# Monitoring inclusive and sustainable well-being in the Netherlands

Presentation for the UNECE Seminar on Measurement of Well-being

Edwin Horlings  
8-9 July 2024

“brede welvaart”

# International statistical framework

An international framework, based on scientific research, provides authority and guarantees neutrality

UNITED NATIONS ECONOMIC COMMISSION FOR EUROPE

Conference of European Statisticians Recommendations on  
**Measuring Sustainable Development**

UNITED NATIONS

# Adapted and expanded framework

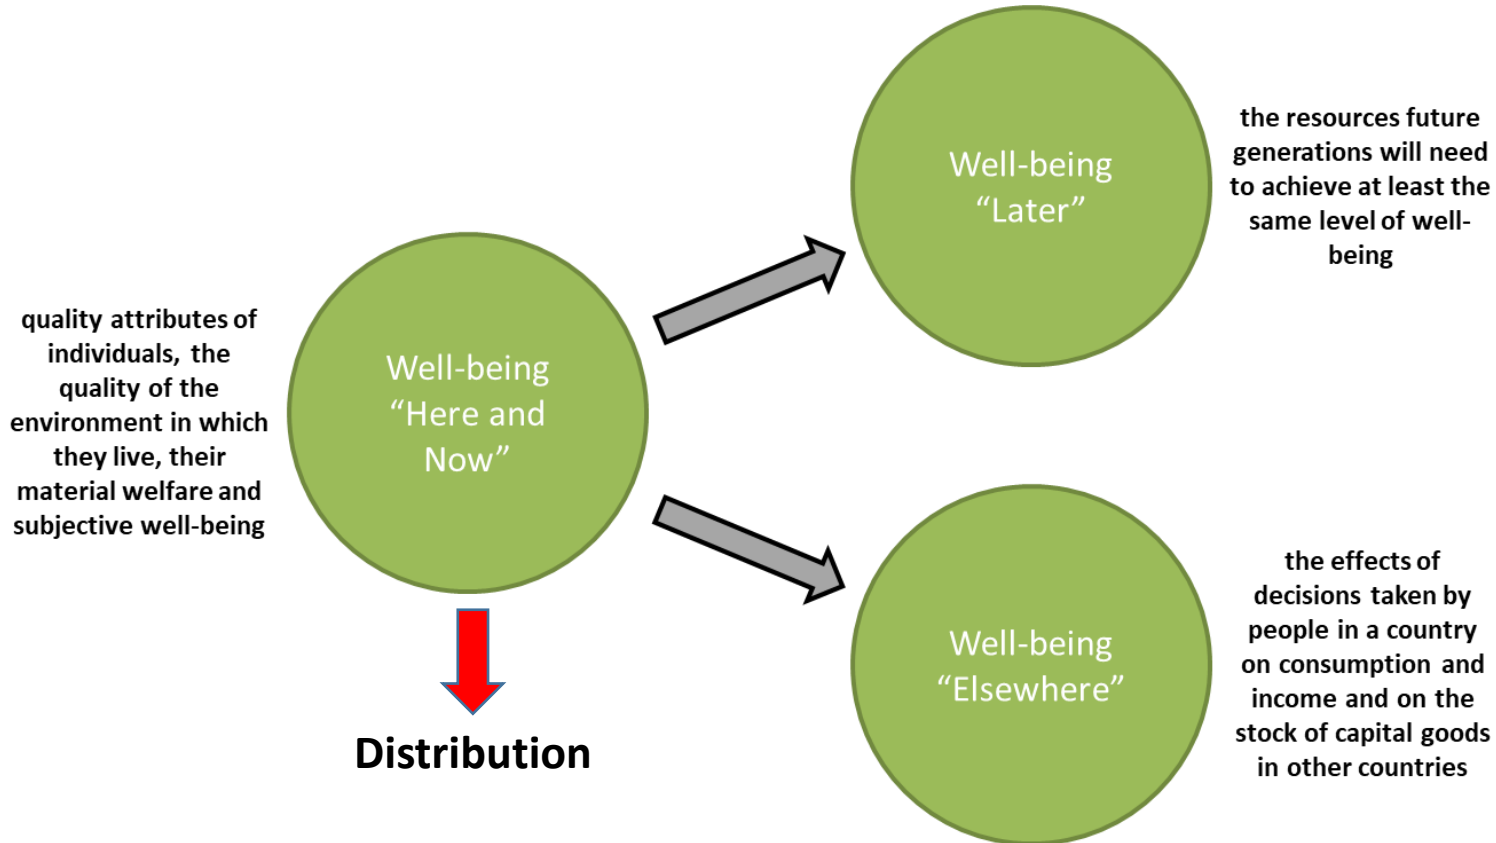

- The CES Recommendations are the basic framework
- Need to adapt and expand the framework
  - Reduction of themes to more manageable proportions
  - Integration of the Sustainable Development Goals
  - Interpretation of statistical outcomes
- Technical and methodological challenges
  - Selection criteria for indicators
  - Decision rules for observations
  - Visualisations

# “Brede welvaart”

(inclusive and sustainable well-being)

Well-being concerns the quality of life here and now as well as the extent to which this quality is achieved at the expense of later generations or of people in elsewhere in the world.

# Dimensions of well-being

# Integrating the SDGs

- an international agenda and framework, co-signed by Dutch government
- provide statistics on policy-relevant themes without having to interpret government policy

# Framework for SDG indicators in context

- **Resources and opportunities:** rights, freedoms and other possibilities that people have; capacity of infrastructures and systems; access to and affordability of services
- **Use:** number of people, households, companies who use resources and opportunities, including aspects of behavior
- **Outcomes:** positive and negative effects of use
