The voice of children

“Article 12 of the United Nations Convention on the Rights of the Child states that children have **the right to express views freely** in all matters affecting them and that the views of the child must be given due weight in accordance with their age and maturity. Efforts should therefore be made to **include children in data collection activities** and to ensure that their voices are reflected in statistics” (Unece, 2021, p.81)
