Draft programme of work of the housing and land management component of Housing, Land Management and Population subprogramme for 2025

Note by the Secretariat

Summary

This document presents a draft programme of work of the housing and land management component of the Housing, Land Management and Population subprogramme (“Housing and Land Management component of the subprogramme”) for 2025. It is submitted according to A/78/6 (Section 20); ECE/HBP/219, para 113 (d).

The Committee on Urban Development, Housing and Land Management is invited to adopt this document and transmit it to the United Nations Economic Commission for Europe (ECE) Executive Committee for its approval.

I. Introduction

1. The present document sets out the draft programme of work of the housing and land management component of the Housing, Land Management and Population subprogramme (“Housing and Land Management component of the subprogramme”) for 2025. The Committee on Urban Development, Housing and Land Management (“the Committee”) is invited to adopt it and transmit it to the Executive Committee for approval. Any subsequent additional, discontinued or carried over outputs will be reflected in the Umoja system used by the United Nations Secretariat for planning, monitoring and reporting of the implementation of the programme.
2. The draft programme of work applies a results-based management (RBM) approach, a broad management approach which establishes a logical relationship between the hierarchical results (deliverables – outcomes – impact) known as “results chain”, the resources (human and financial) known as “inputs”, and the external factors (strategic, governance, operational, financial) which can prevent from achieving the objective.
3. The objective, the strategy, the planned results and the deliverables in the draft programme of work correspond to those contained in the Economic Commission for Europe (ECE) proposed programme budget for 2025 (A/79/6 (Sect. 20)). The work of the subprogramme is aligned with the Sustainable Development Goals (SDGs). In attaining its objective, the subprogramme will continue to build on cross-sectoral collaboration with other subprogrammes in relevant ECE areas where multiple SDGs converge, including on the high-level themes designated by the Commission sessions. This type of collaboration enables the subprogramme to maximize existing synergies, increase the efficiency of its work and have a multiplying effect on the impact of its actions to support countries to implement SDGs. The deliverables of the subprogramme fall into the following main categories: (a) facilitation of the intergovernmental process and expert bodies; (b) generation and transfer of knowledge, including technical cooperation projects, training events, seminars, workshops, and publications; (c) other substantive deliverables; and (d) communication deliverables.
4. The details of the proposed publications are provided in Annex I. The overall ECE legislative mandates and those specific for the subprogramme are listed in Annex II.

II. Objective

5. The objective, to which the subprogramme contributes, is to strengthen member State-owned and city-level programmes and policies promoting decent, adequate, affordable, energy-efficient and healthy housing for all, smart sustainable cities, sustainable urban development and land management.

III. Strategy

6. The responsibility for the subprogramme is vested in the Forests, Land and Housing Division.
7. The strategy of the subprogramme is based on the implementation of the core interlinked functions, namely, international policy dialogue, normative work and capacity-building and the sharing of best practices and lessons learned in all areas of the subprogramme’s work.
8. To contribute to the objective, the housing and land management component of the subprogramme will:
 - (a) Support member States’ national, regional and local governments and other key stakeholders in the review of progress in achieving Sustainable Development Goals 3, 5, 7, 9, 11 and 12, and build their capacities for the implementation of measures to accelerate achieving the Goals through technical assistance projects, thematic studies, training, exchange of experiences and best practices and policy advice on: affordable climate-neutral and decent housing for all; housing finance; smart sustainable cities, digitization in and

innovative financial mechanisms for cities; land administration and management, including informal settlements; and urban strategies and programmes that integrate climate change measures and promote the climate neutrality of buildings;

(b) Support local governments in the development of the evidence-based policies on sustainable housing and urban development through the application of the ECE/International Telecommunication Union key performance indicators on smart sustainable cities, indicators on urban economic resilience and the United Nations system-wide urban monitoring framework; and in the preparation of smart sustainable cities profiles and Sustainable Development Goals voluntary local reviews, based on the assessments of achievement of the Goals;

(c) Provide assistance to national and local governments in the development of evidence-based urban and housing policies through the preparation of country profiles on urban development, housing and land management;

(d) Support the strengthening of the capacities of national and local governments in the design, implementation and monitoring of urban resilience plans and sustainable urban infrastructure development projects, including those that provide support to the most vulnerable persons, especially those in informal settlements;

(e) Promote multi-stakeholder partnerships and innovative financing instruments to unlock further financing and partnerships for the implementation of these plans and projects, in collaboration with the Geneva United Nations Charter Centres of Excellence;

(f) Subject to approval by the ECE Executive Committee, organize the fifth Forum of Mayors to discuss the challenges for sustainable housing and urban development.

9. The above-mentioned work in the area of housing and land management is expected to result in:

(a) Improved national and local policies for housing affordability, adequacy and accessibility for all; the energy efficiency and climate neutrality of buildings; and sustainable and resilient urban development;

(b) Increased capacity of national and local governments for the development of housing and urban development policies and programmes, which integrate the concepts of the 2030 Agenda, the Geneva UN Charter on Sustainable Housing and relevant best practices, including those developed and shared by the Geneva UN Charter Centres of Excellence and the action plan titled *Place and Life in the ECE – A Regional Action Plan 2030: Tackling Challenges from the COVID-19 Pandemic, Climate and Housing Emergencies in the Region, City, Neighbourhood and Homes*;

(c) Improved understanding by city authorities of their socioeconomic development priorities through the preparation of smart sustainable cities profiles and voluntary local reviews of the achievement of the Sustainable Development Goals, based on the revised guidelines for the development of voluntary local reviews in the ECE region and using ECE/International Telecommunication Union key performance indicators for smart sustainable cities, urban economic resilience indicators and a United Nations system-wide urban monitoring framework;

(d) Increased capacity of land administration authorities to develop national land administration and management systems based on thematic studies and capacity-building activities in land administration and management.

(e) More effective local urban development and housing policies and related resilience plans, in particular for people living in informal settlements.

IV. Planned results for 2025

Result 1: acceleration of the city-level implementation of the Sustainable Development Goals

10. Progress towards the objective and the target for 2025 are presented in the performance measure below (see Table 1).

V. External factors

13. The Housing and Land Management component of the subprogramme is expected to achieve its objectives on the assumption that:

- (a) member States continue to support the work of ECE and give high priority to regional and subregional cooperation and integration, with a view to achieving sustainable development;
- (b) all relevant stakeholders at the national level have the political will to cooperate in implementing the ECE legal instruments, norms and standards; and
- (c) voluntary resources continue to be available.

VI. Deliverables to be implemented in 2025

14. Table 3 below lists all deliverables of the housing and land management component of subprogramme 8.
