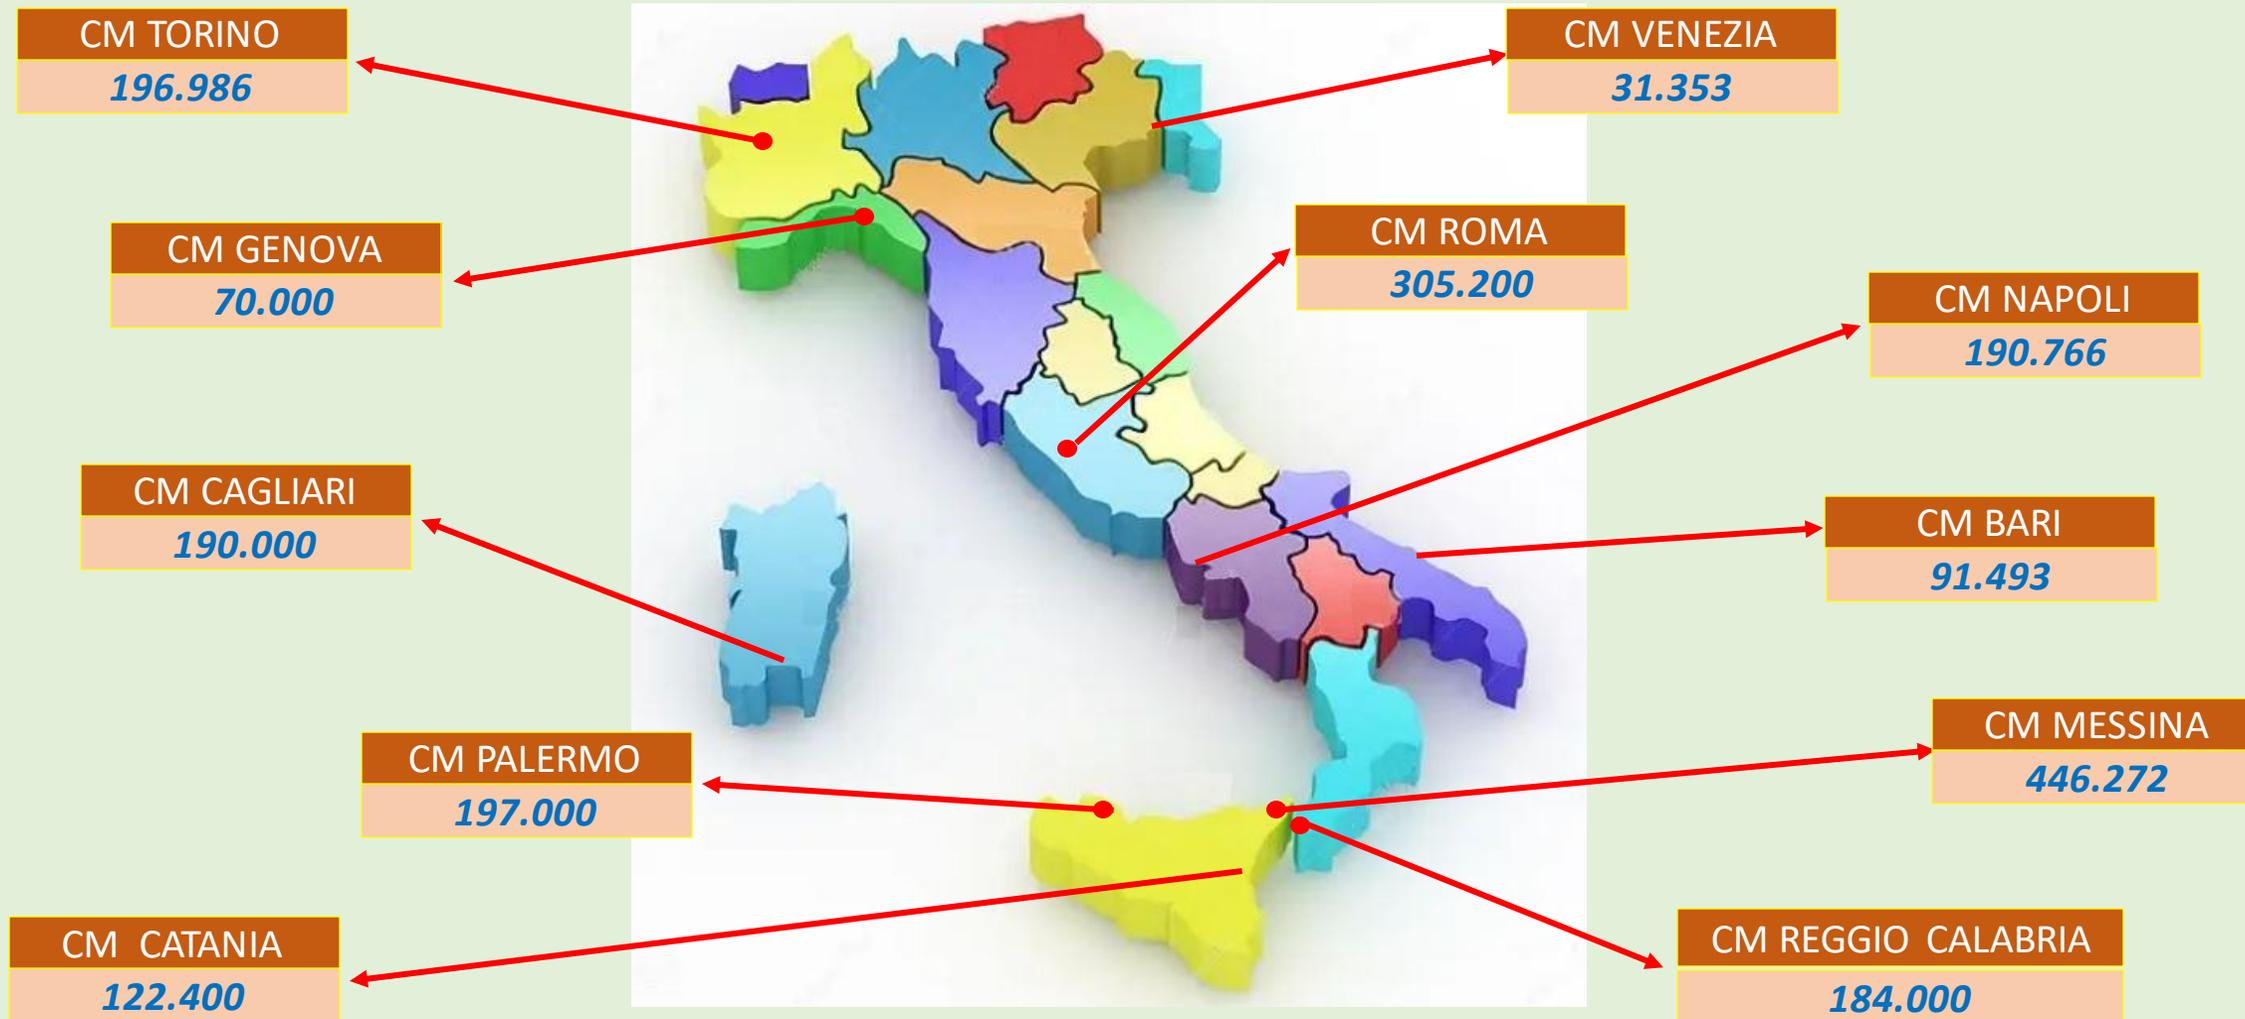

- The PNRR is a performance-based program, where the EU transfers predefined financial tranches based on the satisfactory achievement of milestones and targets, not on expenditure levels.
- The 10 PNRR installments are predetermined with the European Commission, considering successful milestone and target attainment, not spending levels.
- The EC evaluates the PNRR and Operational Agreements to ensure that the objectives are met.
- Forestation targets have passed EC evaluation and EPC/EFC approval, with additional checks ensuring compliance with EU and national regulations for financial protection

