

Development of the eTIR international system and other related IT projects

TIR Technical Implementation Body, 8th session

8 October 2024

Jonathan Valdes

Sustainable Transport Division

UNECE

www.etir.org

eTIR turns borders into bridges

- 1,200 web application users *(since 2018)* +9
 - 30,414 authorized TIR carnet holders +145
 - 298 stamps and seals records +3
 - 2,769 customs offices operational for TIR procedure +15
- (Details of charts below available upon request at itdb@un.org)*

- Approximately 138,000 WS calls in 2018 & 2019
 - 77,700 WS calls in 2020
 - 176,710 WS calls in 2021
 - 233,810 WS calls in 2022
 - 232,560 WS calls in 2023
 - 116,20 WS calls as of 25 July 2024
- *Current trend slightly below 2023*

Number of web service requests over time

Recent achievements:

- Implementation and (successful) testing of ITDB web service extension (request made by Uzbekistan)
 - Possibility for National Customs Systems to manage Holder and Customs records
- Migration of ITDB, eTIR IS and eTIR Portal to new servers/hosting provider (UN DICT).
- eTIR National Application:
 - Work on next potential deployments
 - Language support extension (Kyrgyz)

Planned activities for the coming quarter:

- Study possibility to publish publicly on ITDB web application the national/regional additional data requirement related to TIR transport (in reference to Article 9 of Annex II).
- Work on ITDB web service extension further deployment.
- eTIR National Application:
 - Study of new feature requests and possible adaptations to regional customs unions

International TIR Data Bank:

Improve ITDB data quality, data access and data maintenance process

- Implementation of web services to allow TIR carnet holder and customs offices record

Extend master data scope for ITDB

- Better support eTIR (national/regional extra requirements)

Streamlining of ITDB data management

- Review of current process and proposal to simplifying when relevant to customs.
- Study possibility and interest to implement super users with capacity to great users within their perimeter.

ETIR National Application:

Improve eTIR NA based on feedback and adapt it to incoming deployments

- Fix and updates based on early feedback (Iran) and TIR secretariat observations
- Study of regional customs unions needs and how eTIR NA could be used in such context

Any question ?

Thank you!
