Simplifying the Reuse of Concepts Across Organisations

BFS – IOS – I14Y interoperability platform
Geneva, 21.10.2024

Tasks of the interoperability office

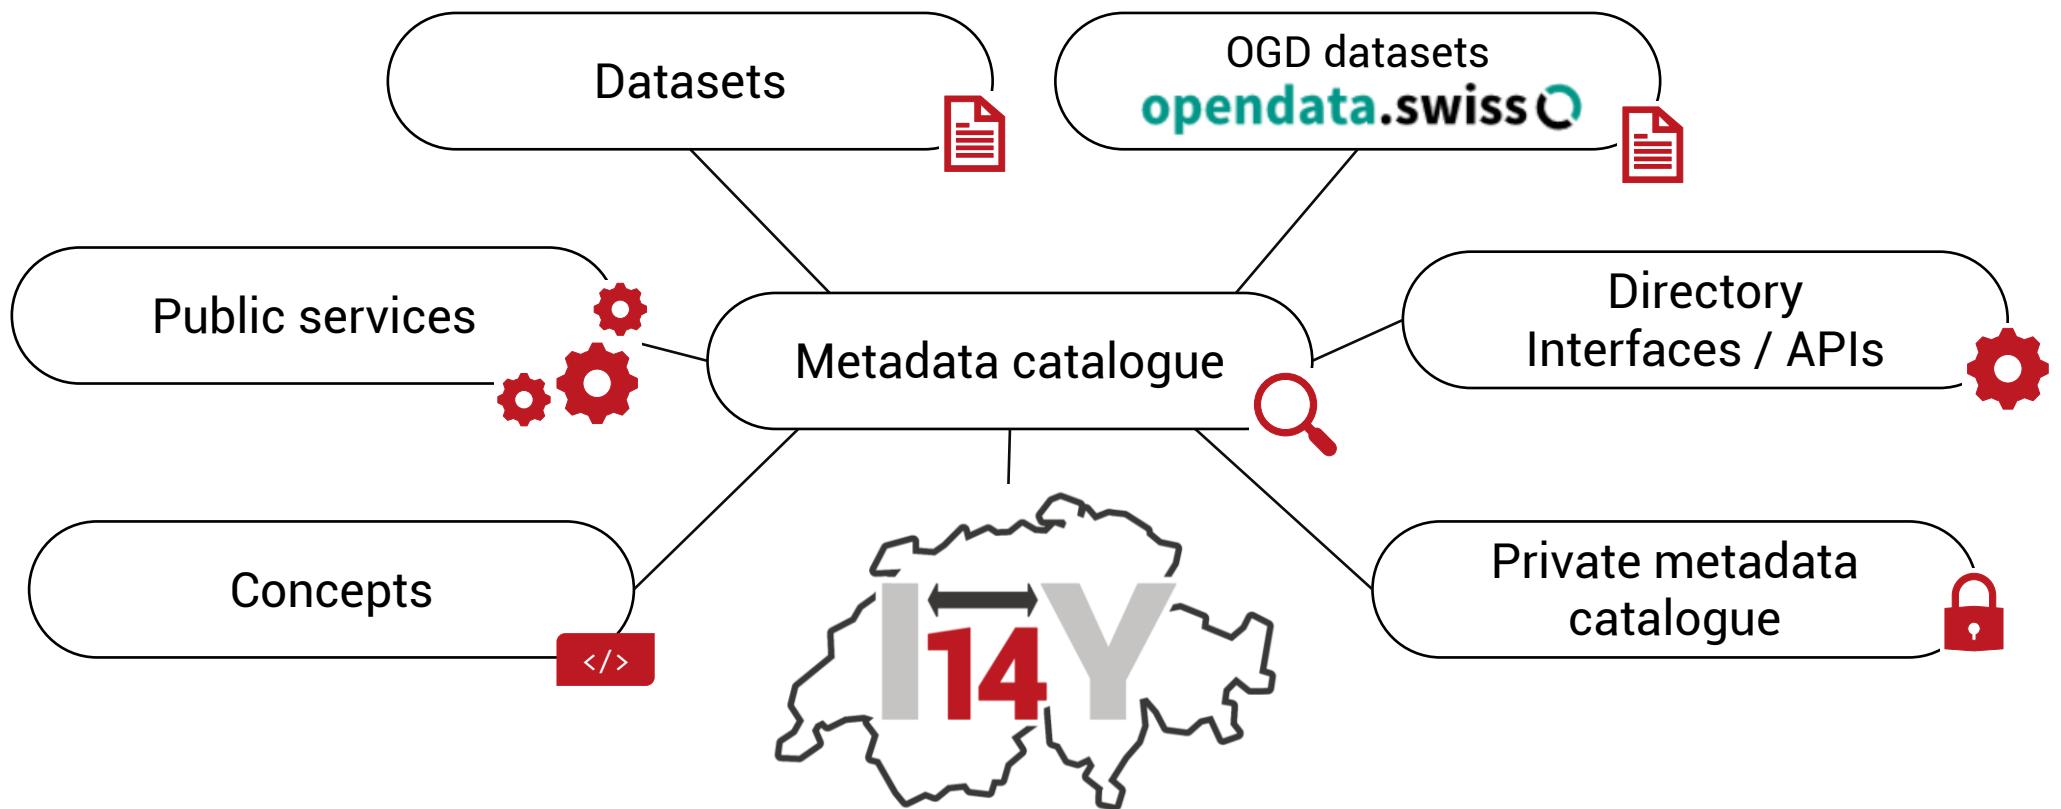

- Advises offices, departments, cantons, municipalities, etc. on the harmonisation of their administrative data
- Supports and coordinates standardisation and data harmonisation throughout the public administration
- Develops and operates the I14Y interoperability platform (<https://www.i14y.admin.ch>)

