Economic Commission for Europe

Administrative Committee for the TIR Convention, 1975

Technical Implementation Body

Eighth session

Geneva, 8 October 2024

Item 4 (b) of the provisional agenda

eTIR international system:

Connection of national customs systems to the eTIR international system

Annexes to the possible technical solution for the interconnection of the countries of the Eurasian Economic Union with the eTIR international system*

Note by the secretariat

Background

1. While preparing a possible technical solution for the interconnection of the countries of the Eurasian Economic Union (EAEU) with the eTIR international system, the secretariat considered the requirement of the EAEU for additional data.
2. On the basis of the information received from the various consultants, the secretariat prepared Annex I, which contains the latest available message structure of the EAEU transit declaration in line with Article 107 of the Customs Code of the EAEU (<https://www.alt.ru/codex-2018/R3/GL17/ST107/>). Annex II presents a draft mapping of the I7 message with the EAEU transit declaration data elements.
3. The Member States of the EAEU may wish to confirm that the structure of the transit declaration as presented in Annex I is correct and help the secretariat to identify which mandatory data elements are missing from the E9 message and can be reconsidered today as additional data elements. Countries of the EAEU may also wish to confirm or correct the draft mapping of the I7 message with the EAEU transit declaration.

* The present document was submitted to the conference services for processing after the deadline as a result of consultations with the Member States.
