

How to find the way in the legislative maze? New legislative developments which may influence the scope of statistical acts and GLOS

UNECE/EFTA Workshop on Modernizing Statistical Legislation

Barbara Jarosińska

How to find the way in the legislative maze?

Chasing the white rabbit...

- permanent data landscape development and NSOs are (only) one of the players
- **development of legal provisions related to data**
- **coordination and governance competences evolution**

How to deal with the new needs?

Legal revisions or new acts:

- initiated by NSOs
- **based on developments/changes in related legislation**

What do we do in Poland?

- Statistics Poland coordination role in the official statistics domain in relations to legal proposals:
 - key role in relation to purely statistical ones
 - supporting role as for „non-statistical” ones which have some references or elements related to statistics
- How it works?
 - internal cooperation (NSIs departments, regional offices)
 - cooperation with the other public authorities
 - cooperation with the Polish Parliament
 - cooperation with the EU partners
- How long is the negotiations process?

Global/regional patterns

Generic Law on Official Statistics (GLOS)

Guidance on Modernizing Statistical Legislation

**- should we think about introduction there
of legal new-comers now?**

(as for the **new definitions/concepts/
references to new legislation**)

The Handbook on Management and Organization of National
Statistical Systems

Data Act

Data Governance Act

Open data

Data Spaces

Crisis situation

New definitions eg. data, data holder

Soft laws (new/ revised)

Data Stewardship

Exceptional need

Privately held data

Thank you for your attention :-)