EMBAG

Art. 14 Interoperability platform

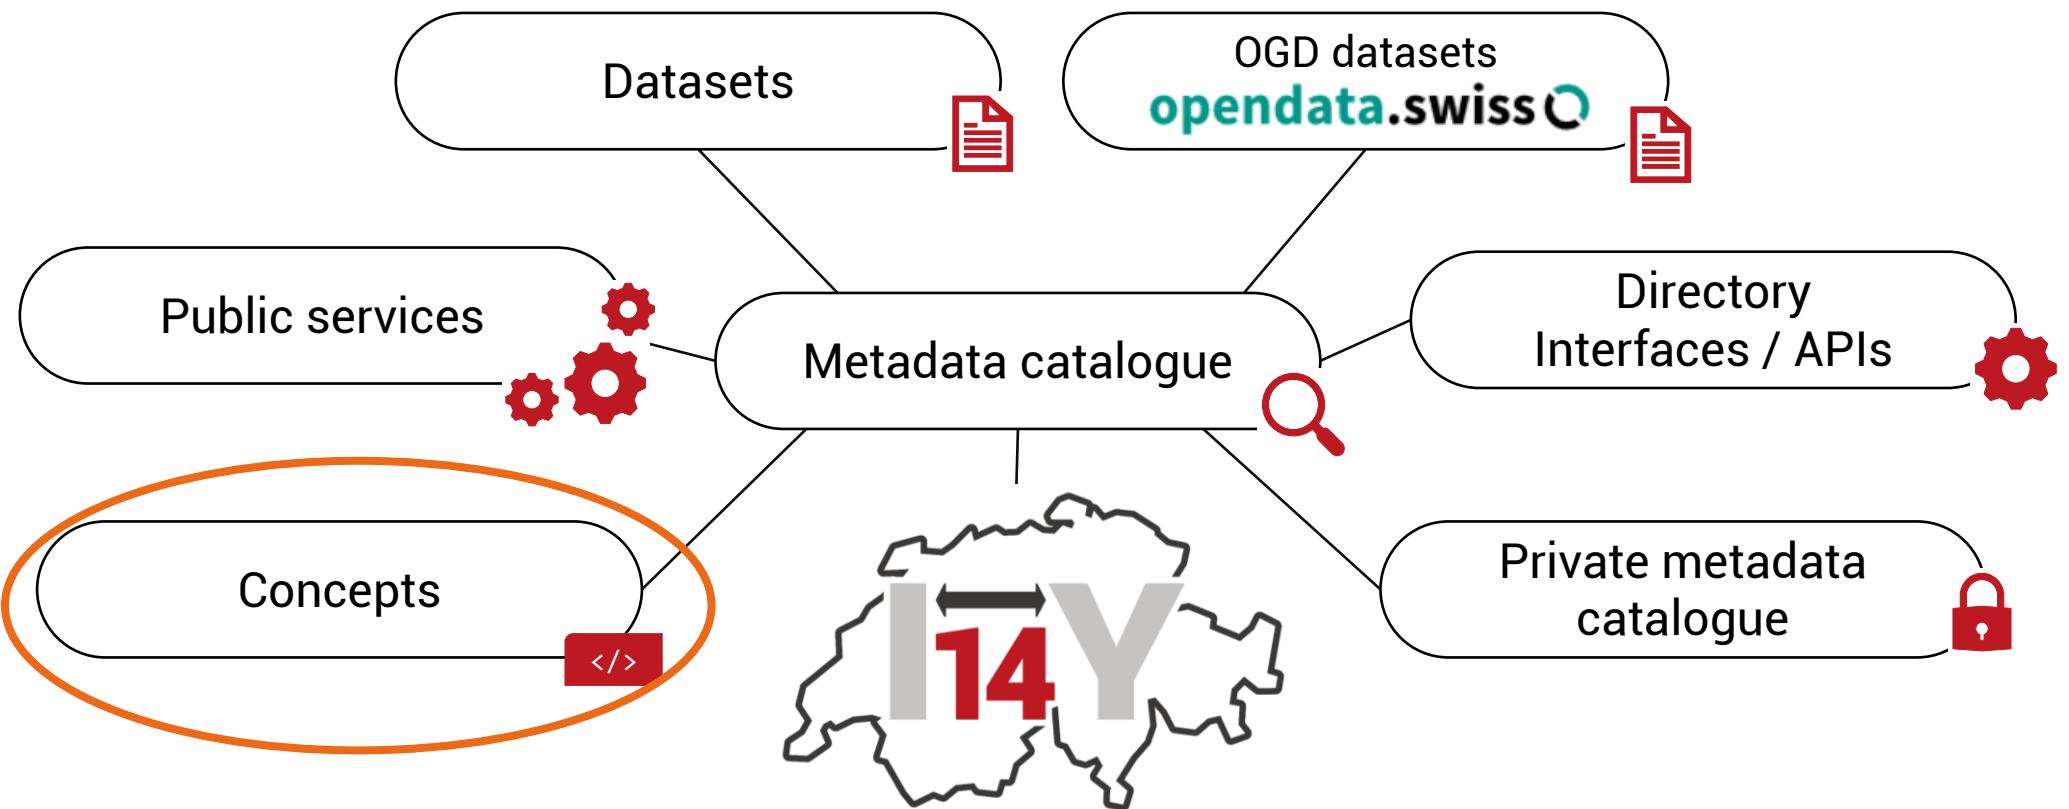

1. The Federal Statistical Office operates a public platform on the Internet on which the following information in particular is easily accessible either directly or via referencing in electronic form:
 - a) the metadata of structured electronic data sets of the Federal Administration, including the metadata of Open Government Data in accordance with Article 10;
 - b) a list of the interfaces (APIs) referred to in Article 13 and the information necessary for their use, provided that information security is not jeopardised;
 - c) an overview of the services available electronically offered by public authorities.

The I14Y functions

I14Y is based on Data Catalog Vocabulary (DCAT)
I14Y offers all services via interface/API (API-first)