PNRR - Mission 2 - Component 4 - Investment 3.1 «Protection and enhancement of urban DISTRIBUTION OF TREE AND SHRUB UNITS REPORTED ON THE PNRR

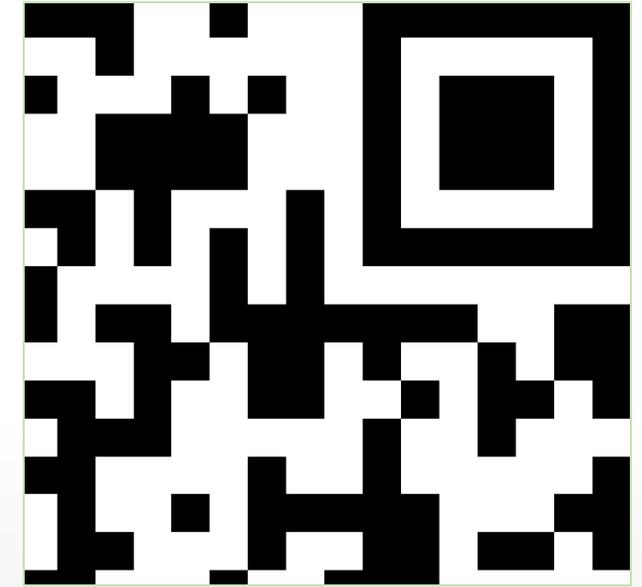

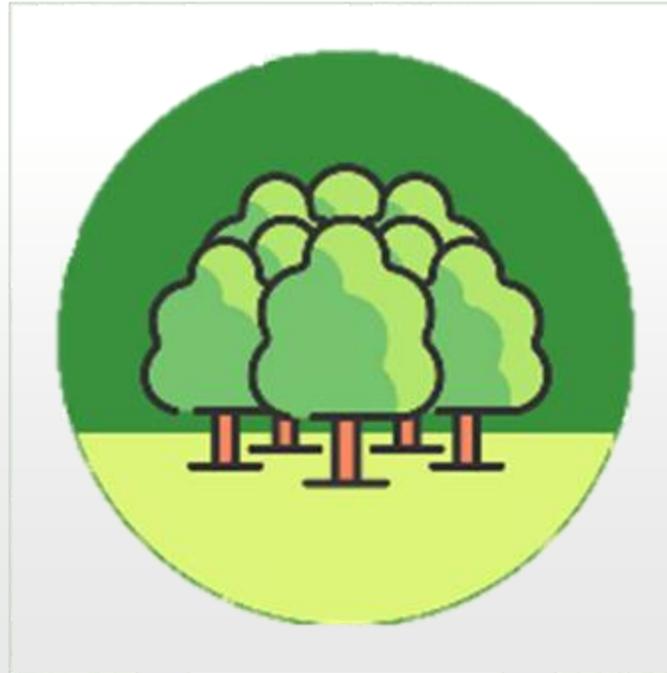

Advancing Urban Reforestation Through Innovation

- Introduction
- Honored collaboration shaping urban reforestation under PNRR.

Ministry of Environment and Energy Security's PNRR Mission Unit partners with UNECE:

- Visionary Project: Barcode Monitoring
- Implementation of barcodes for tracking trees in municipalities revolutionizing urban

