**Subject:** Intervention from Voci dalla Valle

Dear Fiona,

Thank you once again for giving us a voice in the 83rd Meeting of the Aarhus Convention Compliance Committee this morning. Please find attached our written statement.

We would like to clarify that the Party Concerned, in their intervention, referred to documents and alleged public participation processes that might have taken part for earlier versions of the project which have never been developed. For the current version which varies significantly from the previous ones, no such process has taken place. We furthermore want to confirm that to our knowledge no proper Environmental Impact Assessment has been elaborated for the current version of the project.

Thank you for taking our points into consideration. We are more than happy to clarify any further doubts or questions and look forward to the determinations on preliminary admissibility from the Committee on Friday afternoon.

With best regards,