The I14Y functions

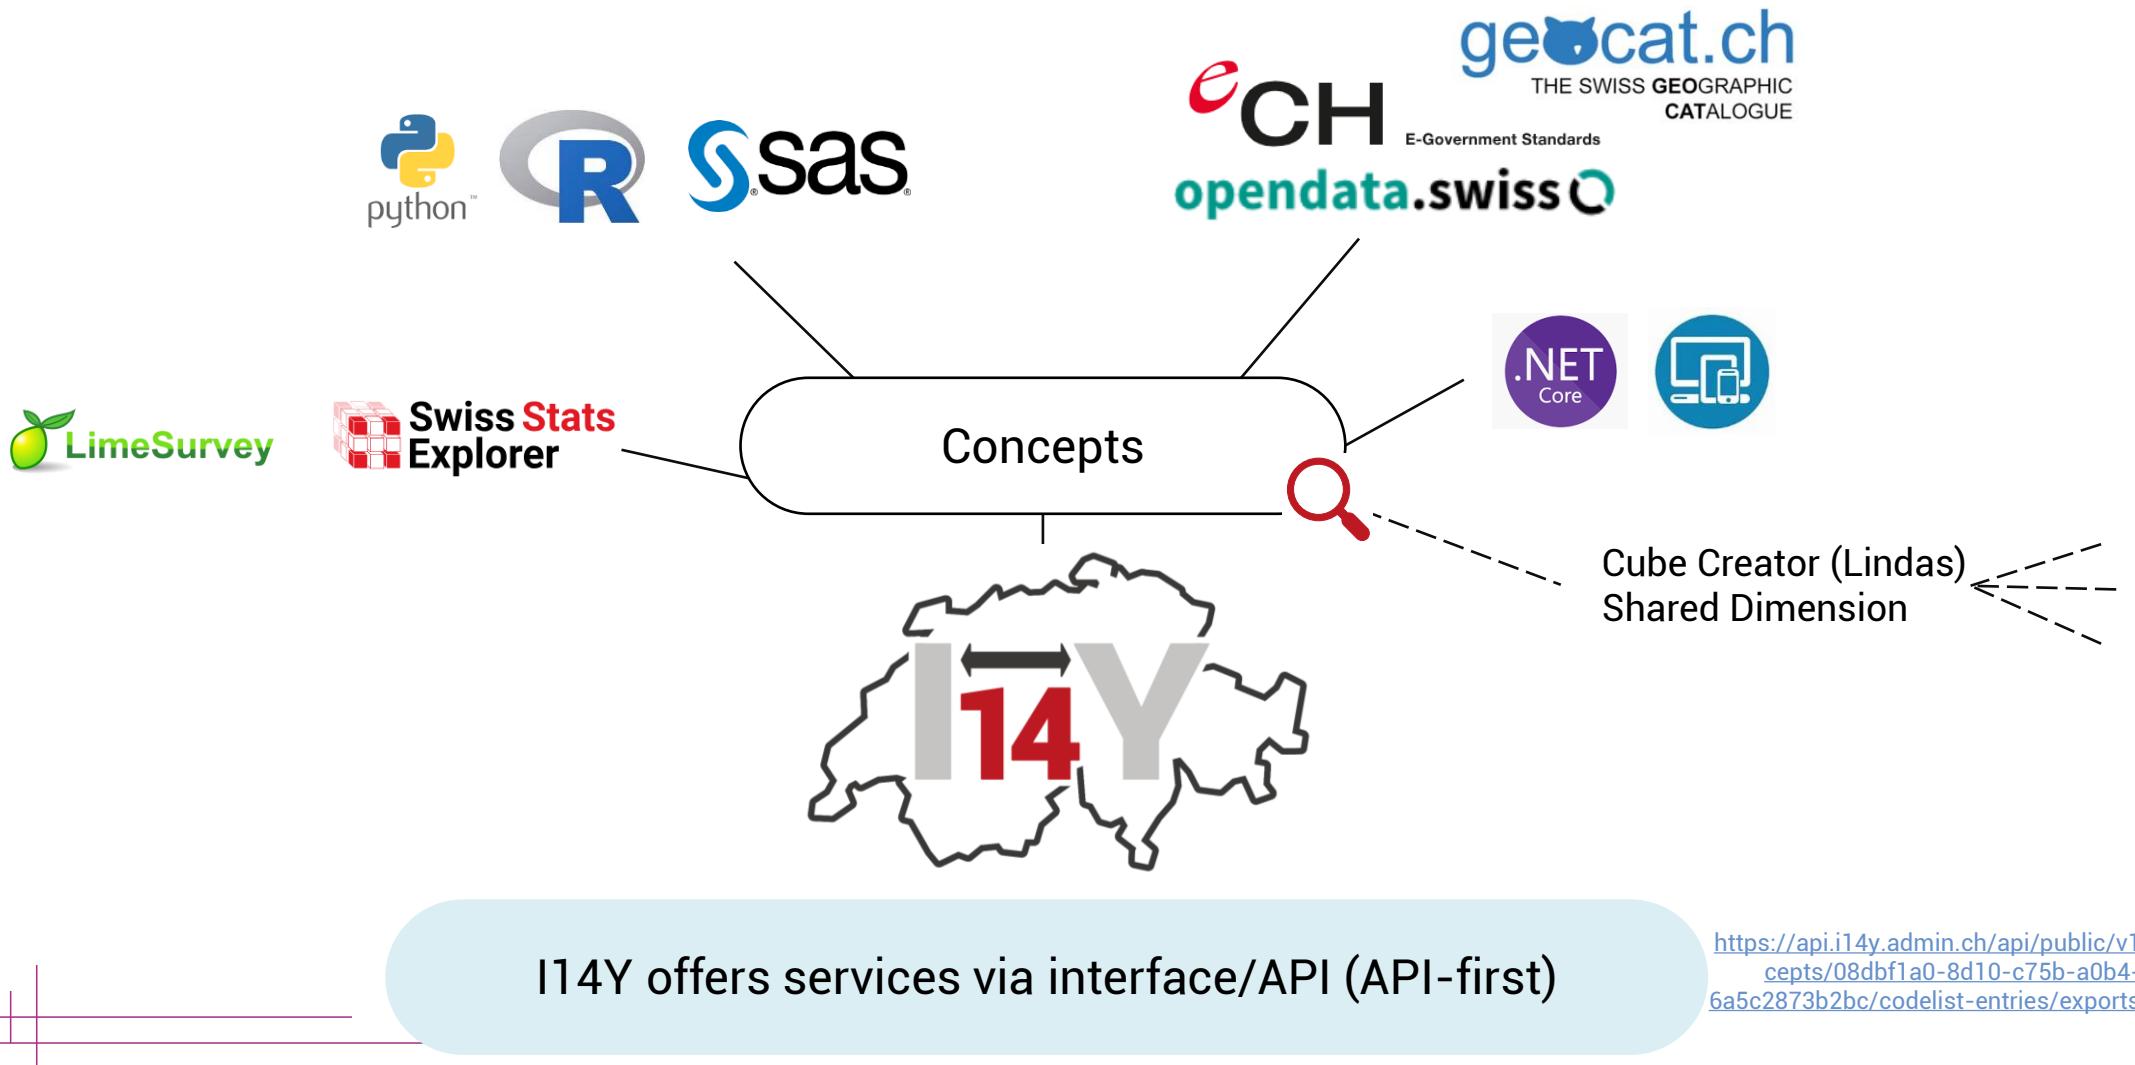

I14Y is based on Data Catalog Vocabulary (DCAT)
I14Y offers all services via interface/API (API-first)

Use Cases

1. Transparency / principle of publicity / inventory
2. Open Government Data
3. Reuse of concepts

Identification number of the enterprise for statistical purposes (ENTID number)

Status: Recorded

Description

In the data model of the Business and Enterprise Register (BER), the ENTID