

Concesión de explotación translates to “**mining concession**”. According to Spanish mining standards, in order to start mining works (mining concession), the applicant must submit the corresponding project to the Spanish Public Administration. This project contains the details of the mining resources, exploitation methods and other technical issues. **If such project complies with technical and environmental regulations, the mining concession is granted, and it gives the holder the right to extract ore from the deposit.**

Best wishes

Importance: High

Dear █

I am sorry but I have to postpone the sending of my reply. █, Valoriza contacted me after I had send my email. He promised to contribute to my reply.

Best wishes

Dear █

This has taken longer than I thought, but I will send you reply as soon as possible and any case within one hour with clarifications of the permits!

Best wishes
