

Economic Commission for Europe**Committee on Environmental Policy****Twenty-ninth session**

Geneva, 6–8 November 2024

Item 13 of the provisional agenda

**Annual programme of work of the Environment
subprogramme for 2025 and outline of
key components of the programme of work of the
Environment subprogramme for 2026****Draft programme of work of the Environment
subprogramme for 2025****Note by the secretariat****Introduction**

1. The present document sets out the draft programme of work of the Environment subprogramme (“the subprogramme”) for 2025. The Committee on Environmental Policy (“the Committee”) is invited to adopt it and recommend it to the Executive Committee for approval. Any subsequent additional, carried over or terminated deliverables will be reflected in the United Nations Umoja system used by the secretariat for planning, monitoring and reporting on the implementation of the programme.
2. The objective, strategy, planned results and deliverables in the draft programme of work correspond to those contained in the Economic Commission for Europe (ECE) proposed programme budget for 2025 (A/79/6 (Sect. 20)). The work of the subprogramme is aligned with the Sustainable Development Goals. In attaining its objective, the subprogramme builds on cross-sectoral collaboration with other subprogrammes in relevant ECE areas where multiple Sustainable Development Goals converge, including on the high-level themes designated by the Commission sessions. This type of collaboration enables the subprogramme to maximize existing synergies, increase the efficiency of its work, and have a multiplying effect on the impact of its actions to support countries in implementing the Sustainable Development Goals. The deliverables of the subprogramme fall into the following main categories: (a) facilitation of the intergovernmental process and expert bodies; (b) generation and transfer of knowledge, including technical cooperation projects, training events, seminars, workshops and publications; (c) other substantive deliverables; and (d) communication deliverables.
3. The details of the proposed publications are provided in annex I to the present document. The overall ECE legislative mandates and those specific to the subprogramme are listed in annex II to the present document.

I. Objective

4. The objective, to which the subprogramme contributes, is to improve environmental governance and performance for safeguarding the environment and health.

II. Strategy

5. Responsibility for the subprogramme is vested in the ECE Environment Division.
6. To contribute to the objective, the subprogramme will:
 - (a) Support the implementation of outcomes of global and regional summits and conferences, and support and promote the implementation by countries of the ECE multilateral environmental agreements, contributing to achieving mainly Sustainable Development Goals 3, 6, 9, 11–13 and 15–17, through the core interlinked functions of international policy dialogue, normative work, capacity-building and the dissemination of good practices and lessons learned in the areas of air quality, water, industrial safety, public participation, impact assessment, environmental monitoring and assessment, environmental performance, education for sustainable development and the mainstreaming of environmental concerns into other dimensions of sustainable development;
 - (b) Support and promote the implementation of the ECE policy tools, including the ECE Environmental Performance Review Programme, contributing to achieving mainly Sustainable Development Goals 6, 11–13 and 15; the ECE Environmental Monitoring and Assessment Programme, contributing to achieving mainly Goal 17; the UNECE Strategy for Education for Sustainable Development, contributing to achieving Goals 4 and 12–13; and the Transport, Health and Environment Pan-European Programme, contributing to achieving mainly Goals 3, 11, 13 and 17;
 - (c) Support and promote the sharing of information (e.g., through the Shared Environmental Information System), experiences and good practices in the ECE region;
 - (d) Promote synergies among ECE multilateral environmental agreements;
 - (e) Conduct environmental performance reviews, assisting countries in the implementation of the recommendations from those reviews, and monitor the impact of the recommendations on national policies;
 - (f) Using a country needs-based approach, support countries, with a focus on countries of Eastern and South-Eastern Europe, the Caucasus and Central Asia, in environmental policymaking, monitoring, assessment and management, including by providing an intergovernmental decision-making platform, organizing capacity-building activities and providing advisory services;
 - (g) Work with interested non-ECE countries, including those wishing to join the multilateral environmental agreements that are open to global accession;
 - (h) Support member States in addressing emerging issues related to the work of the subprogramme, including those resulting from international and regional processes by, among other things, providing advisory support, developing policy packages and/or recommendations, and supporting countries in the development of regionwide approaches to such emerging issues (e.g., on sustainable infrastructure), including ensuring effective and inclusive access to information, public participation in decision-making and access to justice.
7. The above-mentioned work is expected to result in:
 - (a) Improved environmental governance and performance by member States;
 - (b) Strengthened integration of environmental concerns into member States' sectoral policies;
 - (c) More effective development and implementation of environmental legislation and policy by member States;
 - (d) Improved response to environmental challenges by member States;

(e) Enhanced cross-border cooperation between countries and effective international and national cooperation;

(f) Strengthened implementation of ECE multilateral environmental commitments and increased geographical coverage.