identifies the enterprise for statistical purposes. There is a 1-to-1 relationship between the ENTID and the UID of the main legal unit (head office). The ENTID is a non-speaking identification number and consists of nine digits.

Identifier	entid
Publisher	Federal Statistical Office
Version	1.0.0
Valid from	19.07.2021
Properties type	Numeric
Minimum value	100000000
Maximum value	999999999
Number of decimal places	0

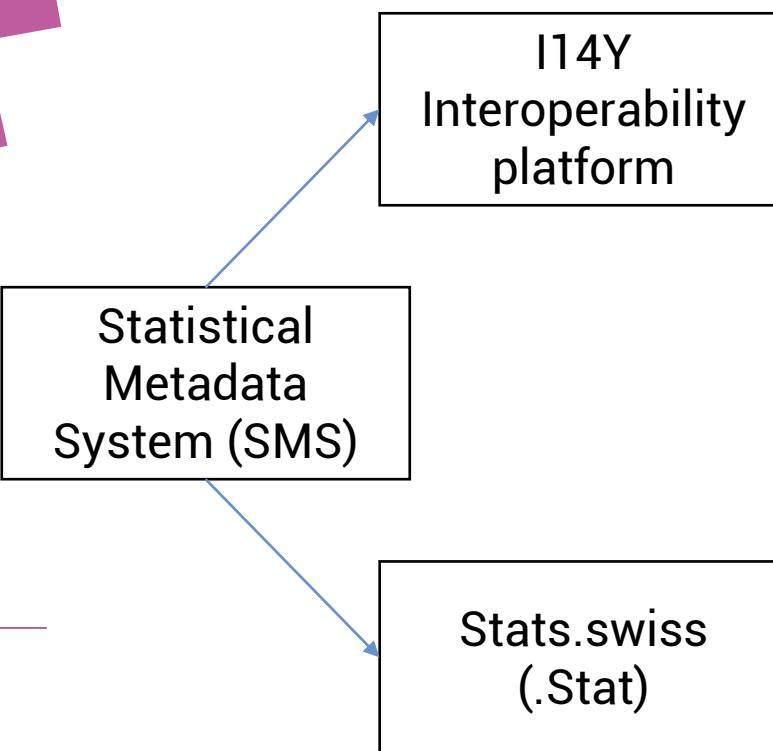

Relations

Number of data elements: 52 Some data elements may not be visible on the public interface.

Reuse of concepts – example – Linked Data

Query Data

To search in data from a specific dataset, use a SPARQL query. SPARQL (pronounced "sparkle", a recursive acronym for SPARQL Protocol and RDF Query Language) is an RDF Query Language. All data on LINDAS are available in the RDF format. You can re-use such queries and combine them with other data.