- **Subjective assessment:** people's subjective assessment of outcomes, including satisfaction, concerns, expectations

### Resources and opportunities

What resources are used to maintain and improve the healthcare system? Is healthcare affordable and accessible?

### Use

What behavior do people exhibit that affects their health? How do they use health care?

### Subjective assessment

Are people satisfied with their own health and with the Dutch healthcare system?

### Outcomes

What is the current physical and psychological health of the population and the quality of care?

# Visualisations

Trends in well-being and SDG's: Here and now

## Key

Medium-term trend (8 years)

Change (most recent year)

Improvement in well-being

No change

Deterioration in well-being

Insufficient data (quality)

# Brede-welvaarttrends en SDG's (BWT): hier en nu

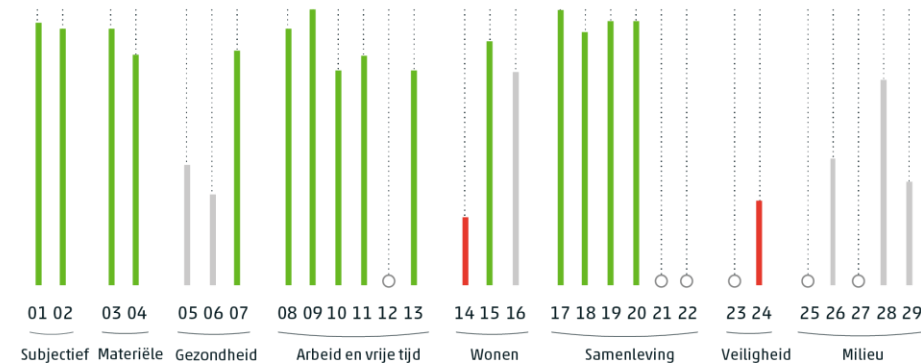

## Legenda

## Positie in EU

De balken geven de positie aan van Nederland in de Europese Unie per indicator.

## Legenda

- 01 Tevredenheid met het leven
- 02 Ervaren regie over het eigen leven
- 03 Mediaan besteedbaar inkomen
- 04 Individuele consumptie
- 05 Gezonde levensverwachting mannen
- 06 Gezonde levensverwachting vrouwen
- 07 Overgewicht bij volwassenen

- 08 Langdurige werkloosheid
- 09 Nettoarbeidsparticipatie
- 10 Hooggeleide bevolking
- 11 Tevredenheid met vrije tijd
- 12 Tijdsverlies door files en vertraging
- 13 Tevredenheid met werk (werknemers)
- 14 Totale woonquote (huur en koop)
- 15 Thuiswonende jongvolwassenen (25-29 jaar)
- 16 Tevredenheid met woning

- 23 Vaak onveilig voelen in de buurt
- 24 Slachtofferschap van traditionele criminaliteit
- 25 Beheerde landnatuur in Natuurnetwerk Nederland
- 26 Kwaliteit van zwemwater binnenwateren
- 27 Stikstofdepositie en landnatuur
- 28 Stedelijke blootstelling aan fijnstof (PM<sub>2.5</sub>)
- 29 Milieuproblemen

