

86th Session

INLAND TRANSPORT COMMITTEE

ITC-related matters

Working Party on Noise and Tyres (GRBP) 80th session, GRBP-80-37 Geneva, 17-20 September 2024

86th Annual Session of the ITC

Highlights

- Extensive high-level participation: Engagement from Africa, Asia, Europe, Latin America, Middle East and North America
- 363 participants from 73 countries (35 non-ECE)
- Adoption of the ITC Strategy on Reducing Greenhouse Gas Emissions from Inland Transport ('ITC Decarbonization Strategy')
- High-level side event on the ITC Forum for Road Safety
- High-level side event of the United Nations Special Programme for the Economies of Central Asia (SPECA) on implementation of the SPECA Roadmap for the Digitalization of Multimodal Data and Document Exchange along the Trans-Caspian Transport Corridor
- Side event on "Towards Sustainable Transportation: Best Practices, Challenges and Solutions"
- ITC Roundtable "Fostering the digital and green transition for inland transport in support of the Sustainable Development Agenda"

ITC Decarbonization Strategy

& the "big picture" of decarbonizing Transport

Eighty-sixth session Geneva, 20-23 February 2024 Item 4 of the provisional agenda Meeting on the adoption of the Inland Transport Committee Strategy for Reducing Greenhouse Gas Emissions from Inland Transport for Government Delegates only with the Participation of the Chairs of the Committee's Subsidiary Bodies

> Draft Inland Transport Committee Strategy on Reducing Greenhouse Gas Emissions from Inland Transport

Note by the secretariat

- The present document contains the draft Inland Transport Committee (ITC) Strategy on Reducing Greenhouse Gas Emissions from Inland Transport, which was developed by the secretariat in close cooperation with the Committee's subsidiary bodies and the ITC Bureau in response to a request by the Committee at its eighty-fifth session (ECE/TRANS/328,
- 2. The draft integrates the contributions from the Committee's subsidiary bodies. On 6 September 2023, a thematic discussion was held under the auspices of the Working Party on Transport Trends and Economics (WP.5), which gathered informal views by experts from member States, intergovernmental and non-governmental organizations. At the initiative of the Committee's Chair, an informal online meeting was held on 11 September 2023, with the Chairs and Vice-Chairs of the Committee's subsidiary bodies, to support information exchange and encourage the provision of contributions. The pre-zero draft was also shared with the United Nations Framework Convention on Climate Change (UNFCCC) for review and comments and was reviewed by the ITC Bureau. The zero draft was shared with Member States for comments, which have been incorporated in draft 1. The present draft was finalized
- The Committee is invited to welcome and adopt the Strategy.
- The present report was submitted to the conference services for processing after the deadline as a esult of consultations with the Member State.

- The International Maritime Organization (IMO) adopted an initial strategy on reduction of GHG emissions from ships in 2018, which was updated in July 2023
- The International Civil Aviation Organization (ICAO) set a long-term aspirational goal of net zero carbon emissions from aviation by 2050 in 2022, following the setting of previous global aspirational goals
- The UNECE Inland Transport Committee (ITC) adopted the ITC Decarbonization Strategy in February 2024, with the aspirational goal of net zero greenhouse gas emissions from inland transport by **2050**.

Draft Inland Transport Committee Strategy on Reducing Greenhouse Gas Emissions from Inland Transport

Note by the secretariat

- The present document contains the draft Inland Transport Committee (TTC) Strategy
 on Reducing Greenhouse Gas Emissions from Inland Transport, which was developed by the
 secretariat in close cooperation with the Committee's subsidiary bodies and the ITC Bureau,
 in response to a request by the Committee at its eighty-fifth session (ECE/TRANS/328,
 para. 60(a)).
- 2. The draft integrates the contributions from the Committee's unbridiary hookes. On 6 September 2023, a thematic discussion was hold under the ampices of the Working Party on Transport Trends and Economics (WP.S), which gathered informal views by experts from member States, integrovermental and non-governmental organizations. At the initiative of the Committee's subdising hodies, to support information exchange and encourage the provision of contributions. The pre-zero draft was also shared with the United Marions Framework Convention on Climate Change (unNet Corp.) which we have also shared with the United Marions Framework Convention on Climate Change (UNNECC) for review and comments and was reviewed by the ITC Bureau. The zero draft was shared with Member States for comments, which have been incorporated in draft 1. The present draft was finalized.
- The Committee is invited to welcome and adopt the Strategy.
- * The present report was submitted to the conference services for processing after the deadline as a result of consultations with the Member State.

- Aims to support Member States' efforts to reduce GHG emissions from inland transport, which accounted for 72% of global transport GHG emissions in 2019
- Aspirational goal of net zero GHG emissions from inland transport by 2050
- Provides integrated solutions for the reduction of GHG emissions from the inland transport sector
- Draws from an effective avoid-shift-improve decarbonization framework, taking into account that there is no one-size-fits-all prescription
- Contains 33 initial, coordinated actions for the ITC and its subsidiary bodies
- Recommends actions the inland transport sector of countries may wish to take

Draft Inland Transport Committee Strategy on Reducing Greenhouse Gas Emissions from Inland Transport

Note by the secretariat

Summar

- The present document contains the draft Italiand Transport Committee (TIC) Strategy on Reducing Greenhouse Gas Emissions from Inland Transport, which was developed by the secretariat in close cooperation with the Committee's subsidiary bodies and the ITC Bureau, in response to a request by the Committee at its eighty-fifth session (ECE/TRANS/328, para. 60(a)).
- 2. The draft integrates the contributions from the Committee's subsidiary bodies. On 6 September 2023, a thematic discussion was held under the auspices of the Working Party on Transport Trends and Economics (WP.5), which guthered informal views by experts from member States, intergovernmental and non-povernmental organizations. At the initiative of the Committee's Chair, an informal online meeting was held on 11 September 2023, with the Chairs and Vice-Chairs of the Committee's subsidiary bodies, to support information exchange and enourage the provision of contributions. The pre-zero farth was also shared with the United Nations Framework Convention on Climate Change (UNFCC) for review and comments and was reviewed by the TIC Bureaus. The zero draft was shared with Member States for comments, which have been incorporated in draft 1. The present draft was finalized following another round of consultation with Member States.
- 3. The Committee is invited to welcome and adopt the Strategy

Vision

 Taking action towards the aspirational goal of net zero GHG emissions from inland transport by 2050

Mission

- Contribution through enhanced regulatory support, intergovernmental policy dialogue and increased coordination and partnership
- Application of a broad decarbonization framework, drawing on avoid-shiftimprove measures

Initial ITC Climate Action Plan with milestones

- Contains initial action items for ITC and its subsidiary bodies to drive the change towards achieving the vision, mission and strategic objectives for curbing GHG emissions from inland transport
- Joint and coordinated action among subsidiary bodies
- Indicative target years for implementation of each action
- **Living document**: Biennial reviews to allow for adjustments and additional actions proposed by subsidiary bodies and for removal of completed actions
