

UNECE

25 APRIL 2024, 1.45 PM - 2.30 PM. LUNCHTIME
LECTURE PART OF THE UNECE RESOURCE
MANAGEMENT WEEK 2024, TEMPUS ROOM,
PALAIS DES NATIONS, GENEVA, SWITZERLAND

THE TOPIC

THE BEAUTY OF INTERCONNECTED NATURAL RESOURCE ECOSYSTEMS

WHAT IS IT ABOUT?

During this lecture we will explore the opportunities afforded to us when we view an ecosystem in its entirety. This will include not only physical natural resources such as minerals through to vegetation, but also the role of people within these ecosystems.

We will acknowledge where differences in terminology and understanding between different disciplines can lead to misunderstanding, providing some hints and tips on how to improve our collaboration.

The opportunity to use the energy transition as the catalyst and justification to re-think how we visualise and value the land around us, inclusive of rocks, soils, flora, fauna and people is not only fascinating, but fundamental.

BIOGRAPHY

Dr Sarah Gordon is co-founder and CEO of Satarla sustainability and risk management. She is also co-founder of the not-for-profit Responsible Raw Materials and production company Critical Productions. Having started her career as an exploration geologist before moving into risk management and sustainability, Sarah has always been passionate about ensuring that we make sustainability a reality.

Sarah was delighted to represent The Geological Society at COP26 and be a member of the UK Government Expert Committee on Raw Materials. She is also a Trustee of Geology for Global Development, Women in Mining UK, is an Industry Advisor to iCrag, and lectures at Imperial College London.

Registration is free and includes access to UNECE Resource Management Week 2024