Query https://int.lindas.admin.ch/query +

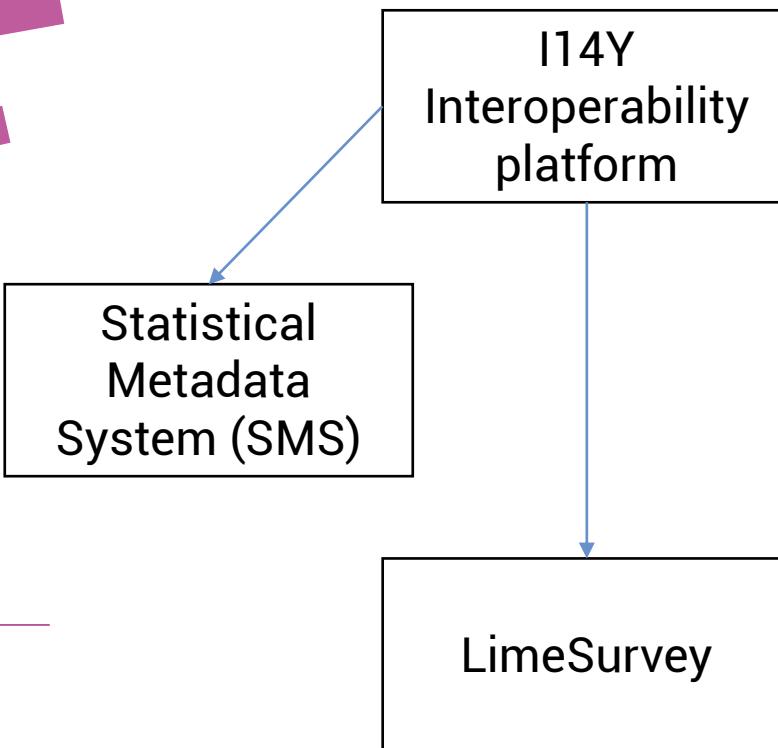

```

Reuse of concepts – example – LimeSurvey

The screenshot shows the LimeSurvey software interface. In the center, there is a modal window titled "Beschriftungseinstellungen verwalten" (Manage Labeling Settings). The modal has a dropdown menu set to "Fahrzeugart" (Vehicle Type). Below this, there are tabs for "Deutsch" (German), "Französisch" (French), and "Italienisch" (Italian). The "Deutsch" tab is selected. A table lists vehicle types with their corresponding codes:

Fahrzeugart	Code	Name
L0001		Personenwagen
L0002		Schwerer Personenwagen
L0003		Leichter Motorwagen