- 17 Contact met familie, vrienden of buren
- 18 Inspraak en verantwoordingsplicht
- 19 Vertrouwen in instituties
- 20 Vertrouwen in andere mensen
- 21 Ontwikkeling normen en waarden
- 22 Vrijwilligerswerk

# Dimensions of the CES Recommendations

*“here and now”*

*“later”*

*“elsewhere”*

# Dashboards

- Sparse: as little information as possible to make understanding easier for users
- Colours to signal significant observations
- No composite index

## Housing

## Society

# Distribution of well-being

- Individual indicators by sex, age, education level, country of origin/birth
- Cumulative differences for c. 7,000 individuals

Highest completed level of education

# Regional well-being

12 provinces

40 regions

345 municipalities

3 Caribbean islands

# From indicators to a narrative

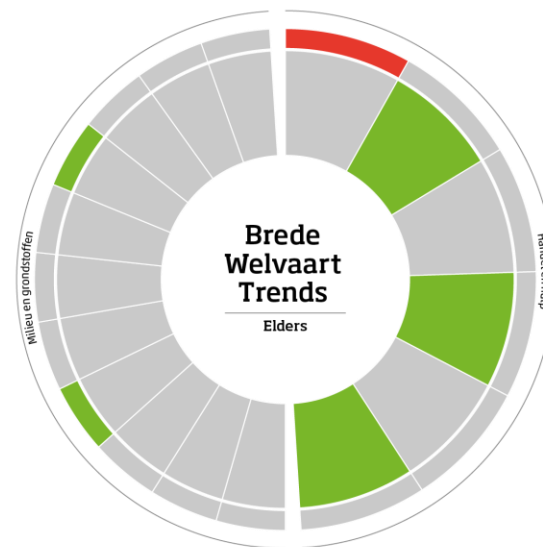

# Number of indicators

*“here and now”*  
**29**

*“later”*  
**22**

*“elsewhere”*  
**17**

*Everything included (SDGs, resilience) around **300 indicators***

# Layering conclusions

MBW&SDGS IN A NUTSHELL  
3-pager  
conclusions about concepts

SUMMARY  
short, easier to read  
indicators linked to concepts

MAIN OBSERVATIONS  
bullets, shorter, less complicated  
indicators linked to concepts

FULL TEXT  
detailed description of indicators  
expert knowledge, nuance, complicated

# Main conclusions in 2024

The Netherlands is a social and prosperous society 'here and now'

- A close-knit society with high subjective well-being, high material prosperity and a lot of work
- Not everyone benefits from high material prosperity

With current developments, the next generation will achieve lower well-being 'here and now'

- Natural capital is deteriorating
- The economy is only slowly becoming more sustainable
- Essential institutions appear to be at a standstill
- Young adults have been lagging behind for two years in a row

# Critical evaluation (the seven-year itch)

# Publications

# First observations

- Usefulness and accessibility in relation to usage
- ‘Indicator creep’
- Match with major societal challenges and themes
- Communicating about recognisable groups
- Incomparable international frameworks

# Four capitals of well-being 'later'

- Economic capital, Natural capital, Human capital, Social capital are ubiquitous
- Hard to explain what they mean in real life
- Appear to have a strong economic bias
- Social capital is a reservoir for everything not included in economic, human or natural capital

