Economic Commission for Europe

Inland Transport Committee

Working Party on the Transport of Dangerous Goods

**Joint Meeting of Experts on the Regulations
annexed to the European Agreement concerning
the International Carriage of Dangerous Goods
by Inland Waterways (ADN) (ADN Safety Committee)**

Forty-fourth session

Geneva, 26–30 August 2024

Item 4 (b) of the provisional agenda

**Proposals for amendments to the Regulations annexed to ADN:
Work of the RID/ADR/ADN Joint Meeting**

Proposals by the informal working group on substances to complete columns (8) to (13) of Table A for new entries

**Transmitted by the Central Commission for the Navigation of the
Rhine (CCNR)* ****

Introduction

1. At the forty-third session of the ADN Safety Committee, the informal working group on substances was invited to draw up a proposal concerning the missing data for the new entries added to Table A, and to examine the need for any other consequential amendments. Document ECE/TRANS/WP.15/AC.2/2024/30, Consolidated list of amendments relevant for ADN adopted by the RID/ADR/ADN Joint Meeting and by the Working Party on the Transport of Dangerous Goods (WP.15) for entry into force on 1 January 2025, was to be used as the basis for that work.

2. The informal working group on substances has drawn up a draft proposal, which has been distributed by e-mail, for review, to participants of the last meeting of the informal working group.

Proposals

3. In conclusion, the informal working group proposes, for the new entries, to add the following data in columns (8) to (13) of Table A (underlined in red):

* Distributed in German by the Central Commission for the Navigation of the Rhine under the symbol CCNR-ZKR/ADN/WP.15/AC.2/2024/50.

** A/78/6 (Sect.20), table 20.5.

(1)	(2)	(3a)	(3b)	(4)	(5)	(6)	(7a)	(7b)	(8)	(9)	(10)	(11)	(12)	(13)

4. On checking the need for any related amendments, it was found that, for the entry UN 3165 AIRCRAFT HYDRAULIC CIRCUIT MOTOR FUEL TANK (containing a mixture of hydrazine anhydrous and monomethyl-hydrazine) (fuel M86), deletion without replacement of the packing group shown in column (4) of Table A means that, in column (12), the number of cones/lights to be carried would have to be adjusted. It is therefore proposed that “2” should be replaced with “0” for this entry in column (12).

5. On more detailed examination, the informal working group on substances found that the additions and modifications proposed in paragraphs 3 and 4 did not entail any related amendments to Table C.
