OIOS evaluation of ECE work on Economic Cooperation and Trade

Background and objective

- In 2022, the Office of Internal Oversight Services (OIOS) conducted a regular evaluation of subprogrammes 4 (Economic cooperation and integration) and 6 (Trade)
- Report published in March 2023 ([E/AC.51/2023/5](#))

Findings

- Relevance:
 - The work of ECTD was considered aligned with its mandate.
 - The Division largely responded to specific member States' requests and had “found its niche in a crowded space of trade and economic cooperation”.
- Effectiveness.
 - The Division's work on facilitating norms and standards setting was largely effective.
 - There were numerous instances of norms and standards being adopted into national policies and legislation”, such as in the case of fresh fruit and vegetables standards in the European Union.

Recommendations

ECTD should establish a technical cooperation request tracking mechanism; develop divisional action plans to operationalize ECE strategies on resource mobilization, partnerships, and technical cooperation; and ensure integration of gender, environment, disability inclusion, and human rights considerations in its various workstreams.
