Compliance of RINA with EN ISO/IEC 17020:2021 (except 8.1.3)

Dear Mrs. Mireles Diaz,

With reference to the evidence of compliance with ISO/IEC 17020:2012, which has been requested to the Classification Societies during the 43rd session of the ADN Safety Committee under point VI.E.1, please find attached below:

- copy of the Annual DEKRA SoC endorsed by IACS valid for 2024,
- current DEKRA ISO 9001 certificate and
- IQARB 2024 FS.

We kindly ask to excuse our delayed reaction and consider the documents for evaluation during the upcoming 44th session.

The DEKRA SoC provides evidence that RINA Marine Management System is in compliance with the IACS QSCS; as you can read from the SoC, the IACS QSCS is based on, amongst other standards, the ISO 17020.

The DEKRA ISO 9001 certificate provides evidence that RINA Germany is among the different RINA legal entities providing Marine Services for seagoing ships and inland waterways ships.

As further evidence that RINA Marine Quality Management System complies with the reference IACS QSCS standard, please find the annual IQARB Statement of Fact.

International Quality Assessment Review Body

FACTUAL STATEMENT

IQARB is an advisory body that has been established to review the certification process of the quality management systems of IACS Classification Societies.

IQARB has reviewed the adequacy of IACS Quality System Certification Scheme (QSCS) in meeting the objectives set before Classification Societies for compliance with the requirements of the RO Code, in relation to the relevant provisions of IMO mandatory instruments, such as SOLAS 1974 regulations I/6, II-1/3-1 and XI-1/1, etc. as well as the III Code. It has been found that the QSCS is adequate in this regard.

This factual statement takes into account the performance of Accredited Certification Bodies (ACBs), who have audited the Class Societies against the criteria of QSCS. In issuing this factual statement the IQARB has reviewed the performance data and nature of findings of the ACB audit of the Class Society, including the robustness and effectiveness of the agreed corrective actions that classification societies have put in place to address the findings that were identified during the ACB audits.