# 'Top-down' bias

## Subjective well-being

**83.4%**

of the population gave their life a score of 7 or more in 2022

**2<sup>nd</sup>**

out of 19  
in EU  
in 2020

Satisfaction with life

**52.6%**

feel in control (scores 4 or 5 on a scale of 1-5) in 2022

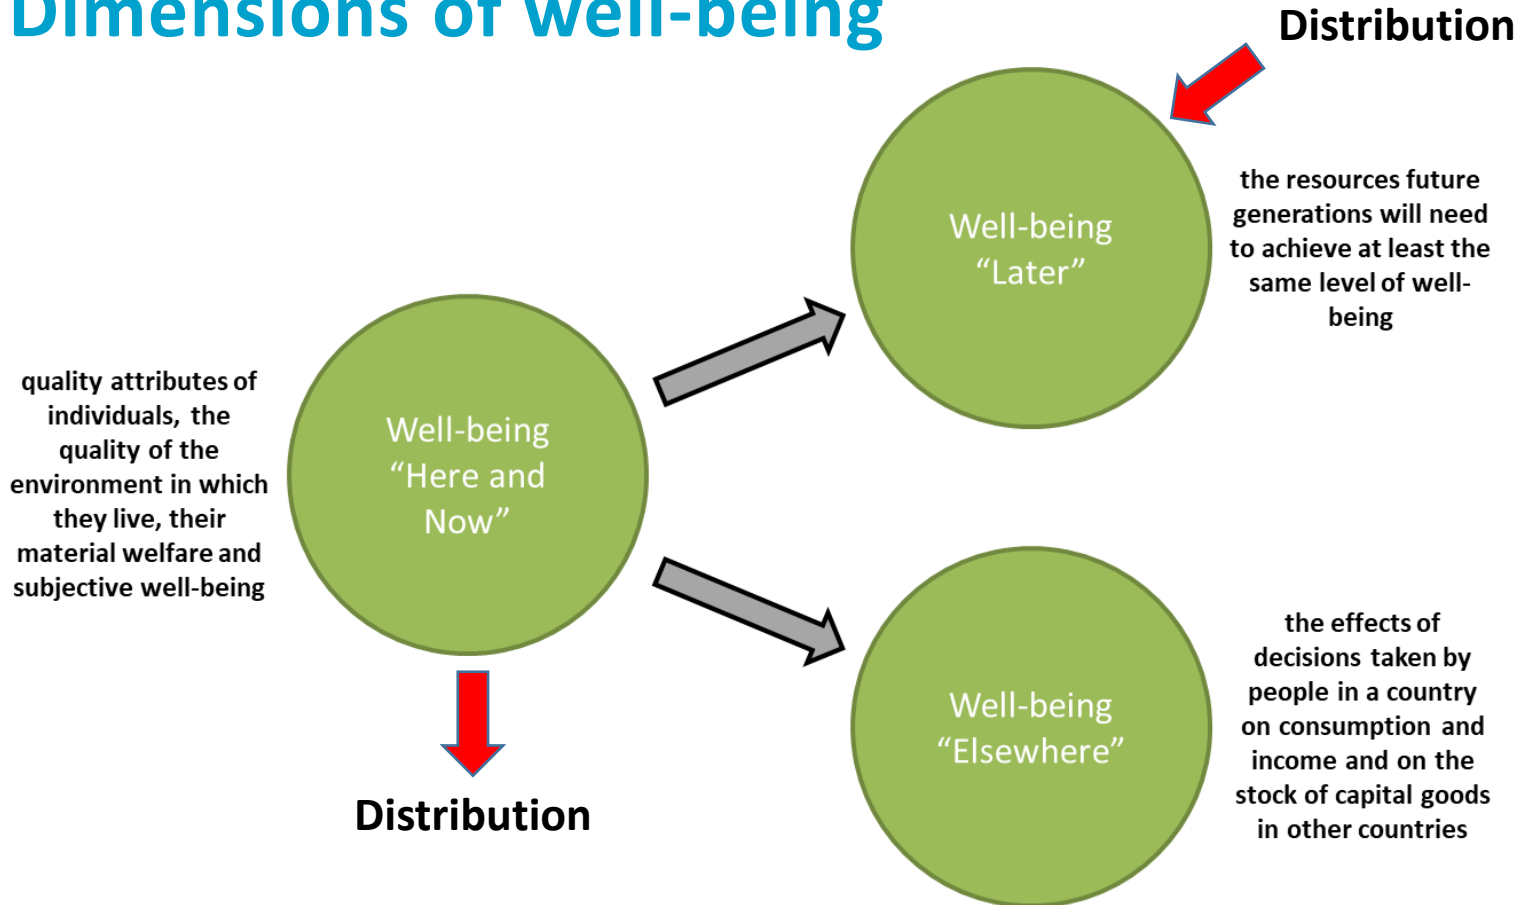

**3<sup>rd</sup>**

out of 27  
in EU  
in 2017

Feeling in control of own life

- Pay more attention to deprivation
- Measure well-being of recognisable groups (e.g. old-age pensioners or households living on social security)

# Dimensions of well-being

# Statistical framework of the future