L0004		Schwerer Motorwagen
L0005		Gesellschaftswagen
L0006		Kleinbus
L0007		Gelenkbus
L0008		Trolleybus
L0009		Gelenktrolleybus
L0010		Lieferwagen
L0011		Lastwagen
L0012		Leichtes Sattelmotorfahrzeug
L0013		Schweres Sattelmotorfahrzeug

At the bottom of the modal are three buttons: "Abbrechen" (Cancel), "Ersetzen" (Replace), and "Hinzufügen" (Add).

Two URLs are displayed above the screenshot:
<https://github.com/I14Y-ch/iSurvey>

Reuse of concepts

Libraries:

- R library: <https://gitlab.com/DSCC/fso-metadata>
- Python library: <https://pypi.org/project/fso-metadata/>
- SAS library (intern)

These are now already outdated, and will be updated to correspond to our new APIs.

Other platforms referencing our concepts:

- Geocat.ch: example [link](#)
- eCH: [eCH-0108](#)

Some figures

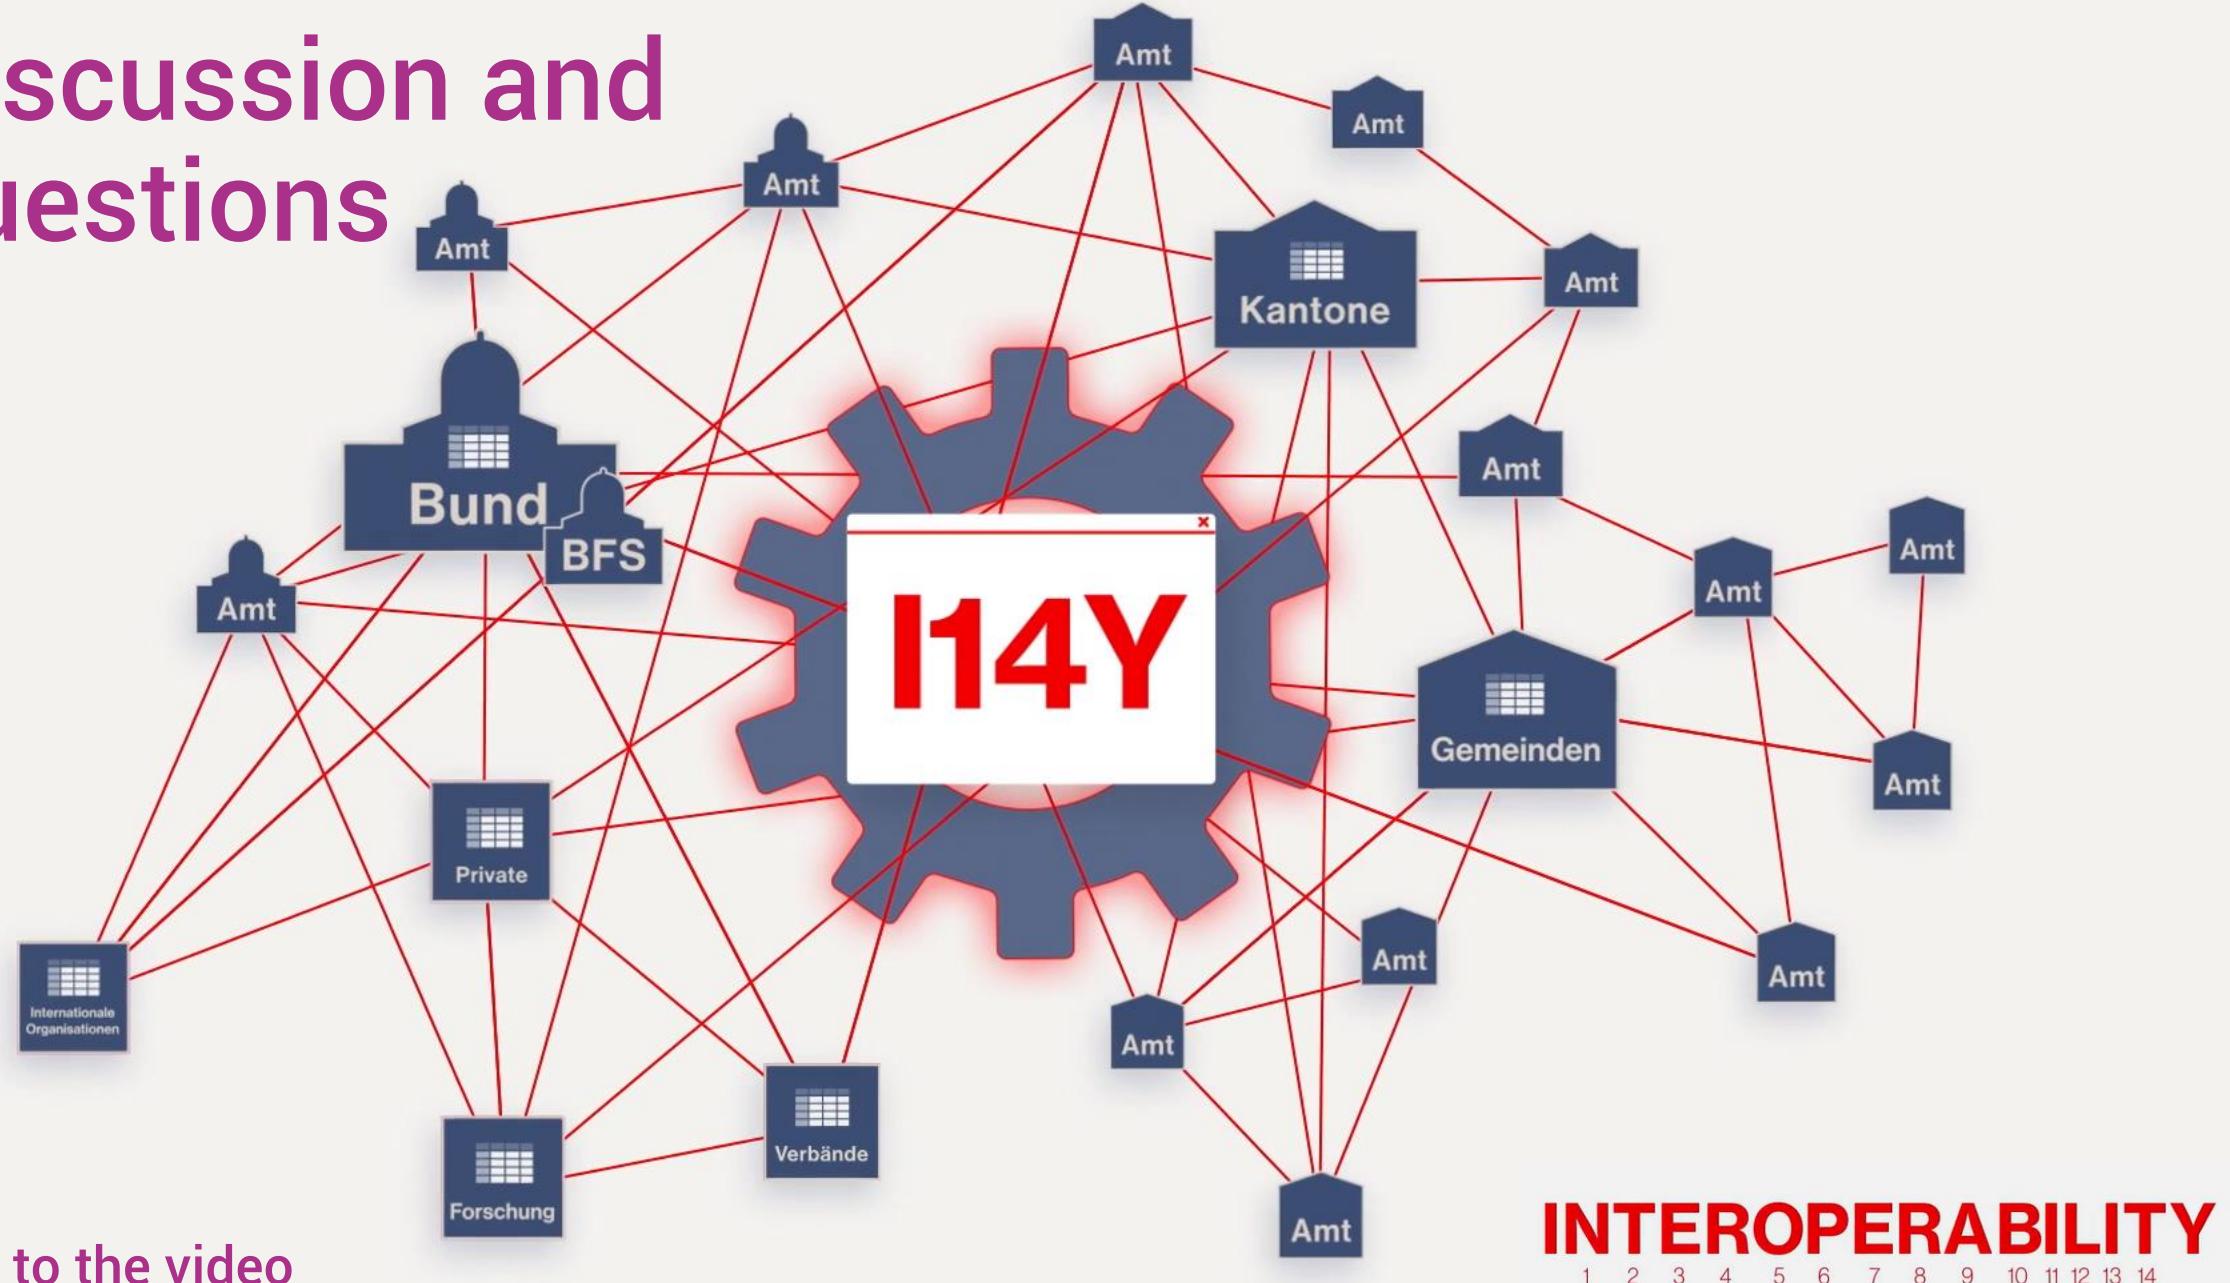

- 439 published concepts (264 in 2024)
- 250 unique users per week (rising)
- 40 organisations with local data stewards and
- 127 Users of I14Y input in production

Dashboard: <https://sharp-gould.185-66-108-249.plesk.page/>

Plans for 2025

- API Gateway improvements
- Historisation of changes and notifications
- Onboarding new cantons and organisations / User experience
- Automate data exchange with other catalogues
- Rework concept reuse in dataset structures
- Open source
- ...

Discussion and questions