III. Planned results for 2025

8. The planned results for 2025 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2023 and the proposed programme plan for 2025. Result 3 is a new planned result.

Result 1: strengthened industrial safety governance in Eastern and South-Eastern Europe, the Caucasus and Central Asia

Programme performance in 2023 and target for 2025

9. The subprogramme's work contributed to sustaining national policy dialogues in Serbia, including through the organization of a stakeholder consultation and support for the development of the national programme for industrial safety. The target of sustaining national policy dialogues on industrial safety in five Central Asian countries was not met owing to the termination of a project to launch the national policy dialogues on industrial safety and the lack of a follow-up project for their implementation. However, interinstitutional working groups on tailings safety and the prevention of accidental water pollution were formally established in two Central Asian countries in January 2022 (Kazakhstan) and October 2022 (Tajikistan), and both countries organized the second meetings of their working groups on 15 March 2023, in Astana (hybrid), and 4 April 2023, in Dushanbe (hybrid). Uzbekistan also organized a meeting in Tashkent (hybrid), on 27 April 2023, with ECE support, to consider the establishment of a similar working group in its country.

10. Progress towards the objective and the target for 2025 is presented in the performance measure contained in table 1.

Table 1

Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Serbia established a national policy dialogue steering committee	Serbian national policy dialogue meeting addressed issues of national concern, involving relevant authorities	National policy dialogues were sustained and implemented by Serbia	National policy dialogues are sustained and implemented by Serbia	Action plan for implementation of national programme on industrial safety in Serbia developed
Central Asian countries reviewed industrial safety legislation to align with Convention's requirements	Finalization of review of industrial safety legislation to align with Convention's requirements	Interinstitutional working groups were sustained in Kazakhstan and Tajikistan	Serbia finalizes national programme on industrial safety	Interinstitutional working groups are sustained and meetings held in at least two Central Asian countries

Result 2: increased number of States Members of the United Nations becoming parties to multilateral environmental agreements serviced by the United Nations Economic Commission for Europe

Programme performance in 2023 and target for 2025

11. The subprogramme's work contributed to the number of parties to multilateral environmental agreements serviced by ECE rising to 602, exceeding the planned target of 593 parties.

12. Progress towards the objective and the target for 2025 is presented in the performance measure contained in the figure below.

Performance measure: number of parties to multilateral environmental agreements serviced by the United Nations Economic Commission for Europe

(Cumulative)

Result 3: modernized database on pollutants to enable responsive fact-based decisions

Proposed programme plan for 2025

13. Digital modernization of the pollutant release and transfer registers, governed by the Protocol on Pollutant Release and Transfer Registers, as a comprehensive database for decision-making and reporting for various processes is needed for effective policy decisions. The subprogramme strengthened the capacity of member States with regard to international and national reporting obligations, including advisory support, the preparation of materials and thematic events. Those efforts led to the recognition by member States of the pressing need to integrate data on different emissions into a single portal within a wider information system covering environmental, social and economic data.

Lessons learned and planned change

14. The lesson for the subprogramme was that pollution-related databases could be better integrated to improve the utility of the data. In applying that lesson, the subprogramme will support preparation of a draft decision to integrate databases using technological advances and guidance to integrate pollutant release and transfer registers with other systems. The subprogramme will provide technical assistance to enhance decision-making on pollution prevention, impact assessments, sustainability and a circular economy.

15. Expected progress is presented in the performance measure contained in table 2.

Table 2
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)

IV. External factors

16. The subprogramme is expected to achieve its objective on the assumption that:

(a) Member States continue to guide ECE intergovernmental processes, support the work of ECE, and give high priority to regional and subregional cooperation and integration, with a view to achieving sustainable development;

(b) All relevant stakeholders at the national level have the political will and sufficient capacity to integrate the environmental dimension into policy formulation and to implement national legislation in accordance with the ECE multilateral environmental agreements;

(c) All relevant stakeholders at the national level have sufficient awareness of environmental issues and the active support of the public in the implementation of national and regional policies;

(d) The regular budget liquidity situation faces no constraints. Voluntary resources continue to be available;

(e) At the country level, there is no critical impact on resource availability owing to global, regional or national economic developments.

V. Deliverables to be implemented in 2025

17. Table 3 lists all deliverables, by category and subcategory, that are expected to contribute to the attainment of the objective stated above.