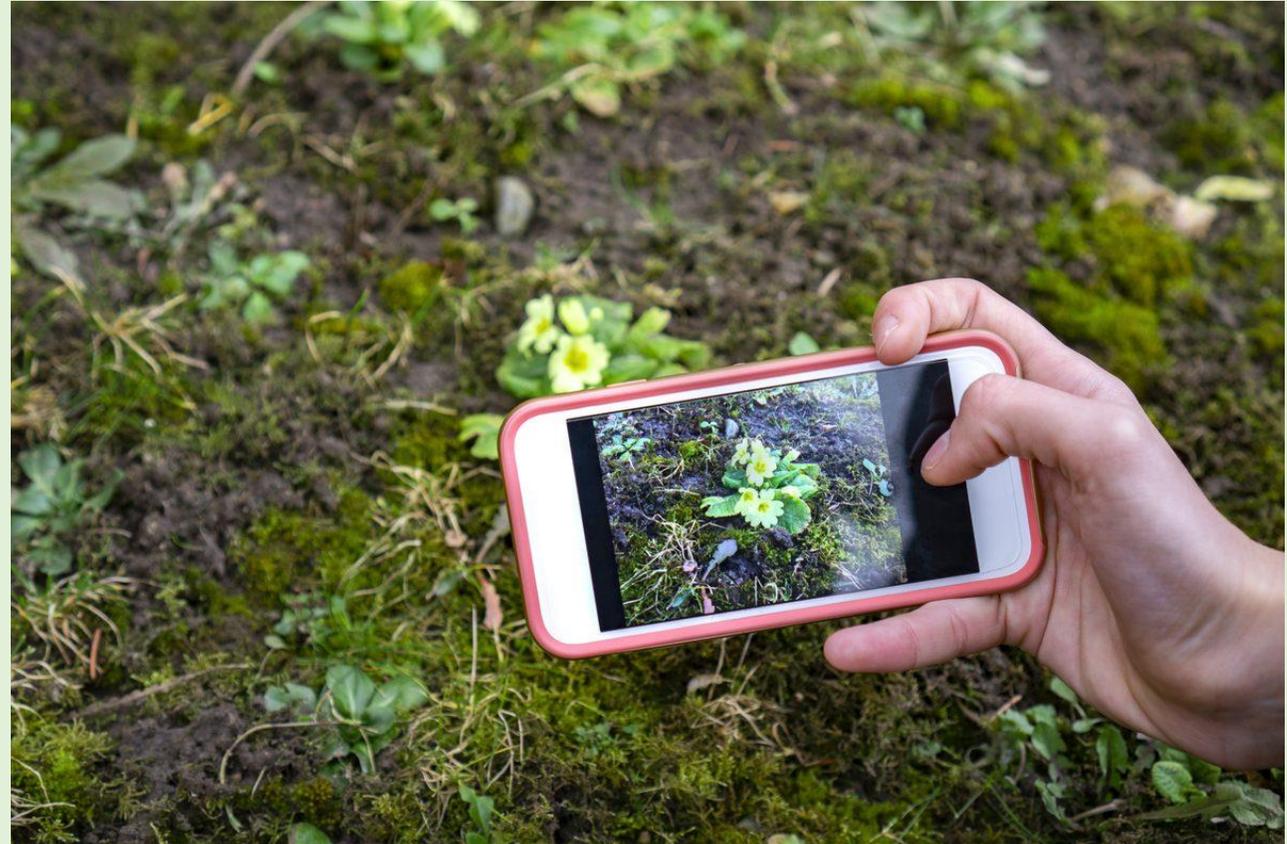

Advancing Urban Reforestation Through Innovation

Target: Unique Tree Identification

- Assigning codes through barcodes:
Centralized Data Management
Recording and monitoring on a dedicated platform.
- Mobile App for On-site Data Collection:
User-friendly for real-time updates
- Periodic Reporting and Data Analysis:
Assessing efficacy and identifying improvements.
- Intuitive User Interface:
Visualization and analysis of tree-related data.

UNECE Collaboration and Benefits: Collaborative Impact on Urban Forestry

- • UNECE's Tree-PAL Proposal
- • Aligned with a holistic approach for urban forestry.

- Operates through Action Lab, Policy Lab, and Communities pillars
- • Our Collaborative Project
- • Action Lab Focus: Direct technical assistance for urban tree planning.

- Policy Lab Alignment: Integrating urban nature into national policies
- • Advantages of Collaboration
- • Knowledge Exchange: Sharing best practices nationally and internationally.

SET A PRECEDENT FOR FUTURE URBAN FORESTATION INITIATIVES
