# Working Procedures

## Project development

- Largely inspired by the UN/CEFACT *Open Development Process*
- Types of deliverables (Recommendations, Guidelines, Proposals for future policies, Glossaries, CRA)
- Three steps:
  - Project inception (idea based on active PoW put forward, circulated to leadership for input; WP.6 Bureau approves to move forward and appoints leader; six experts from at least three different countries)
  - Project development (must meet at least once virtually per semester and report on progress during the annual meeting of relevant subgroup)
  - Project finalization (final draft circulated to leadership for comments; public review; final draft after public review; project team disbanded)
- Secretariat checks against *UN Editorial Manual*
- Presentation of final deliverable to the WP.6 Annual Session
- Subgroups should monitor all deliverables to ensure they are up-to-date

# Participating in WP.6 meetings

- Experts are welcome to participate in WP.6 activities as observers (ECE/CTCS/WP.6/2022/11, section III)
- Membership of groups is comprised of government experts and may also include eminent specialists in the relevant field (ECE/EX/2/Rev.1)
- Members and observers participate in WP.6 activities as volunteers in their own right and do not represent any specific interests of their countries or institutions (ECE/CTCS/WP.6/2023/12, §11)

# Intellectual property rights policy

- Guiding principle:
  - The main beneficiary of the standards and recommendations are the Member States.
  - In order to promote the widest adoption of the WP.6 deliverables, they can be implemented freely and without any restrictions.
- All new intellectual property generated through the development of WP.6 deliverables belongs to ECE.
  - As a condition for participating in a deliverable drafting team, drafting team members agree to waive their rights to enforce any prior IPRs used in the WP.6 deliverables against any party using the deliverables.
- ECE and the members of drafting teams have no duty of confidentiality with respect to any information transferred between them.
- For more information, see: [ECE/CTCS/WP.6/2022/11](#), Annex

# WP.6 inclusive meetings guidelines

- Contributions
  - Strive for balanced contributions from both women and men participants
  - Keep individuals' speaking time balanced (avoid monopolizing)
- Interruptions
  - Avoid interrupting the speaker
  - Avoid talking over each other
- Coded language
  - Be mindful of coded language that may perpetuate gender stereotypes
    - Example: Are women described as aggressive for behavior that would lead to a man being considered confident?
- Recognize contributions

For more information, see *Guidelines on Developing Gender-Responsive Standards* (ECE/TRADE/472)
